Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Alliant International University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of Alliant International University's Graduate School of Education is to produce competent, confident, and conscientious educational leaders who will promote and empower academic success, personal growth, and professional achievement of all in a global society. We accomplish this by offering our students exceptional professional preparation centered on multidisciplinary and holistic approaches to education.
The mission of the Teacher Education Program supports the university mission by emphasizing critical thinking, ethics, and practical application of teaching skills. This commitment involves preparing teachers to be skilled practitioners utilizing reflective, inquiry-based thinking to continue to learn and improve the quality of what they do. We want teachers to significantly impact student learning in the classroom, school, and the educational community. Thus, our program is distinguished by a dynamic responsiveness to current issues and problems in today's classrooms. A multicultural and global perspective in which multiple viewpoints is reflected in this program.
Small class size provides numerous opportunities for students to work together and form a cohort as well as receive individual attention from the instructor. Evening sessions allow working adults the opportunity to participate in the program. A qualified faculty from diverse backgrounds provides our students with the knowledge to be problem solvers, information and technology managers, and capable, effective communicators. These skills are practically applied by those practitioners already in classrooms and during the student-teaching experience for those who are not yet in the classroom.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Teacher Education Program at AIU is characterized by a commitment to excellence on the part of faculty, staff, and students. The Teacher Education faculty consists of full, associate, and assistant professors holding doctoral degrees and skilled practitioners holding Master of Arts Degrees in Education. Our Student Services Department is staffed by qualified professionals who provide personal guidance and assistance to students. Small class size provides opportunities for students to learn and practice instructional strategies such as collaborative learning, reflective thinking, and innovative use of technology, and to develop classroom management skills. Our students tend to be serious individuals interested in becoming skilled practitioners who can make a positive difference in the lives of children.
The AIU Education Department maintains partnerships with schools in local districts providing faculty with an opportunity to work closely with teachers in the field on infusing critical thinking into all areas of the curriculum. These collaborations combine the know-how of experienced teachers with that of experienced professors to be in the forefront of educational improvement. Also, embedded in the curriculum is technology training as an invisible tool of a 21st century educator as she/he designs, delivers, and evaluates authentic learning experiences for students. Alliant International University encourages teachers who positively impact the lives of their students, the culture of the school, and the reputation of the community .We encourage a career long relationship between the practicing teacher and Alliant in order to continually achieve these goals.

Institution/Program: **Alliant International University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The AIU Graduate School of Education Internship program has expanded to now include an Early Completion Option pathway for alternative certification, focusing on the practicing intern teacher as well as the Education Specialist: Mild/Moderate Disabilities Levels I and II for 2007-08. This program growth reflects the growing needs of local districts for support and training of employed Intern Teachers. The Program has expanded beyond our San Diego and San Francisco campuses to now also include our Los Angles and Sacramento campuses.

Institution/Program: **Alliant International University**

Part B: Quantitative Information about Each Teacher Preparation Program

Number of Candidates Who Completed One or More Courses During 2007-2008 in a Program Which Included Supervised Student Teaching or Internship Teaching

	Totals	Programs with Supervised Student Teaching	Programs with Internship Teaching
Multiple Subject Candidates	73	3	70
Single Subject Candidates	71	4	67
Education Specialist Candidates	27	0	27
Totals	171	7	164

Numbers of Candidates in Supervised Student Teaching/Internship Teaching During 2007-2008

	Totals	Admitted Candidates in Supervised Student Teaching	Admitted Candidates in Internship Teaching
Multiple Subject Candidates	72	3	69
Single Subject Candidates	67	4	63
Education Specialist Candidates	26	0	26
Totals	165	7	158

Institution/Program: **Alliant International University**

Part B (continued): Quantitative Information about Each Teacher Preparation Program

Number of Supervising Teachers During 2007-2008
(Includes full-time and part-time supervisors)

	Student Teacher Supervisors	University Intern Teacher Supervisors	District Intern Teacher Supervisors
Multiple Subject Programs	**3**	**18**	
In Academic Positions with Rights and Responsibilities	1	3	
In Non-Academic Positions without Rights and Responsibilities	2	15	
Single Subject Programs	**2**	**18**	
In Academic Positions with Rights and Responsibilities	0	2	
In Non-Academic Positions without Rights and Responsibilities	2	16	
Education Specialist Programs	**0**	**8**	
In Academic Positions with Rights and Responsibilities	0	1	
In Non-Academic Positions without Rights and Responsibilities	0	7	

Ratios Between Student Teachers and Full-time Supervisors of Student Teachers During 2007-2008*

	Student Teacher Supervisors	University Intern Teacher Supervisors	District Intern Teacher Supervisors
Multiple Subject Programs	1 :1	3.89 :1	:1
Single Subject Programs	2 :1	3.72 :1	:1
Education Specialist Programs	0 :1	3.38 :1	:1

* *California teacher preparation programs do not typically have full-time supervisors. Ratios are based on budgetary equivalencies, which vary between programs. Therefore, caution should be exercised when making ratio comparisons between programs.*

Institution/Program: **Alliant International University**

Part B (continued): Quantitative Information about Each Teacher Preparation Program

Duration of Required Candidate Participation in Supervised Student Teaching During 2007-2008

	Average Hours per Week	Minimum Weeks Required	Total Minimum Hours
Multiple Subject Programs	30	18	540
Single Subject Programs	30	18	540
Education Specialist Programs	0	0	0

Duration of Required Candidate Participation in Intern Programs in 2007-2008

	Number of Years
Multiple Subject Programs	1
Single Subject Programs	1

Institution/Program: **Alliant International University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Antioch University Los Angeles**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Master of Arts in Education and Teacher Credentialing Program (MAE/TC) at Antioch University Los Angeles prepares teachers who will specialize in teaching literacy, are knowledgeable about building character and citizenship skills, and actively resist cultural, economic and racial bias. Moreover, Antioch's teachers educate their students to understand and respect the ecological systems upon which humankind depends for its continued survival. The MAE/TC Program seeks to prepare competent, effective teachers who have the educational and social skills to influence change in their schools, helping to make their classrooms and school communities places where all members can learn and develop. To prepare its students to address social justice issues in education, the MAE/TC program provides theories, teaching methods and experience appropriate for effective work in low-performing schools where inequities are most prominent. The credential preparation courses are offered at the graduate level. Students continue in the Program studying more advanced courses in pedagogy, curriculum and leadership to earn a Master of Arts degree in Education. The Program serves the local school communities of Los Angeles that have significant proportions of lower socio-economic groups, underrepresented ethnic groups and second-language learners.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Professional preparation courses are offered at the graduate level. In all courses, candidates study both theory and methods and learn to critically evaluate pedagogy and curricular content. Candidates are taught the skills of inquiry and learn to view themselves as researchers and their classrooms and school as social laboratories. Candidates study both accepted and emergent theories of learning, including current research on multiple intelligences, ethical development and learning differences. The course and fieldwork for all candidates is tailored to prepare them to work in low-performing schools and, particularly, with second-language learners. The curriculum includes methods courses in art, civic education and physical education and candidates are taught ways to provide creative, integrated curriculum that provides access to core content areas for all students. Candidates are closely supervised during daily student teaching by Program Faculty who are familiar with all aspects of the Program's curriculum.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Argosy University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the Argosy University teacher preparation program is to provide future teachers with cutting-edge classroom instructional and problem-solving skills leading to excellent learning opportunities for California's diverse students. Individuals in the program focus on the Teacher Performance Expectations addressed by the California Commission on Teacher Credentialing, and on the content standards prescribed for grades K-12. Firm foundations are established for lesson-planning, classroom management, and student assessment, with particular attention given to preparing for the ELL and other special needs students. The practicum places the "student teacher" in an environment wherein the lessons learned are applied directly to a classroom setting under the guidance of a "mentor teacher" and a university supervisor.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Argosy University Teacher Credential Preparation Program continues to achieve program excellence by offering professional coursework and field experience requirements that meet or exceed the standards established by the California Commission of Teaching Credentialing (CCTC) in effort to produce the highest quality candidates to be recommended for a California Teaching Credential.

In addition to course work requirements, students participate in a two-hour orientation on student teaching. The orientation is designed to re-emphasize the professional conduct expectations and CCTC requirements in order to teach in a diverse elementary, middle and secondary schools in California. Professional ethics form a significant part of the orientation, and students are clearly reminded of the California Standards for the Teaching Profession.

Program excellence has also been demonstrated as Argosy University has developed meaningful working relationships with surrounding school districts. Additional school districts utilize our students for student teaching as a result of these solidified relationships. The Argosy University Teacher Credential Preparation program is pleased with the contributions it has made to the field of education. We will continue to strive to provide our students with the cutting-edge approaches to dynamic teaching and learning.

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

1. Further developing relationships with area school districts so that student teachers could be placed in meaningful and varied Field Experience situations.

2. Improved student tracking system so that program administration can more easily assist students in making important career decisions.

3. Significant improvement in library services through enhanced data base and print media opportunities.

4. Strengthened the Advisory Boards in northern and southern California.

5. Hired a professor of practice to administer the TPA process for all of California.

6. Referenced all syllabi assignments with TPEs.

7. Imported fieldwork into each course.

8. Enlarged the adjunct faculty base.

Institution/Program: **Argosy University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Azusa Pacific University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Azusa Pacific University (APU) is an evangelical Christian University that is located in the City of Azusa in the San Gabriel Valley northeast of Los Angeles. APU has been committed to "God-First" and excellence in higher education for over 100 years. The University, through the School of Education, has been educating teachers in state-approved programs since 1963. The University currently offers a B.A. in Liberal Studies and an accelerated B.A. in Human Development, both of which prepare future multiple subject and special education teachers for CSET and the professional teacher education program. Eight state-approved undergraduate subject matter programs are offered as preparation for future highly qualified single subject teachers.

Traditional and intern programs are offered in a convenient late afternoon/evening nine week term format for Multiple Subject, Single Subject, and Special Education Mild/Moderate teacher preparation. Teacher credentialing programs are offered on the Azusa Campus and seven regional centers located in Southern California. Of the graduate student population, 63% are female, 35% ethnic minorities, and 7% are international students that reflect the ethnic and linguistic diversity of the school districts in which the future teachers will serve.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Azusa Pacific University is regionally accredited by WASC and was reaccredited in March 2007 by the Commission on Teacher Credentialing (CTC) and the National Council on the Accreditation of Teacher Education (NCATE) for a full seven years. Full-time, part-time (50% contracts), and adjunct faculty in the Teacher Education Programs at APU represent a broad range of educational experience and expertise. The School of Education employs 78 full-time faculty who serve in seven departments.

Adjunct faculty are working professionals who provide significant expertise for programs in which they teach and bring the current "real world" issues and solutions to the classroom. They work with full-time faculty supported with on-going professional development. Adjuncts provide quality instruction that candidates rate highly for excellence of instruction commensurate with ratings for full-time faculty.

The Conceptual Framework for the School of Education states that the School's mission is to produce teacher candidates who are ethical, responsive, and informed practitioners. To achieve this objective, candidates are assessed on subject matter knowledge, pedagogy, and disposition from admission to graduation. As early adopters of the California Teacher Performance Assessment (TPA), the School of Education has successfully infused assessment of all these areas into its curriculum.

Institution/Program: **Azusa Pacific University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The implementation of the TPA across all regional centers was accomplished within the last academic year. The Teacher Education Programs continue to use summative data from the TPA to implement program improvement. A second major initiative that the Department of Teacher Education is undertaking for the next academic year is collaboration with the College of Liberal Arts and Sciences at APU in developing more subject matter waiver programs for prospective teachers as a way to recruit more mathematics and science teacher candidates. The School of Education will collaborate with the College of Liberal Arts and Sciences in faculty development and cross-program course development.

Institution/Program: **Azusa Pacific University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Bethany University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The program of professional preparation for teachers at Bethany University, a small, private, Christian university, has at its core the mission of preparing leaders for the church and for society. Leadership is defined as exemplifying quality and caring service to others. This focus on servant leadership is demonstrated in the teacher preparation program by the focus on the individual student. The approaches to teaching K - 12 students presented in the course work and the support and instruction provided to the prospective teacher, model this focus on the individual student. Preparing teachers to serve by leading through example, by providing quality instruction, and by being caring, competent individuals is the goal of the program. Recipients of this service include not only the students in their classrooms, but also parents, colleagues, and the broader educational community. Teachers prepared at Bethany University are qualified to serve in a variety of contexts, public elementary, middle, or high schools, private schools, international schools, home schools, or in mission contexts around the world. Quality, caring leadership is needed everywhere, and the professional preparation program at Bethany University equips individuals to be leaders wherever they choose to serve.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

During the 2007-2008 academic year the professional preparation program at Bethany University has continued to emphasize the importance of coaching and mentoring. Coaching includes review of material related to the teaching of the California content standards and association with standards in the respective field of study. This coaching, combined with supervision and coaching in pedagogy, provides candidates a strong foundation with which to begin a career as a professional educator.

Institution/Program: **Bethany University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

New initiatives in the Teacher Education Program are linked to meeting the new standards for professional preparation programs. Initiatives include infusing technology instruction throughout the program coursework, developing an enhanced professional portfolio to document candidates' learning throughout their coursework and supervised teaching experiences, and implementing the Teacher Performance Assessments as required by the California Commission on Teacher Credentialing. Beginning in the Summer 2007 session, all students in the credential program will become candidates for the MAT (Master of Arts in Teaching).

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Biola University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of Biola University is biblically-centered education, scholarship, and service equipping men and women in mind and character to impact the world for the Lord Jesus Christ. Within this overarching mission and goal, Biola's School of Education strives to fulfill its vision to equip a generation of influential educators focused on God's calling, devoting their strengths, gifts, and scholarship, to meet the needs of diverse students and to advance the Kingdom of God. For several decades, Biola's School of Education (formerly Department of Education) has taken pride in its role of preparing the finest educators within a context of practical, hands-on learning, through a combination of extensive community involvement and full-time faculty who bring rich and diverse experiences to the instructional setting. In compliance with the Program Standards of the California Commission on Teacher Credentialing, Biola's CCTC-accredited Multiple Subject and Single Subject programs include practicum fieldwork in the widely diverse public and private schools of the greater Los Angeles and Orange County areas. Additionally, Biola's teaching credential candidates are offered the opportunity to complete a portion of their student teaching field practicum in a variety of overseas school settings. Through a variety of field placements and challenging coursework, candidates in Biola University's Teacher Preparation Program are equipped with not only the credential to serve in public and private education, but with the experiential wisdom needed for successful teaching in diverse educational environments.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The factors leading to the success of Biola's Teacher Preparation Program include small class sizes with a low student-to-faculty ratio as well as full-time faculty of former public and private educators and administrators. This allows faculty to mentor credential candidates and provide individual assistance and support throughout the program. Biola University's School of Education has also continued to hold to academic standards and fieldwork requirements surpassing the standard requirements of the State of California in these respective areas. Prior to student teaching, our candidates will have completed over 120 fieldwork placement hours in public and private school classrooms. Biola has developed strong collaborative partnerships with the districts in the surrounding communities and thus, candidates are provided with quality fieldwork and student teaching placements in diverse communities. Biola has also continued to rely heavily on feedback from the surrounding educational community, implementing the suggestions and ideas of local educators and administrators to better serve our candidates while impacting local schools. These experiences have given our candidates an advantage with the local school districts in the form of preferential status with both placements and employment. Furthermore, throughout the years, many of our graduates have been honored with Teacher of the Year awards and leadership positions at the district, county, and state levels.

Institution/Program: **Biola University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

1. A new position of TPA Coordinator was established in order to provide candidates with greater support and remediation assistance with TPA submissions.

2. The TPA Coordinator and Administrative Assistant developed a CalTPA section on the Biola University Blackboard website to streamline TPA submission and to provide candidates access to all TPA related materials.

3. The Teacher Preparation Committee reevaluated the placement of TPAs in our Teacher Preparation coursework. In order to prevent our candidates from needing to complete two TPAs during the demanding semester of student teaching, the placement of TPAs #2 and #3 were rearranged. Beginning in Fall 2009, there will be only one TPA in each teacher preparation course.

4. In order to better prepare candidates for CSET exams, CSET prep courses were designed and will be available to students beginning in Fall 2009 forward.

5. In order to better prepare multiple subject candidates, three new pedagogy courses (Math/Science, Health, and Social Studies) were approved Fall 2008 and will be available beginning Fall 2009.

6. In order to better prepare single subject candidates, a content specific pedagogy course for each single subject content area was approved Fall 2008 and will be available beginning Fall 2009.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California Baptist University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Within California Baptist University's Christian liberal arts context, the Metcalf School of Education faculty strives to develop reflective, accepting, and caring teachers, who will model the moral dimensions of Christian life as they offer instruction that is current, research-based, and planned to meet diverse pupil needs. Candidates will be skilled in collecting data through a variety of methods and using it in data-based decision-making to benefit pupils directly, as well as to influence service delivery and evaluation. Candidates are expected to develop an understanding of the diverse populations within schools in the region and the importance of collaboration and consultation with others. Students from all faith traditions are welcome.

The mission of the Metcalf School of Education's Professional Teacher Preparation Program is to prepare professionals of high moral character and ethical behavior to serve in schools throughout the world.

The Metcalf School of Education at CBU offers these basic credentials: Multiple Subject, Single Subject, Education Specialist: Mild/Moderate Level I with a dual credential option,Mild/Moderate Level I (stand alone), Mild/Moderate Level II, Moderate/Severe Level I, and Moderate/Severe Level II. Credential candidates may choose an Internship route to each of these credentials. Also offered: Preliminary Administrative Services credential, Reading Certificate, Pupil Personnel Services credential in School Counseling, Pupil Personnel Services credential in School Psychology. Both Pupil Personnel Services credentials include an intern option.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Many program qualities contribute to program excellence.

- Faculty have had K-12 teaching experience, making them knowledgeable, empathetic role models. They stay up-to-date by being involved in local school district activities by volunteering time, attending and presenting at professional development conferences, and serving on advisory committees.
- Candidates complete extensive fieldwork in pre-requisite courses and professional methods courses to become familiar with the the role and responsibilites of a teacher as well as to learn how to integrate theory and practice. They complete the credential program by student teaching full-time for one semester or by teaching as an intern.
- Candidates can receive free counseling and free academic support through the university. Free review sessions for the Reading Instructional Compentence Assessment (RICA) are provided for them.
- A dual credential option combines elementary and special education preparations for Mild/Moderate candidates.
- Admission into the teaching credential program at CBU requires completion of pre-requisite courses which present an overview of American public schools, teaching exceptional pupils, human development, cultural and linguistic diversity, and educational computing. These prerequisite courses and their fieldwork requirements allow candidates to decide whether teaching is the right career choice.
- In addition to day classes for traditional students, evening classes are scheduled year-round for the convenience of working adults preparing to teach. Pupil Personnel Services candidates also take evening

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The implementation of the California TPAs is the assessment tool that has been used to address standards 19 -21. Cal TPAs are used to assess student proficiency during and at the end of a credential candidate's program. Credential candidates complete professional electronic portfolios using LiveText.

The Intern Pre-Service Report for internships in Multiple Subject, Single Subject, Mild/Moderate, and Moderate/Severe for 120 hours of preservice course/fieldwork was approved in June, 2008.

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The School of Education at California Lutheran University offers programs to prepare 'Reflective Principled Educators' in the context of the University's mission to 'educate leaders for a global society who are strong in character and judgment, confident in their identity and vocation, and committed to service and justice.' Future teachers are prepared in the public schools of Ventura and Los Angeles Counties. Highly qualified (NCLB-compliant) teachers employed without full credentials in area private schools and the San Fernando Valley portion of the Los Angeles Unified School District are served through evening and summer classes. Cal Lutheran has several partnership agreements with the Ventura County Superintendent of Schools Office and the Los Angeles Unified School District.

Candidates are recommended for Multiple Subject (elementary) and Single Subject (secondary) Teaching Credentials (which include authorization to teach English learners) after completion of all credential requirements including the Elementary or Secondary Teacher Preparation Program. The summative criterion for recommendation is passage of four California Teaching Performance Assessments. These assessments are designed to be both formative and summative, and to measure the knowledge and skills of beginning teachers.

The Special Education Program provides qualification for the Education Specialist Teaching Credential, with authorizations in Mild to Moderate, Moderate to Severe, and Deaf and Hard of Hearing Disabilities. The majority of special education candidates qualify for internship credentials, teaching full time while working

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Accredited by the National Council for Accreditation of Teacher Education (NCATE) in the Spring of 2004, California Lutheran University's professional teacher preparation programs are guided by a strong mission statement identified by STRIVE: Serve as mentors and models for moral and ethical leadership, Think critically to connect theory with practice, Respect all individuals, Include and respond to the needs of all learners, Value diversity, and Empower individuals to participate in educational growth and change. This statement serves as a guiding principle as Cal Lutheran continues to build programs, select initiatives, design courses, and work with teacher candidates. Cal Lutheran is dedicated to developing reflective, principled educators.

California Lutheran University's program continues to strengthen its elementary Professional Development School (PDS) located in Moorpark, California, and has a new partnership with a middle school in Thousand Oaks, California. This PDS format provides significant support to elementary and secondary teacher candidates, where faculty and administration in the schools are committed to providing strong preparation acting in partnership with the University faculty. This program greatly enhances the preparation experience. In addition, there are numerous opportunities for research and professional development for both faculties.

The teacher preparation program also continues its development of the use of technology as tools for the students and teachers and as the basis for pedagogy in the new millennium. Advances in e-learning, e-portfolio, and technology literacy provide a strong focus for the Cal Lutheran Teacher Education Program.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

California Lutheran University's professional teacher preparation program has a new partnership with a Professional Development School (PDS) in Thousand Oaks, California. In addition to the existing elementary school partnership, this middle school partnership provides an excellent training ground for single subject teacher candidates and a living laboratory for faculty to conduct research. It also provides professional development support for new and master teachers in the ongoing pursuit of success for all students.

California Lutheran University's professional teacher preparation program continues to strengthen its commitment to valuing diversity as stated in the STRIVE mission statement. This is accomplished through ongoing training in cultural proficiency, continued alignment with the Cal Lutheran mission and goals for valuing diversity, and with the State's mandate for teachers who are able to teach and support all students.

Institution/Program: **California Lutheran University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California Polytechnic State University - San Luis Obispo**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California Polytechnic State University, San Luis Obispo, part of the California State University System, is a comprehensive public institution located on the central coast of California. Nationally recognized for its polytechnic emphasis, it enrolls over 18,000 students in bachelor's and master's degree programs in the Colleges of Agriculture, Food, and Environmental Sciences; Architecture and Environmental Design; Business; Engineering; Liberal Arts; and Science and Mathematics. In addition, the College of Education offers post-baccalaureate credentials, master's degrees, and a joint education doctoral program with the University of California, Santa Barbara. The College of Education, together with campus and K-12 partners, develops and supports qualified, competent, and caring education professionals who prepare a diverse student population to become active and thoughtful participants in a democratic society. The College of Education translates Cal Poly's "learn by doing" philosophy as dynamic school-university partnerships that emphasize quality teaching, current educational practice, applied research, and a strong commitment to serve the community. Accredited by the California Commission on Teacher Credentialing (CCTC), our programs provide teacher education and education specialist students with unique, direct involvement in the best practices of instruction, and in the latest applications of discoveries about learning, assessment, and schooling.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Cal Poly's teaching credential programs continue to attract top students from throughout the state and western region. Academic requirements are rigorous. Applicants to the multiple subject (elementary), single subject (secondary), and education specialist (special education) programs are required to have a minimum G.P.A. of 2.75 at admission and to maintain a 3.0 G.P.A. while enrolled. All candidates are required to pass the California Basic Education Skills Test and a professional aptitude interview. Each is expected to have strong academic preparation in a subject matter area by passing the appropriate state exam or completing a CCTC approved course sequence as part of an undergraduate degree. Multiple subject candidates must complete a three-course sequence in mathematics education as well as extensive methods instruction in reading, social studies, math, and science. All candidates follow a closely supervised, field-based curriculum linking small university classes to hands-on experience in surrounding public schools. Guided by Cal Poly faculty and teacher mentors, candidates take on gradually increasing levels of classroom responsibility, culminating in two quarters of student teaching. A computers-in-education focus acquaints candidates with cutting edge strategies for using technology to boost student achievement. Dedicated teacher education faculty are an interdisciplinary team at Cal Poly, located in the College of Education and in the Colleges of Agriculture, Food, and Environmental Sciences; Science and Mathematics; and Liberal Arts. Cal Poly teacher education graduates are recruited throughout the state and region and are highly successful in their search for teaching positions.

Institution/Program: **California Polytechnic State University - San Luis Obispo**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

A number of innovative initiatives are moving forward in Cal Poly's College of Education. The College co-chairs the University's Center for Excellence in Science and Mathematics Education(CESaME). CESaME's focus on recruiting and preparing math and science teachers is paying off – pre-service candidates in math and the sciences have increased 3 fold in the last 2 years! CESaME continues to offer up-to-date professional development for experienced teachers, studying best practices in content pedagogical knowledge, and motivating K-12 students for STEAM (science, technology, engineering, agriculture, and mathematics) careers. In the multiple subjects program, a science education professor provides leadership in the Center linking partners across K-20. The multiple and single subject programs have embedded Performance Assessment for California Teachers (PACT) tasks and assignments in course work and the Teaching Event in the student teaching experience to meet CCTC's Teacher Performance Assessment requirement. In the single subject program, teacher educators and content educators are working together to develop integrated programs that more closely align subject matter knowledge and pedagogical content knowledge. In Special Education, faculty are engaged in a national project with general education colleagues that streams information on learners with special needs through all curricula. Across programs, the College has developed a web-based student advising system that will help faculty and students monitor progress toward credential completion. These innovations will significantly enhance the excellence and effectiveness of Cal Poly's teacher preparation programs in the future.

Institution/Program: **California Polytechnic State University - San Luis Obispo**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **California State Polytechnic University - Pomona**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Cal Poly Pomona's mission is to advance learning and knowledge by linking theory and practice in all disciplines, and to prepare students for learning, leadership, and careers in a changing multicultural world. The College of Education and Integrative Studies provides an interactive, inquiry-based environment incorporating a multi-disciplinary and interdisciplinary curriculum. Our graduates are prepared to address the complex issues that confront our communities by working toward building a creative and democratic society. The Department of Education prepares K-12 teachers seeking credentials in Multiple Subject (elementary education); Single Subject (secondary education); basic licensure with Cross-cultural, Language and Academic Development (CLAD) or Bilingual (Spanish and Asian Languages) Cross-cultural Language and Academic Development (BCLAD) emphases; and Special Education (Mild/Moderate and Moderate/Severe). The programs seek to develop teacher candidates who: 1) exhibit respect for the dignity of all students, regardless of academic achievement, intellectual potential, social maturity, gender, or ethnic, cultural or racial background; 2) are academically well-prepared in their field of subject-matter expertise; 3) demonstrate best practices in the pedagogy of teaching with appropriate application to meet student needs; and 4) are committed to lifelong learning, are stimulated by open inquiry, and desire to share these qualities with others. The programs are committed to excellence in professional preparation that provides teacher candidates with the opportunity to acquire the skills, intellectual strategies, critical attitudes, and broad perspectives necessary to serve the needs of our schools and communities.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The basic credential programs emphasize the integration of theory and practice in the study of education foundations, curriculum, and pedagogy with an emphasis in the teaching of reading. The emphasis on the teaching of reading has a dual focus: the pedagogy of learning to read and the pedagogy of application to content and context: reading to learn. The basic programs are organized in the four areas of program prerequisites, foundations, methods of teaching, and clinical practice. The preparation of teachers at Cal Poly Pomona is a university-wide function. Increased field experiences and service learning components provide students with opportunities for professional observations, initial practice, and increased practical responsibilities in diverse educational and community settings. Clinical practice includes two 10-week quarters of full-day teaching.

Institution/Program: **California State Polytechnic University - Pomona**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

California State Polytechnic University, Pomona undertook or expanded new initiatives that further institutionalized its distinctive approach to teacher education as a university-wide commitment. The All-University Committee on Teacher Education (AUCTE) is an entity established by the President that routinely brings together faculty from several academic disciplines to ensure a campus-wide approach to teacher preparation and professional development.

As a result of work undertaken by a US Dept. of Education Teacher Quality Enhancement Grant, the following activities were implemented or expanded:

- Continued development of new Professional Development Schools including the inclusion of middle school as part of the network.
- The hiring of six Professional Associates (PAs) who are highly qualified teachers from partnership K -12 schools. PA s work along side university faculty in teaching. They are a critical element in the development of the PDS schools.
- A critical review of supervision methods used during clinical practice. This includes the adoption and adaption of the clinical supervision model developed by the New Teacher Center (NTC) at UC Santa Cruz.
- Implementation of the California Teacher Performance Assessment as the culminating, high-stakes assessment measure required by the state.

Institution/Program: **California State Polytechnic University - Pomona**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CalStateTEACH**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

CalStateTEACH is an alternative pathway to the multiple subject (elementary) teaching credential. Available to individuals residing and teaching in any geographic location in California, CalStateTEACH is designed to serve intern teachers hired in elementary school settings, or traditional student teachers working within a credentialed teacher's classroom.

The CalStateTEACH program is designed to serve those who want to earn a multiple subject credential but are unable to access campus programs due to personal circumstances, live beyond commuting distance to a university, or prefer the flexibility and style of an online learning environment. The program integrates the theory and practice of teaching with daily teaching experiences. A single curriculum is used statewide. The program is delivered through regional centers located at four California State University (CSU) campuses, in Fresno, Fullerton, Los Angeles, and Monterey Bay.

CalStateTEACH is a program of supported, independent learning in which teacher candidates work in small groups, guided by both CSU faculty and on-site school mentors. This form of instruction allows part-time, home-based study and uses a rich mix of print, internet, video, and web-based materials. There are no regular university classes to attend; however, five all-day Saturday seminars are required during the program. After successfully completing the program and passing State-required exams, candidates earn a California Preliminary Multiple Subject Teaching Credential and up to 40 semester units of post-baccalaureate credit.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

CalStateTEACH is a unique integrated program, not a collection of individual courses. It is configured to meet the developmental needs of teachers from their first days in the classroom through their growth into competent teachers who can work effectively with diverse populations. Its mission is to prepare highly skilled teachers who utilize critical thinking, creativity, and reflection to inform their professional decision-making. It is committed to fostering the ethical development of teachers and to ensuring that its graduates recognize the teacher as a moral force within the classroom.

Since the program has a strong application-based foundation, candidates are either teaching full-time in their own classrooms or completing field experiences and student teaching. Through field experiences, student teaching, or teaching in their own classrooms, candidates are quickly immersed in lesson planning, classroom management, assessment of students, and developing effective relationships with staff and parents. Candidates are introduced to critical knowledge and skills at the beginning of the program, which then builds on and extends those initial understandings throughout the entire program.

The faculty, both through on-site visits and extensive web-based discussion groups, foster a sense of group belonging, opportunities for substantive discussions and personal support. On-site teachers also mentor candidates providing another means of assistance and support.

Institution/Program: **CalStateTEACH**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

CalStateTEACH continues to pilot implementation of all four tasks of the California Teaching Performance Assessment (CalTPA). These four performance tasks provide formative assessment data to candidates for improving the quality of their teaching, as well as summative assessment data upon completion of the program. The tasks are scored "blindly" by faculty who have been certified and calibrated for the scoring protocol.

The tasks assess candidates' knowledge of content-specific and developmentally appropriate pedagogy (Task 1); their ability to connect learning about student characteristics to instructional planning (Task 2); their skills in designing standards-based, developmentally appropriate student assessment activities (Task 3); and their competence in designing a standards-based lesson, in which they demonstrate (via a video taped sample) appropriate use of class time and instructional resources, meeting the differing needs of individuals within the class, managing instruction and student interaction, assessing student learning, and analyzing the strengths and weaknesses of the lesson.

CAlStateTEACH also makes considerabvle use of the IRIS online modules on educating students with special needs.

CalStateTEACH is committed to changes that allow for easier access to the program website, storing all program study guides and handbooks online. On-screen text is interactive with hyperlinks and adjustable-size fonts, and candidates and faculty have the ability to highlight or "mark up" text. Additionally,

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Chapman University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Chapman University's programs in Education provide accessible, selected education credential and graduate degree programs of high quality to a variety of student populations through two distinctive academic units: (1) the School of Education (SOE) on the Orange campus and (2) the Education Division within University College (CUC), which includes its network of regional academic campuses. The deployment of traditional and alternative delivery models has enabled Chapman University to serve a great geographical portion of California and its diverse population. Operating under a common mission and philosophy, but defined differently according to the specific students and educational outcomes the units serve, the Chapman University- School of Education and the Chapman University College-Education Division prepare inquiring, reflective, ethical and productive educators who will work in public educational settings. We believe in progressive ideals and their importance in preparing students to be responsible members of a democracy. We encourage students to examine their roles as future educators not only through self-reflection, but also through the requirement for them to commit to socially responsible action. We expect our students to be change agents in the process of school improvement. We value not only the democratic access to knowledge, but also the critical examination of the social and political aspects of education. While we make an effort to learn from and make use of multiple theoretical paradigms; we believe it is most important to prepare educators to work with children and youth of diverse cultural backgrounds, economic levels, and value orientations, which are commonplace in contemporary America.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

There are a variety of factors that have contributed to the current level of success of our two Education academic units. One factor is smaller class size that promotes personalized learning. Another factor is the curricular emphasis on reading and language acquisition for all learners, which is indicative of the California Academic Content Standards and contemporary research regarding a balanced approach to literacy.

The two academic unit programs provide options for entry into Chapman education programs. The matriculation options consist of a traditional entry through the School of Education on the Orange campus and alternative entries and deliveries afforded by the academic campuses of Chapman University College-Education division. Both units maintain high standards of quality for the delivery of instruction, assessment, and learning outcomes. The talents, commitment, strong teaching background as well as the research productivity of the faculty constitute other important factors.

The School of Education on the Orange campus draws a significant number of students directly from its undergraduate programs. Chapman University College-Education Division is able to attract talented candidates who often are mature adult learners who are connected to their communities. In sum, the two distinct academic education units are well designed; faculty members are knowledgeable and effective, and credential candidates are capable and well prepared for classroom responsibilities.

Institution/Program: **Chapman University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The School of Education (SOE) on the Orange campus and the University College (CUC) Education Division have several shared and independent initiatives that ensure the quality and integrity of our programs. First, the university has implemented a plan for the state-required testing of all teachers using the California Teacher Performance Assessment (CA-TPA). Second, the university has updated and extended its internship agreements with several school districts and county offices across the state to provide candidates to districts in areas of teacher shortage. Third, the University is using the CTC Biennial Report format for all Education program assessment. And finally, the university completed its fifth year of participation in the CSU-Institute for Educational Reform's Teacher Education Survey. Chapman was one of nine private and independent colleges and universities that completed the survey whose purpose is to ascertain teacher preparation effectiveness in comparison to other private universities in California. The results of this survey have been beneficial in making changes to our teacher credential programs.

Chapman University CCTC liaison:
Dr. Ellen Curtis-Pierce

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Claremont Graduate University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of Claremont Graduate University (CGU) is to prepare a diverse group of outstanding individuals to assume leadership roles in the world-wide community through research, teaching and practice in selected fields. The CGU Teacher Education Internship Program asserts that the best social justice program a nation can offer its children is a great education. A free and just democratic nation must have a well-educated, personally responsible citizenry who are given every opportunity to fulfill their purpose in life, including raising healthy families that make up and contribute to the community. This opportunity begins in the home and ultimately includes the classroom, the workplace and larger society. To provide such an education, we need teachers deeply committed to academic excellence, equity, and integrity; who work diligently to develop the skills and attitudes necessary to teach every child as though they were teaching their own; who collaborate with the parents of their students, other educators and policy makers; and who use technology and other resources as a means to maximize achievement and opportunities. The integrity and character of great teachers prompts them to hold themselves accountable for doing the hard work it takes to make this vision a reality for all the students assigned to their classrooms. The 36 unit combined MA and Credential program prepares teachers to teach multiple or single subjects, in either general or special education settings, to culturally and linguistically diverse students. Over 50% of CGU intern teachers each year are from underrepresented groups and are multilingual. Over 90% of our graduates are still in schools after five years compared to the state average of 50%.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

CGU Teacher Education Internship Program maintained its long standing commitment to preparing a diverse teaching force educated to address issues of linguistic, cultural and economic diversity and its three major themes of excellence, equity and integrity. CGU has continued to focus on excellent preparation in subject matter content knowledge, which is necessary for accountability. This has significantly increased pass rates for required subject matter exams. Additionally, a focus on collaborative skills for all candidates increases teacher effectiveness in all areas.

The California Intern Grant funded an exciting program change last year that significantly enhanced the Pre-Teaching Experience candidates complete before they are intern eligible. By hiring and training our own CGU Master Teachers who work in local districts, we have increased the amount of critical support our candidates receive as they learn to teach.

Institution/Program: **Claremont Graduate University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Several exciting new initiatives are afloat. First, we have been working on a new Autism Certificate that will begin in the Summer 2009 Semester. This certificate will be available to local teachers as well as our current students. Grant funds are being sought to assist teachers in receiving the training. The certificate will be aligned to CTC requirements for an authorization in Autism.

Second, we have instituted "Helping Trio" activities into our Internship coursework so candidates can experience collaborative problem solving with other teachers as they think about specific struggling learners and seek new solutions to increase student performance. Our expectation is that candidates will graduate with the skill set and expectation to collaborate with other teachers around issues of student work. Research shows this is a critical practice in increasing student learning.

For Further Information Regarding the Teacher Preparation Program, visit the program website at:

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Concordia University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Concorida Unviersity School of Education strives to prepare professional educators who demonstrate knowledge of theory and practice by making informed decisons leading to expemplary instruction for all learners.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Concordia University with its rich heritage in teacher preparation is ideally positioned within the church, local community, and state to be a leader in teacher education. The School of Education serves a broad spectrum of future teachers. This population includes those intending to teach in California public schools as well as those students intending to serve in non-public settings.

The Program assures quality and propriety of the course content, quality of instruction, and continuity of the admission and advising process. This has lead to a program that supports students who need additional attention throughout credential courses and student teaching. All students successfully complete the TPA before finishing the program.

All credential faculty and student teaching supervisors have significant experience teaching in K-12 settings. Experience includes teaching and administration in 100% minority schools, urban and small town settings and public as well as Christian schools. To add to the knowledge brought to the students by the faculty, Concordia regularly invites teachers from local schools to serve as adjuncts or to make presentations which provide students with current links to school improvement and curriculum development.

Institution/Program: **Concordia University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Bakersfield**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the School of Education is "… to be a professional learning institution that prepares highly capable professionals to serve our culturally and linguistically diverse community with integrity." This mission was formally adopted during the 06/07 Academic Year in response to the desire of faculty to provide the highest quality education in the preparation of professional educators for our community. The School of Education is accredited by the National Council for the Accreditation of Teacher Education (NCATE) and the California Commission on Teacher Credentialing (CCTC). Faculty and candidates prescribe to a high level of professional leadership which involves collaboration, reflection, student centeredness, professional competence, and a high level of ethics. Our goal is to meet the needs of our students and be a leader in the preparation of teachers, counselors, and administrators in the greater Kern County Region.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

One of the strongest qualities of the School of Education is our value for high level faculty involvement in the teaching and learning process and the commitment to partnerships for excellence. Access to highly experienced staff in the area of credentialing, evaluating, and career placement is one of the program qualities that increases student success. Collaboration with our K-12 and business partners is a highlight in the School of Education with several new partnerships introduced during the 2006/07 Academic Year. Some of these partnerships include additional scholarships by friends of the School of Education, Foster Youth Tutoring Program for county youth, Teacher Recruitment partnerships, involvement in school improvement projects with local school districts, and the implementation of new math and science initiatives to increase the number of math and science teachers that serve our state. All programs within the School of Education participate in quarterly and annual assessments to utilize a cycle of inquiry to continually strive to improve our service and quality of instruction provided to our candidates.

Institution/Program: **CSU Bakersfield**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

New initiatives which enhance partnerships with stakeholders, as well as improve program excellence, include:

Project CALLI, a partnership with Delano Joint Union High School District, with a primary focus to promote academic and language development in linguistically diverse settings. CALLI stands for Content Academic Language Literacy Instruction.

Art Institute, a partnership with the School of Arts and Sciences was developed to provide opportunities for Kern County children to capitalize on their artistic intelligence to participate in a summer Art Institute.

Unitrak is a teacher recruitment initiative with Kern High School District to allow students participating in future teacher courses and programs within the district to receive university credit for early field experience activities.

Math Blended Program. A program blending the Bachelor of Arts degree in mathematics with the teacher credentialing program allows students a shorter time to degree and increases the number of math majors eligible to become teachers.

Foster Youth Tutoring Program. This initiative provides opportunities for teacher candidates to tutor local foster youth to provide early teaching experience and make our students eligible to receive scholarships

For Further Information Regarding the Teacher Preparation Program, visit the program website at: www.csub.edu/soe.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Channel Islands**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

CSUCI mission states "placing students at the center of the educational experience, California State University Channel Islands provides undergraduate and graduate education that facilitates learning within and across disciplines through integrative approaches, emphasizes experiential and service learning, and graduates students with multicultural and international perspectives."

CSU Channel Islands, the newest CSU campus prepares educators for careers in early childhood, elementary, secondary and special education teaching and administration. All areas of study within the Education Program at California State University Channel Islands are united in a single goal: to prepare future educators and educational leaders to be responsive leaders. Our shared purpose is to ensure that all of our graduates are well-prepared to succeed by helping them to establish strong foundational knowledge, skills, and dispositional beliefs. To achieve this goal, Education faculty share the privileges and responsibilities of cultivating the attributes of an educator within each learner in our care. It is in each graduate's knowledge, ability to make connections, and professional beliefs and performance that our success will be measured.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The School of Education Programs build from the foundation of undergraduate majors (Early Childhood Studies, Liberal Studies, Mathematics, English, History/Social Science, and Sciences). Our Education Programs contribute to the teaching profession by producing teachers who believe that all students have the ability to achieve high standards, who adapt their teaching to reach all students, and who respect the diversity of all students. Our graduates are reflective about their teaching, their attitudes and their ability to work in collaborative analytical teams. All of the programs emphasize the preparation of teachers for the diversity of languages and cultures often encountered in California's public school classrooms. They prepare candidates to address the needs of students who speak English as a native language and/or as a second language. Emphasis is placed on the K-12 student as actively engaged in his/her learning.

All credential programs that we offer have been approved by the California Commission on Teacher Credentialing. The university offers intern programs that are collaborative efforts among the local school districts, Ventura County Beginning Teacher Support and the university. All programs emphasize strong connections between theory and practice. Students teach during each semester of the credential program.

Institution/Program: **CSU Channel Islands**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

During the 2008-2009 academic year, CSU Channel Islands implemented the Performance Assessment for California Teachers (PACT) process with Single Subject and Multiple Subject credential candidates. Using this standardized teacher performance assessment system, candidates demonstrate their ability to plan and implement lessons and units, engage learners, and reflect on their practice.

We began a new initiative for credential candidates who are interns. In California this means that they are hired by a school district as a beginning teacher prior to completing a credential program. The new initiative involves having a university supervisor who observes the candidate, mentors, and coaches them, but does not evaluate their teaching. This model has been particularly successful with candidates who are beginning teaching with little or no credential course work.

Applicants can now apply to the CSUCI teacher credential programs on-line using a new process developed by the Credential Office.

Each credential program developed and implemented plans for enhancing the technology skills of candidates.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Chico**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The foundational belief guiding the programs of the CSU, Chico School of Education is that all individuals in a democratic society have a right to learn and should be prepared by schools for productive lives and civic participation. Educators who complete their professional preparation through the CSU, Chico School of Education are called to imaginative citizenship and effective service to all students, their families and communities to improve the quality of life through education. These educators are informed decision-makers who can work collaboratively to apply the best research-based practices in their fields to enhance and support the learning, growth and welfare of their students. The professional education programs at CSU, Chico inspire their candidates to accept the challenges to remain reflective practitioners, serve as agents of change, exercise responsible leadership, model lifelong learning, and contribute to our democratic society. Our programs prepare candidates for:

Effective Practice: to provide meaningful educational experiences to promote achievement of learning objectives for all learners, based on knowledge of content, learners, and pedagogy and informed by appropriate assessment and analysis.

Reflective Practice: to continuously reflect on and improve their own professional practice, based on information gleaned from data analysis, experts, peers and research.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

A varied palette of options assures that all students find a professional preparation program to meet personal needs, experiences, and interests. Alternatives include full- and part-time scheduling, cohorts, internships, online coursework, local and rural distant placements, special preparation to work with all children including those who are linguistically and culturally diverse (Bilingual emphasis program), concurrent special education, and post baccalaureate and blended undergraduate programs. Course content is designed to meet both NCATE and California standards, including the California Teaching Performance Expectations (TPEs) and prepares candidates to know and be able to teach in accordance with state and local academic content standards. All candidates must complete rigorous culminating assessments prior to being recommended for credentials. Faculty in the School of Education represent the highest levels of professional expertise and pedagogical knowledge. Distinguished Teachers-in-Residence share best classroom practices and current experience.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

This year we are implementing the California state-mandated teaching performance assessment. We have selected to use the Performance Assessment for California Teachers(PACT), which is comprised of multiple tasks that require teacher candidates to demonstrate the proficiencies delineated in California's Teaching Performance Expectations (TPEs) in a classroom setting. These proficiencies include understanding students and the school context; effective planning of instruction and assessment; adaptation of instruction and assessment for students with special needs, including English learners; use of assessments to monitor student learning and inform instruction; and reflection on professional practice. In addition to a written narrative, the Teaching Event that the candidates submit includes student work samples and video clips of the candidate working with students in the classroom. The need to support candidates in the successful completion of this high-stakes assessment has already led to curricular improvements in our programs. The requirement for the Teaching Events to be evaluated by scorers who are qualified in the appropriate content areas (e.g., elementary literacy, secondary math, etc.) has led to stronger collaborations between education and arts and sciences faculty and K-12 teachers and administrators.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Dominguez Hills**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the College of Education's Teacher Preparation Programs is to prepare teachers to work successfully with culturally and linguistically diverse learners in urban environments. California State University, Dominguez Hills is the most diverse university west of the Mississippi with no cultural or ethnic group being in the majority. Our teacher candidates and graduates reflect this diversity. CSUDH leads the state in credentialing African-American teachers.

Historically, the region served by CSUDH has had great difficulty recruiting and retaining teachers. In our service area, socioeconomic levels are low, the percentage of limited-English proficient (LEP) populations is high, and the ethnic diversity is the most extensive in Los Angeles County. Our program graduates teach primarily in Chapter I, Urban Impact, and multilingual schools.

In California, teacher candidates must pass multiple measures of assessment to be recommended for credentialing. For example, the Reading Instruction Competency Assessment (RICA), used to rank Californian teacher preparation programs, is only one assessment among many and is required only of multiple subject and education specialist candidates except for the Early Childhood Special Education Program.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The College of Education developed an integrated option for the preparation of special education candidates following the model of the award-winning Blended Program, recipient of the American Association of Colleges for Teacher Education (AACTE) Best Practice Award in 1999 for collaboration between teacher education and liberal arts faculty.

The College of Education is accredited by both NCATE (National Council For Accreditation of Teacher Education) and CCTC (California Commission On Teacher Credentialing). As both accreditors have moved toward solid measures of accountability, the College of Education has looked carefully at its teacher preparation processes, and, as a result of these formal evaluative processes, has accomplished the following: 1) has designed expanded evaluation processes to begin to look at achievement results of students in schools of those prepared in COE programs; 2) has prepared all faculty to infuse technology and differentiation of instruction in all teacher preparation coursework; and, 3) has developed blended (teacher preparation/liberal studies) programs in general and special education.

Institution/Program: **CSU Dominguez Hills**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The Teacher Education Division faculty in the Multiple and Single Subject Programs piloted the Performance Assessment for California Teachers (PACT). The PACT is based on the California Teacher Performance Expectations, and consists of quantitative and qualitative assessment protocols of the PACT Teaching Event (field experience, a videotape of classroom lessons, and reflections on the videotape) that are supported by reliability and validity studies.

The Special Education faculty reorganized the curriculum for two key areas of credentialing, Moderate/Severe Disabilities and Early Childhood Special Education. Key elements included:
•Modifying an assessment class to incorporate theory and methods related to both moderate/severe and early childhood disabilities.
•Adding the Family Systems course (SPE 552) to the moderate/severe program as the student learning outcomes of this class are particularly relevant to teachers working with this population.
•Adding a reading methods course (TED 403) to the ECSE program. Knowledge of emerging literacy skills is critical for ECSE teachers. Additionally, this course includes competencies needed for the English Language Authorization.

In addition all Special Education Programs received the English Learner Authorization.

Institution/Program: **CSU Dominguez Hills**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU East Bay**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The College of Education and Allied Studies' mission is "to prepare collaborative leaders, committed to professional excellence, social justice and democracy, who will influence a diverse and interconnected world." The Department of Teacher Education's mission is "to prepare teachers who are dedicated to the academic achievement of all students, and who demonstrate a commitment of life-long, professional growth and school leadership." These two mission statements, in turn, are closely aligned with the university's mission: "Provide an academically-rich, multicultural learning experience that prepares all of its students to realize their goals, pursue meaningful lifework, and to be socially responsible contributors to their communities, locally and globally."

The teacher preparation programs at CSU East Bay seek to produce graduates who value collaboration, recognize the importance of assuming leadership roles, and are committed to social justice and democracy. These programs have developed a well-deserved reputation for innovation. CSU East Bay was one of the first IHEs in California to offer entire programs at remote sites and developed university-district partnerships. Teacher preparation programs serve one of the most diverse regions in the United States and CSU East Bay currently has partnership programs with the two school districts in our service area with the two with the highest number of non-credentialed teachers, Oakland Unified and West Contra Costa Unified.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Multiple Subject, Single Subject and Education Specialist programs were accredited by both NCATE and CCTC following a Spring, 2002 joint visit. Program qualities that contribute to the effectiveness of the Multiple Subject and Single Subject Credential programs include: (1) a cohort system, with ongoing mentoring by a faculty team leader, (2) a full-year of required field experience, as either a student teacher or intern, corresponding to the K-12 calendar, (3) partnership programs with two urban school districts, and (4) entire programs offered at three remote sites.

New Initiatives: CSU East Bay continues to build the Bachelor's Program Early Pathway (BPEP) for credential candidates in a blended program format. In addition, a variety of program formats are available for both single subject and multiple subject credential candidates including a fully online cohort, another hybrid format with two face-to-face Saturday meetings each quarter, as well as two cohorts that are offered in a face-to-face format located entirely at K-12 school sites.

Qualities that contribute to the effectiveness of the Education Specialist Credential program include: (1) a high-level of practitioner input in the design, implementation, and evaluation of the program, (2) on site competency-based support with portfolio assessment, and (3) participation of federal grants for student recruitment, support, and mentoring.

Institution/Program: **CSU East Bay**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

For the Multiple Subject and Single Subject Credential Programs, an updated field experience summarive evaluation form, based on the California's Teacher Performance Expectations (TPEs) was used. Student Teaching supervisors were trained to use the instrument. For both programs, criteria and expectations for required field experience with English Learners were developed.

A new assessment based the California Teacher Performace Assessment (CalTPA) was developed and will be offered for the first time. All faculty including TPA assessors were trained on the instructions. For more information go to: http://edschool.csueastbay.edu/departments/ted/taskstream/caltpa.html

The Education Specialist internship program continues its partnership with 11 school districts in our service area and is trying to expand to more districts. For more information on our Special Education programs go to:
http://edschool.csueastbay.edu/departments/epsy/index.html

For Further Information Regarding the Teacher Preparation Program, visit the program website at:
edschool.csueastbay.edu/departments/ted/index.html

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Fresno**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Kremen School of Education and Human Development (KSOEHD) at CSU Fresno is the primary unit responsible for all teacher preparation programs.
Vision: The KSOEHD is a center for academic excellence and collaboration in the fields of education and counseling. Graduates will be community leaders who advocate for high standards and democratic values with attention to professional ethics and diversity.
Mission: The KSOEHD's mission is the recruitment and development of ethically informed leaders for classroom teaching, education administration, counseling, and higher education. Our mission is realized through a framework of teaching, scholarship, and service that addresses regional, state, national, and international perspectives.
Students: The University has primary responsibility for serving: Fresno, Kings, Tulare, Madera, and Mariposa Counties. Within this region is a K-12 population of 348,186 that includes: American Indian-1%, Asian-6.8%, Pacific Islander-.2%, Filipino-.9%, Hispanic-60%, African-American-4.9%, and White Not Hispanic- 24.2%.
Teaching Population: Credentialed teachers for the four county region totaled 17,615. Teacher ethnicity is as follows: American Indian- .8%, Asian- 3.4%, Pacific Islander- .1%, Filipino- .6%, Hispanic- 19.8%, African-American- 1.6%, White Not-Hispanic- 73.2%. Program Enrollment: Students enrolled in Teacher Education programs totaled 3485. Student ethnicity by percentages includes: American Indian- .9%, Asian- 11%, Hispanic- 33.4%, African-American- 2.2%, and White Not Hispanic- 39.4%, and other (unknown)- 12.7%.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The KSOEHD offers a variety of exemplary programs that lead to a teaching credential. These programs contain sequenced experiences that enable enrollees to both acquire knowledge and develop skills through lecture, laboratory, and field-based classes. Examples include: the Liberal Studies Blended Program that leads to a BA degree and a Multiple Subject Credential in eight semesters; Internship Programs for Multiple Subject, Single Subject, and Special Education teachers; and CalStateTEACH, a preparation program with on-line coursework and face-to-face field supervision.

Program delivery includes field-based cohorts in: Reading, Educational Administration; CPET-Central Valley Partnerships for Exemplary Teachers; and an Education Early Childhood Emphasis. Some coursework is also available via interactive audio/video at remote sites throughout the region. The Annual Character and Civic Education Conference, the Central Valley Educational Leadership Institute Conferences, and Caesar Chavez Conference are a few examples of special conferences that enrich a students' professional preparation.

Faculty promote professional development for the region's teachers through implementing state curriculum projects such as: the San Joaquin Valley Mathematics Project, Reading & Literacy, & Writing Projects; and the Central Valley Science Project.

The KSOEHD houses the Central Valley Educational Leadership Institute as an Ancillary Unit of the

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The Fresno Assessment of Student Teachers (FAST) was approved by the CCTC. The development of FAST is featured in an upcoming article in Issues in Teacher Education. Data collected to date demonstrates that our candidates have a positive effect on K-12 student learning.

Multiple and Single Subject programs developed the Improvement and Accountability Plan (IAP) to address areas of improvement. The target areas are: English Learner teaching strategies, At-Risk student resources, teaching strategies for students with special needs, and reading in the content areas (Social Studies).

The Special Education Program in partnership with Fresno Unified School District implemented the Summer Achievement Center, which assists in preparing teachers of students with emotional/behavioral disorders and autism through courses and summer teaching.

The Mathematics and Science Teaching Initiative focuses on increasing the numbers of highly qualified math and science teachers. As a result, the numbers of math and science credentials recommended have been steadily increasing : 2006-07:25, 2007-08:47, 2008-09:61.

Institution/Program: **CSU Fresno**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Fullerton**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Cal State Fullerton, a top-ranked public university by U.S. News and World Report, is a comprehensive urban campus of 35,000 students. CSUF is nationally ranked fourth in degrees granted to minority students and is designated as a Hispanic Serving Institution. The university offers 105 undergraduate and graduate programs, 33 education credential programs, and Ed.D. programs for K-12 administrators and for community college leaders.

The mission of the College of Education is to prepare professionals who improve student learning, who make informed decisions, and who become change agents in their workplaces. Several program options are offered to meet candidate needs and interests. The college offers programs at the CSUF satellite campus in Irvine and at numerous school district sites, as well as on the main campus, to ensure easy access throughout the region. Many classes and several programs are offered online. The Center for Careers in Teaching offers academic advisement and support for future teachers who are CSUF undergraduates or who are attending a partner community college and plan to transfer to CSUF. In addition, internship programs are offered for candidates who are already working or about to be working in the field as educators at a public school.

CSUF offers the only NCATE accredited teacher preparation program in Orange County. The University has been accredited by NCATE since 1970 and was reaccredited most recently in 2007 with all standards met.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Particular strengths of Cal State Fullerton that were noted during the 2007 joint accreditation visit include the following: abundant educational technology resources and strong use of technology in classes; excellent student advice and assistance; many longstanding and deep relationships with K-12 partners; outstanding faculty with strong p-12 experience; and extraordinary accessibility and responsiveness to candidates, master teachers, and administrators.

A distinctive feature of the multiple subjects credential program and several master's degree programs is use of a cohort structure, in which a cadre of faculty work together to support a group of teacher candidates throughout their program. This model ensures a cohesive, coordinated curriculum and assists candidates to progress through the program to meet institution and state standards.

A structured sequence of fieldwork experiences in a variety of classroom settings allows candidates to move from observing, to participating with small groups and individual students, to a full student teaching experience when they assume responsibility for all aspects of the classroom and instruction. Supervisors make frequent on-site visits to monitor and support candidate progress.

Institution/Program: **CSU Fullerton**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Cal State Fullerton has committed to boosting the number of science and mathematics teachers in secondary schools as a part of the newly established Science and Mathematics Teacher Imperative (SMTI) sponsored by NASULGC, a public university association. CSUF is one of 27 institutions – and the only CSU campus - selected by NASULGC to participate in the SMTI Leadership Collaborative. Several new projects expand our science, technology, engineering and math (STEM) teacher preparation efforts. Project GPS2--Guiding and Preparing STEM Students-–is a collaboration with community colleges to promote science and math teaching among transfer students. The Boeing-supported Promoting Resources for Informal Science Education offers summer internships at local science museums and centers to undergraduates in the science teacher pipeline.

The Center for Creativity and Critical Thinking in Schools was established in 2008 to promote educational approaches focused on 21st century competencies related to creativity, critical thinking, and decision-making. It provides in-service teacher development in schools as well as for credential candidates, infusing the arts, science and technology into the core curriculum. Initial projects include a Visual Arts Institute and an arts-intensive cohort in the multiple subjects credential program.

The college continues to expand initiatives in educational technology. Interactive whiteboards have been installed in 10 college classrooms. Digital cameras, digital streaming media, and Web 2.0 teaching and learning tools are integrated into learning experiences for teacher candidates. Technology-intensive cohorts, using a 1:1 laptop model, have been piloted and plans are in place for expansion.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Long Beach**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University, Long Beach (CSULB) is an urban, comprehensive university with over 37,000 students. Its student body, faculty, and staff reflect the rich diversity of the surrounding communities. The College of Education (CED) offers three initial teacher preparation programs (elementary, secondary, special education) and 15 advanced degree and certificate programs, including an education doctorate in leadership. The College mission is to foster a learning and teaching community that promotes intellectual, personal and interpersonal growth, prepares socially responsible leaders for a rapidly changing, technologically rich world, values diversity, serves and collaborates with other educators and the community, and engages in research, scholarly activity and ongoing evaluation. The College believes that teacher candidates should have opportunities to gain a rich knowledge of their teaching subjects, develop a set of pedagogical skills and strategies to deliver content to all students, and have multiple venues to practice their teaching through structured field work.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

During the 2007-2008 academic year, the Urban Teaching Academy (UTA) continued at elementary sites in the local community. The UTA model is one in which pre- and in-service teacher preparation is delivered on-site at local elementary schools. More than 125 candidates are located at a total of 7 UTA sites in local school district. The UTEACH program began recruitment efforts for a cohort to be initiated at an eighth site in Fall 2008 at Cleveland Elementary School in Long Beach Unified School District.

The Single Subject Credential Program (secondary education) received an internship grant from the California Commission on Teacher Credentialing (CTC). The program currently has 27 students enrolled in this grant. Funds are used to help support the intern, the intern's mentor teacher, and a series of support workshops for the intern including an intern "coach" who runs a 6-hour boot camp at the start of the semester and monthly seminars for the interns. Additionally, the intern "coach" visits each intern at his/her site to provide support as needed.

Institution/Program: **CSU Long Beach**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The Teacher Education Assessment & Program Evaluation Committee reviewed multiple sources of candidate and program effectiveness data, discussed the data and identified changes to be made to the elementary Social Studies Subject-Specific Methods course. Additional scenarios were added to assist in identifying ways to differentiate instruction for children with special learning needs, and classroom management strategies were highlighted in the journal prompts.

Through review of the last several system-wide evaluations of teacher preparation programs, the Single Subject Credential Program (secondary education) faculty decided that we needed to improve our candidates' ability to meet the instructional needs of English Language Learners. Program faculty collaborated with Long Beach Unified School District and the campus-based Center for Language Minority Education and Research on a five-year, $1.5m Title II grant. The Secondary Teacher Education for English Learner Integration grant is a professional development project for teacher educators and candidates. The primary goal of the project is to improve program faculty and candidate understanding of the academic needs of English Learners and their ability to model and implement instruction that supports English Learners' acquisition of language, literacy, and content. Now in year two, 24 faculty have participated in a professional development program on teaching content to English Learners. Preliminary results show faculty have increased knowledge of needs of English Learners and feel more confident preparing candidates to teach content to English Learners. Each faculty participant has revised syllabi to align with the California Teachers of English Learners standards.

Institution/Program: **CSU Long Beach**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Los Angeles**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The CSULA Charter College of Education's mission is to develop in students the professional knowledge, skills, and dispositions to promote the academic, social, and psychological development of diverse learners in urban schools and related agencies. Charter College of Education (CCOE) graduates become teachers, special educators, school administrators, educational technologists, researchers, program evaluators, school psychologists, counselors, rehabilitation professionals, higher education faculty, and other educational specialists. Within an environment of shared governance, CCOE professional preparation programs utilize data-driven decision-making, technology-integrated instruction, meaningful curricula, and outcome-based assessments to ensure high-quality educational opportunities for all CCOE students.

Guided by this mission, CCOE faculty and staff continue to enhance and develop all CCOE programs. This year 1445 credentials were recommended and 418 student received master's degrees.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The faculty and administration continue to refine and develop an integrated assessment system that provides the opportunity for all segments of the College to engage in data driven decision making. An electronic management system is in place and includes a website that provides a portal to all of the College's accreditation activities and documents.

The CCOE continues to build and maintain strong partnerships with pre K-12 schools and agencies in its service area for the purpose of preparing highly qualified urban educators. Multiple surveys continued to be administered to assess programs including current student surveys, follow-up surveys of employers and graduates, and the CSU System-wide Evaluation of Teacher Preparation Programs.

The areas that could use improvement are related to our candidates' ability and skills to work with English Language Learners and students with disabilities. As a result faculty have continued to work collaboratively across areas of specialty to improve on these areas. For example, work groups have been created to bring together Special Education and English Language Learning faculty to work together to create professional development opportunities for all faculty who teach credential courses.

The College also continues to improved upon the aggregation of performance based assessment for the signature assignments at the initial, middle and end points of the credential program. These data provide us with

Institution/Program: **CSU Los Angeles**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

As part of the Charter College of Education's new strategic plan the College will enhance the process of assessment for program improvement, expand recruitment, retention, development and graduation of students, support retention and development of faculty and staff, as well as improve curriculum development.

In the 2008-2009 academic year the CCOE implemented the California Teacher Performance Assessment (TPA). A faculty TPA coordinator was appointed, faculty were trained to in the assessment of the TPA, and software programs were enhanced to accommodate the distribution, collection, and assessment of the TPA. Student enrolling in the Multiple and Single Subject credential programs after July 1, 2008 were are required to successfully complete the TPA.

Currently the Special Education faculty are working on the new Education Specialist credential program, in response to the new CTC standards. Additionally, the CCOE has moved forward with the launch of the new independent doctoral program, set for Fall 2009. The curriculum has received university approval and is in the final stages of WASC accreditation. The CCOE also enrolls 1,053 students in various MA/MS degree and doctoral programs. CSULA will continue to offer the joint doctorate, a Ph.D. in Special Education, with UCLA.

Institution/Program: **CSU Los Angeles**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Monterey Bay**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Department of Teacher Education Mission:
The Department of Teacher Education prepares caring and responsive educators with the knowledge, skills, and dispositions to effectively facilitate the learning of all students from diverse ethnic, linguistic, and ability groups, so that they can fully participate in a dynamic society and world.

CSUMB offers ELA/BCLAD/CTEL conventional and internship programs leading to the Multiple Subject, Single Subject, and Education Specialist Preliminary Credentials. Upon completion each preliminary (Level 1) credential in special education, Multiple Subject and Single Subject teachers are eligible for the clear (or Level II) credential. The three programs are designed for individuals who are interested in teaching in linguistically and culturally diverse elementary schools with large populations of English Language Learners. Our programs welcome teacher candidates who have the language and cultural experience or background to meet the needs of California's increasingly diverse student population.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The characteristics of CSUMB's teacher credential programs that contributed to -and continue to contribute to-- its effectiveness include the following:
(1) Field-Intensive Design: Teacher candidates are placed in public schools with substantial populations of English Language Learners from the first week of program enrollment through the conclusion of the final week of solo teaching experiences that occur near the end of the curriculum.
(2) Integration of Theory and Practice: All of our courses integrate theory with actual practice in the classroom through assignments and activities that are based on field placement setting experiences.
(3) Co-hort Based Model: Candidates enter and progress through our program in cohorts, whose members share classroom and field experiences as well as provide mutual support and encouragement.
(4) Outcomes-Based Curriculum: At the conclusion of their program, teacher candidates present a portfolio of professional products and reflections (based on CSTPs and TPEs) that demonstrates the attainment of teacher education learning outcomes that under gird the curriculum of the programs.

Institution/Program: **CSU Monterey Bay**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

(1) To ensure our teacher candidates' preparation to teach special needs students in the general education classroom, we are reviewing our school site placements and discussing with principals mechanisms that ensure all teacher candidate placements include students with special learning needs. Beginning fall 2007, all candidates in the Multiple and Single Subject programs were required to complete a course in special education inclusionary practices.
(2)By fall 2007, teacher candidates were required to demonstrate competencies in in educational technology. We are currently analyzing how the use of technology for teaching is being addressed in each of our methods courses and applied in school site placements.
(3) We are reviewing the effectiveness of our new advising approach, implemented to provide a personal, comprehensive, and valuable overall academic experience for our credential candidates. Candidates now have a consistent faculty advisor with whom they can discuss programmatic and personal concerns, and receive coordinated, consistent, and accurate information about course, program, and state requirements.
(4) Our faculty are in training in and participating in a program in order to implement a comprehensive unit-based assessment system. This consists of embedded signature assignments and expectations in teaching events, which together measure candidate performance.

These initiatives will improve our program effectiveness and also address NCATE/CCTC recommendations for 2006-08.

Institution/Program: **CSU Monterey Bay**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Northridge**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Core to the College mission is the belief that all students have the capacity for success and that it is our role to prepare educators who can support all types of learners. In this spirit, we have developed multiple pathways to meet the diverse needs of college of education students seeking to become teachers. The college has extensive partnerships with community schools and agencies to provide meaningful student teaching experiences supervised by faculty in the departments of Elementary Education, Secondary Education, and Special Education. The College prepares educators to serve the complex educational needs of the region and it enjoys the distinction of being one of the top preparers of teachers in California. Our graduates are well-educated, lifelong learners who are prepared to practice in an ever-changing, multicultural, diverse society. The faculty is committed to excellence in teaching, scholarship and service. The University meets high standards established by its accrediting agencies: California Commission on Teacher Credentialing, Western Association of Schools and Colleges, National Council for Accreditation of Teacher Education, and other discipline-based accreditation boards. The university strongly supports the teacher preparation program by providing extensive resources in support of research and program assessment efforts to determine the effectiveness of our programs.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Multiple pathways to the credential, extensive education program options, curricular innovation, and program assessment are trademarks of CSUN. All programs reflect a strong knowledge of K-12 schools and the individual needs of candidates. The Accelerated Collaborative Teacher Education Program is a post-baccalaureate program developed in partnership with Los Angeles Unified School District for elementary, secondary, and special education candidates. Intern programs, developed collaboratively with several districts, address the needs of candidates who are responsible for their own classrooms. Students may concurrently earn a baccalaureate and teaching credential through our undergraduate multiple subjects, single subject, and special education blended programs. Some programs are cohorted and team taught, introducing candidates to a support network of professionals comprising a learning community of education faculty, arts and science faculty, and school personnel. Faculty nurture candidate success and are supported in their mission by a trained group of exemplary school personnel who assist as mentors and instructors. Faculty and supervisors remain updated by attending professional meetings focusing on strategies for student-centered learning, technology-based instruction, and effective pedagogy. Research and development grants help in developing a quality program assessment system as well as research agenda that examines the impact of various aspects of our teacher preparation process. Faculty promote best practice in the schools based on current research. Our diverse student body is assisted by state-of-the-art computer labs, test preparation sessions, and on-going advisement.

Institution/Program: **CSU Northridge**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

All programs have successfully responded to the California Commission on Teacher Credentialing feedback on their January 2008 submission of program documents for evaluation. These documents represent the beginning of a dialogue between a panel of experts and program faculty regarding the design and delivery of programs. This dialogue constitutes the Program Assessment phase of the revised accreditation system and precedes the site visit that is scheduled for fall 2009. The Deaf and Hard of Hearing specialization within the Special Education Department successfully completed an accreditation site visit in spring 2008 from the Council on Education of the Deaf. Multiple and Single Subject Credential faculty incorporated the Performance Assessment for California Teachers (PACT) into their respective programs. Candidates now upload their videotaped lessons on TaskStream and faculty have been calibrated to score the PACT the Teaching Event. The Assessment Coordinator obtained an Earmark grant to complete our program assessment system which includes an electronic data management system.Assessment reports are generated for departments to review and analyze on a regular basis. Refinements continue to be made on the assessment system and data warehouse, such as the refinement of existing instruments and creation of new data reports. Currently all programs are writing reports in preparation for the November accreditation visit.

Institution/Program: **CSU Northridge**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Sacramento**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University, Sacramento's College of Education collaborates as an active partner with the Sacramento community, regional county offices of education, our public school colleagues, faculty in the disciplines, and our candidates to develop high quality, meaningful and stimulating learning environments for children in our region. We actively embrace the diversity of the community we serve, building on its strengths while addressing its needs. We use interdisciplinary traditions to seek effective solutions in an environment of constant educational renewal.

California's Sacramento region encompasses the advantages and challenges of myriad community contexts – rural areas, growing and shrinking suburban areas, and an urban center. Moreover, our region's linguistic, ethnic and cultural diversity provide our schools with rich funds of knowledge from which to develop engaging, relevant programs and services. Within these complex and dynamic contexts, our teacher educators face the following challenges: (1) increasing the numbers of teachers well prepared to address the needs of low income, culturally, ethnically, and linguistically diverse students in urban and rural areas; (2) increasing the numbers of new teachers in high needs areas of science, mathematics, bilingual education and special education; and (3) ensuring that fieldwork and mentoring give new teachers the confidence and competence in "best practices" pedagogy for all students.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Substantial public school experience in various settings is a hallmark of our programs. Public school experience is integrated tightly with methods coursework so that candidates experience a seamless theory-practice-theory dynamic. Candidates are clustered in 25-person cohorts to keep learning communities small and constant. Cohorts often operate on public school sites where coursework includes frequent integration of site resources and opportunities to interact and apply new learning to classroom settings. The 10 professional development schools, part of the Equity Network, also strengthen these ties. At PDSs, candidates, site teachers and university faculty collaborate on inquiry-based activities focused on effective schooling for low income, culturally and linguistically diverse students. Some of these collaborative projects involve enriched science and arts curriculum, through the implementation of small group, inquiry-based activities designed by teachers and faculty and taught by candidates. Faculty members organized the annual Arts Resource Faire and Multicultural Education Conference, open to candidates and local educators. Significant professional development in science education was offered this year. This professional development is externally funded (Improving Teacher Quality program) and in 2007-08 culminated in a national conference on Lesson Study in Science and Social Studies. A federal Teaching American History grant provides professional development for teachers as well as for university faculty in education and the relevant disciplines. Finally, we are consolidating heretofore disparate math and science teacher recruitment efforts into a more streamlined process.

Institution/Program: **CSU Sacramento**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

All three departments offering certification for teachers continued with steps towards full implementation of the state mandated performance standards-based assessment of candidate competence. This includes providing support to a team of 30 faculty members to serve as Trainers for preparing approximately 60 other faculty to score this performance assessment. It also includes on-going curriculum alignment efforts in the multiple subject, single subject and education specialist programs to support candidate development of the knowledge and skills evaluated in the assessment.

In Fall 2008 our campus admitted its second cohort in pursuit of an independent Doctor of Education degree, housed in our College and jointly developed by the Educational Leadership and Policy Studies and the Public Policy Departments.

With support from an NSF/Noyce Scholars grant and the Chancellor's Office Math/Science Teacher Initiative, we are initiating processes for early identification of and support to future Math and Science Teachers. Both of these programs provide resources to establish a community of learners (majors, credential candidates, lead teachers, university faculty) focused on high quality math and science teaching. These resources also allow for new professional development opportunities, including supporting faculty and student groups to attend relevant professional conferences and to collaborate with expert teachers in the field on curriculum enhancement efforts.

Institution/Program: **CSU Sacramento**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU San Bernardino**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University San Bernardino, part of the California State University System, is a comprehensive public institution located 70 miles east of Los Angeles. CSUSB is an Hispanic Serving Institution and strives to have its university community represent the demographics of its region which encompasses 27,000 square miles. Nearly 15,000 CSUSB students are enrolled in bachelor's and master's degree programs in the Colleges of Arts and Letters, Business and Public Administration, Social and Behavioral Sciences, Education, and Natural Sciences. The College of Education offers post-baccalaureate credentials and master's degrees, as well as a new education doctoral program in educational leadership which began September 2007. State-accredited by California's Commission on Teacher Credentialing and nationally accredited by the National Council for Accreditation of Teacher Education, the College of Education is dedicated to the development and support of wise, reflective professional educators who will work toward a just and diverse society which embraces democratic principles. The wise teacher possesses rich subject matter knowledge, applies sound judgment to professional practice and conduct, applies a practical knowledge of context and culture, respects multiple viewpoints, and reflects and acts on professional practices and their consequences (adapted from Baltes & Smith, 1990). Teacher education credential candidates include fifth year student teachers, employed interns, and a small number of undergraduates. Many candidates are first generation college students.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

CSUSB programs prepare elementary and secondary teachers to teach English Learners within the regular classroom and utilize a performance assessment that emphasizes differentiated instruction. Special education candidates also meet state standards in mild/moderate, moderate/severe, or early childhood areas and all these programs also include emphasis on teaching of English Learners. Faculty work closely with schools and most have substantial school experience. Adjunct faculty members are active in public schools and/or recently retired. All credential applicants must have an overall G.P.A. of 2.67 or a GPA of 2.75 for their last 90 quarter units and must maintain a 3.0 GPA. Students must take the CBEST and must have either passed the appropriate subject matter exams or have successfully completed a state-approved subject matter course sequence prior to entrance. Candidates complete coursework and field experiences that simultaneously engage them in hands on experiences within public schools while immersed in the study of teaching and learning. Programs are designed to increase field site responsibilities as candidates gain more knowledge and skill while supported by site teachers and university supervisors. Through a consortium, the College works to provide a seamless transition for employed students through intern and induction programs. Collaboration with more than 50 school districts has resulted in enhanced support for these part-time students, thereby addressing a major component of CSUSB's mission. The Liberal Studies Integrated Track allows candidates to merge their credential and degree requirements, thus completing both the bachelor's degree and credential in four years and a summer.

Institution/Program: **CSU San Bernardino**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Several new initiatives are underway in CSUSB's College of Education. The Teacher Performance Assessment was formally adopted as an assessment for programs preparing elementary and secondary teachers, as required by California law. The College's assessment system was revised to align with the state's new accreditation system which includes a biennial report process for all credential programs. The College's Office of Assessment and Research evolved to include analysis of clinical practice candidate performance, the results of which contribute to program improvement. WASC accredited the new Ed.D. degree program in Educational Leadership. The next accreditation visit for the Ed.D. will be in 2012. The College developed an "Improvement and accountability" plan at the request of the CSU system that targets improvement in areas identified through the CSU System-wide Evaluation of Teacher Preparation Programs conducted by the The Center for Teacher Quality.

Institution/Program: **CSU San Bernardino**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU San Marcos**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University San Marcos (CSUSM) accepted its first students in 1990, and from its inception has demonstrated a strong commitment to teacher education. The university devotes a higher proportion of its base budget to teacher education than any other college on the campus. The College of Education was established in 1990 with teacher education as its primary focus. The mission of the College of Education is to collaboratively transform public education by preparing thoughtful educators and advancing professional practice. We offer programs to prepare teachers for elementary schools, middle schools, high schools, and special education. We offer only professional education programs through the college, using a variety of delivery modes that allow candidates to engage in full-time study, part-time study, and teaching internships. Programs are geared to meet the needs of area school districts and to maximize accessibility for candidates from varying life circumstances. Our goal is to ensure a fully qualified teacher in every classroom in our service region, and we are adaptable to emerging needs that result from policy decisions such as the No Child Left Behind Act. In addition to preparing new teachers, we collaborate with area school districts in many areas related to continuous school improvement, including beginning teacher support and induction, experienced teacher professional development, and preparation of school administrators. The resources of the College of Education are wholly devoted to professional education and school improvement through collaboration.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Some exemplary aspects of the college are:

1) Our programs are offered on a cohort model in which candidates complete their program requirements in an intact group. A problem-solving approach to instruction forms strong adult learning communities that model how effective schools operate.

2) All teacher education programs at CSUSM are standards-based. They meet national and state accreditation standards, and California student learning standards form the basis of instructional methods courses.

3) We fully embed English learner competencies in our programs, ensuring that all graduates are prepared to meet the educational needs of students who are English language learners.

4) A hallmark of the college is our Distinguished Teacher in Residence (DTiR) program, designed to engage outstanding teachers in the preparation of new teachers and support college faculty to work in area schools. Fourteen school districts partner with the college to support the program. Teachers are selected for two-year terms as full-time faculty in the College of Education. Six Distinguished Teachers in Residence serve at any given time. Also, the joint funding arrangement supports “reassigning” the equivalent of three full-time faculty positions annually for college faculty to work in area schools.

Institution/Program: **CSU San Marcos**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Examples of program enhancements and initiatives during the 2008/2009 academic year include:
1) The College of Education has implemented the state mandated Teacher Performance Assessment (TPA) system across all required programs. We continue to redesign and refine the curriculum of all credential classes, multiple subject, middle level, single subject, and special education. The TPA is an outcome-based model and covers the core skills required of each beginning teacher. In addition to curriculum revision, faculty have gone through a professional development series to assist them in understanding the process, content, and evaluation strategies that make up the TPA.

2) The College continues to pursue accreditation for a Communicative Disorders and Sciences MA program. The program will be focused on educating and training school-based personnel to better serve the regional public school demand for Speech and Language therapists. We anticipate the first cohort will enter the program in fall 2010.

3) The College has joined two regional partners, UCSD and San Diego State, to implement the Math for America San Diego project. This project targets the training of math educators to increase the number of well-qualified teachers of math in regional public schools. The first cohort of eligible math teacher candidates entered programs in fall 2008.

Institution/Program: **CSU San Marcos**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **CSU Stanislaus**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

California State University, Stanislaus seeks to create a teaching and learning environment that enriches a diverse community and prepares students who are advocates for children and their communities. Since its founding in 1960, the university has reflected the fluid and dynamic environment of the state's Northern Central Valley. The College of Education's dedication to children and their communities is carried out in undergraduate, graduate, and credential programs preparing teachers, administrators, special educators, reading/ language arts specialists, school counselors, instructional technologists, and physical and health educators. Our Teacher Education's credentialing programs are committed to preparing teachers who will be responsive, knowledgeable, and articulate in their advocacy for effective instruction and will meet the needs of the increasingly diverse student population. Highly qualified and experienced faculty provide students with the knowledge and practical skills necessary to ensure their success as qualified and effective Preschool to 12th grade California teachers. We offer the Multiple Subject Credential Program in Turlock, Stockton, and Merced. The Single Subject Credential Program is field-based and offers classes in Turlock, Ceres, Manteca, Modesto, and Stockton. Our teacher preparation programs have responded to the non-traditional needs of students by offering classes in convenient locations, providing day and evening classes, establishing modular schedules, offering some courses on line, and maintaining internship programs. The education programs are accredited by the National Council for Accreditation of Teacher Education (NCATE) and the California Commission on Teacher Credentialing (CCTC).

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The System wide Evaluation of Teacher Preparation summary findings indicate that credential candidates continue to report that they were well or adequately prepared to teach. These results were reviewed and disseminated to COE faculty for the purpose of identifying areas for program improvement. Ongoing analyses and further discussions are being conducted in order to serve the educational needs of the Central Valley in order to prepare highly qualified teachers for success in diverse classrooms.

The College of Education Teacher Recruitment and Retention Office serves as a resource center for teacher candidates seeking CSET, CBEST or RICA preparation assistance. The office provides information on a variety of examination preparation options via one-on-one advising sessions with students, group presentations (both on and off campus groups), e-mail correspondence, regular mailing, and the internet. The CSET, CBEST, and RICA examination preparation options include workshops, blackboard tutorial, one-on-one tutoring, live distance video instruction, and internet assistance. Approximately 500 students received resource/referral services regarding preparation assistance during the academic year 2007-08.

Institution/Program: **CSU Stanislaus**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The Department of Teacher Education implemented the California Teacher Performance Assessment (CalTPA) model as its exit assessment of all teacher candidates for both Multiple and Single Subject Credential Programs who started program in summer 2008. The CalTPA model focuses on four tasks, with a maximum score of 16. The tasks include case studies, lesson plans, assessments, and adaptations for students. Candidates create a video taped lesson, which they analyze and reflect upon, too.

Passing scores for CSU Stanislaus students is a minimum of 12 with 3 points for each task. Candidates complete the CalTPA over two semesters and engage in practice activities in courses. The first group of candidates to complete the TPA will finish their program in June 2009.

Faculty are actively involved in the design, implementation, and coursework related to the CalTPA system. Faculty sit on the Department of Teacher Education CalTPA Committee to make recommendations to the general Teacher Education faculty. All full and part-time faculty who teach courses with TPA in them have been trained in the structure of CalTPA, and many have qualified as TPA assessors.

In spring 2009, the department initiated use of Taskstream, an e-portfolio system: candidates submit their TPA responses electronically, assessors score the tasks online, and demographics and scores of candidates and assessors are summarized and retained.

Both Special Education and School Counseling Programs are approved by CCTC for internship programs.

Institution/Program: **CSU Stanislaus**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Dominican University of California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The School od Education faculty develop educators who demonstrate moral and ethical purpose, apply current educational and information literacy theories, use intercultural knowledge in the classroom, and sustain professional excellence to serve the needs of a democratic and diverse society.

Teacher candidates benefit from small class size, personalized attention, and a supportive learning community. Candidates receive outstanding mentoring from faculty and site supervisors who are experienced classroom teachers.

The School of Education has a long history of collaboration in the surrounding Bay Area counties. Local schools in the service area are comprised of children from diverse backgrounds in inner city, suburban, and rural settings. The professional preparation program reflects the commitment to multidisciplinary and multicultural education. The professional preparation program strives to provide the intellectual tools and insights that will enable candidates to live in and teach about a world of diversity. This program equips candidates to make a difference not just as teachers, but also as members of society. We are very proud of the excellent reputation enjoyed by teachers who receive their professional preparation at Dominican University of California.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Special Education Program received a U.S. Department of Education Grant of $800,000 to support selected candidates with their tuition for this program. Special Education offers one of nine dual credential programs in California.

Candidates in the multiple and single subject teacher credential programs attend a seminar course with a small group of teacher candidates throughout the program. Candidates are assigned field experiences in their professional preparation courses and share their experiences in small seminars. Seminar instructors supervise candidates and remain as their advisor during student teaching. This allows for a close supportive relationship between candidates and professors.

The undergraduate Blended Liberal Studies Program has been recognized for the strong relationships among faculty in Arts and Sciences, faculty in Education, and teachers from local schools.

The multiple subject, single subject, and special education programs in rural Ukiah begin with an early course in August. Candidates continue their program in the evening and on weekends. This program services the needs of a vast community that does not have a four year college/university in its immediate geographical area.

Institution/Program: **Dominican University of California**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

There were no new initiatives in 2007-08. The School of Education was reviewed in 2007-08 by the Committee on Accreditation as part of their regular accreditation process. The School of Education received full accreditation from the California Commission on Teacher Credentialing.

Institution/Program: **Dominican University of California**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Fresno Pacific University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Fresno Pacific teacher education program, centered in the heart of the great central valley, prepares teachers to meet the needs of all children. Racial, ethnic, socio-economic and language diversity characterize all schools used for field experiences. As a Christian university, Fresno Pacific values teaching as service. As one of many education programs in the School of Education, the credential program is dedicated to meeting the needs of individuals, viewing both education and learners holistically, and to modeling learning in community.

The preparation program is marked by coursework and field experience that integrates theory and practice. Students who complete their credential at Fresno Pacific are challenged to become scholars, professionals, leaders and peacemakers. Fresno Pacific provides traditional full-time programs and non-traditional part-time as well as intern programs which lead to the multiple and single subject credentials.

In addition, Fresno Pacific offers a special education program which leads to the Level I credential. This program provides coursework which prepares candidates with the ability to plan, design, and implement effective instruction that meets the needs of students who experience mild/moderate and moderate/severe handicaps, as well as those students with physical and health impairments. The basic multiple subject and special education programs are well articulated to facilitate students' opportunities to prepare for both careers.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Fresno Pacific has been widely recognized in the central valley and beyond the valley for the outstanding quality of its teacher preparation program. Students often report that they have been well served by the individualized, careful advising they receive from their advisors and professors. Caring, respectful relationships are at the heart of the credential program. This is particularly evident in the modified cohort model through which students develop lasting professional friendships with their professors and peers. The credential program is supported through numerous partnerships with local schools and districts.

Students also report that the program is both academically rigorous and practical in terms of preparing for the classroom. Students document their growth in preparation for teaching by preparing a teaching portfolio. This portfolio experience provides candidates, professors and potential employers with a rich picture of their preparation for teaching. In addition, the program has adopted the California Teaching Performance Assessment which is managed by Task Stream. The teaching portfolio is aligned with the California Standards for the Teaching Profession. Both the regular credential program and the special education program emphasizes honest and ethical practices based on a Christian perspective.

Institution/Program: **Fresno Pacific University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Fresno Pacific offers the Level I multiple subjects and special education credential programs in two regional centers: Visalia (Tulare County), and Bakersfield (Kern County). As Fresno Pacific has extended its mission by opening regional centers where students can enroll in teaching credential programs, the program leaders have remained committed to maintaining the distinctiveness of the FPU credential program throughout the centers. Students from these areas report a high degree of satisfaction with the credential programs that are based in their counties.

Because of the rural nature of the central valley, many small cities find it difficult to attract and hire teachers outside of the geographic boundaries of their city. Thus, Fresno Pacific University is partnering with several of our valley cities to help these cities "grow their own" teachers. Thus, FPU provides BA programs in liberal arts and early childhood education that are designed with the working adult in mind. These degree completion programs, particularly Liberal Arts, lead directly into the multiple subjects and special education credential programs, and have the potential to foster a growing population of teachers who live and teach within their own communities.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **High Tech High Charter Schools**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the HTH Teacher Intern Program is to prepare teachers to facilitate student learning in an environment that integrates technical and academic education, prepares students for postsecondary education, and creates a sense of community engagement and responsibility. The program situates teacher training in clinical sites where candidates can experience a 21st century context for teaching and learning. It develops teachers who understand the integration of technical and academic studies by providing directed, on-the-job training to mid-career individuals in transition who do not have the time or wherewithal to engage in lengthy certification programs as well as to recent graduates of post-secondary institutions.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

As we further establish this unique program, we have continued to create meaningful links between the courses that our interns take and their daily classroom practice. According to the interns, we have succeeded on that front as they have commented how the hands-on, real-world focus of the High Tech High Teacher Intern program provides them with knowledge and resources they can use in their classrooms. They add that the frequent and ongoing opportunities for reflection help them consider ways to improve their current practice. With courses taught by a combination of High Tech High teaching faculty and administrators along with our partners from the University of San Diego and San Diego Unified School District, the interns are exposed to individuals representing a broad range of experiences which allows them to learn about educational practices from multiple perspectives.

Institution/Program: **High Tech High Charter Schools**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

We have transitioned to using the Performance Assessment for California Teachers, beginning with our cohort which will complete the program in June of 2009. These teachers have been supported in their throughout the year with weekly PACT seminar classes. We anticipate that this will result in a nearly 100% pass rate for the cohort, and look forward to moving each of them onto a Preliminary Single Subject credential.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Holy Names University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Education Department at Holy Names University, historically and to the present day, has focused its attention on the preparation of dedicated educators for the urban schools of Oakland and its surrounding communities. The work of the educator has become critical in addressing the needs of an increasingly diverse population, the demands of life in a technologically changing society, and the changes created by radical shifts in societal organization.

The Department is committed to preparing qualified and committed teachers who are ready to meet the challenge. The Multiple and Single Subjects and Education Specialist: Mild/Moderate Disabilities credential programs seek to include teacher candidates of diverse backgrounds who reflect the composition of the community they serve. Recently, the Department has added the Bilingual Authorization for the Multiple and Single Subject credentials. The Department strives to encourage and support potential teachers who might not otherwise have the personal or financial resources to pursue a teaching career. Most students have had previous careers, so they bring experiences from a variety of backgrounds that they can share with peers and their future students. Students are considered for admission based on multiple measures of their potential for teaching excellence. The courses are offered at times that accommodate most working adults.

Both Multiple and Single subjects programs have met SB2042 standards, including preparation to teach English learners. The Education Specialist program has accredited for both Level I and Level II, and has met standards for preparation to teach English Learners.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The faculty of the Education Department is particularly suited to preparing teachers for urban classrooms. Full-time faculty members have had extensive experience in local urban schools. In addition to teaching the core courses in all programs, they serve as field supervisors, academic advisers, and mentors as well. Adjunct faculty members, who teach many of the curriculum courses, are outstanding educational leaders who work in city school systems. The Department's long history in the area as a premier teacher preparation program means that there are many outstanding mentors and supporters at school sites for graduates of the program, as well as for student teacher placements. The faculty meets regularly to review candidate progress, both in coursework and in the field placement assignment.

The Holy Names program includes candidates completing the regular program with supervised student teaching and candidates serving as teachers of record in urban school districts with internship credentials. In the latter two cases, program completion requires a second supervised school placement, usually during the summer, where the candidate works within the classroom environment of a cooperating teacher, under supervision of a college supervisor. The program works closely with local beginning teacher support networks in school districts and county offices of education, to ensure linkages with district expectations and resources.

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

On December 19, 2007, the California Commission on Teacher Credentialing, approved the English Learner Authorization to the Education Specialist Mild Moderate Credential.

On June 27, 2008, the Committee on Accreditation, on behalf of the Commission on Teacher Credentialing, granted initial accreditation for BCLAD Emphasis to the Multiple and Single Subject programs.

Institution/Program: **Holy Names University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Hope International University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Education Department enrolls approximately 100 students. The department exists to serve the mission of Hope International University by offering post-baccalaureate education "...to prepare competent professionals for servant leadership world-wide" in disciplines with potential for high societal impact. The Teacher Credential Program is committed to Christian values in a non-sectarian setting and maintain a focus on applied scholarship. The diverse student population within the districts surrounding the university provides rich opportunities for credential candidates to recognize and appreciate the rewards of working in Southern California's classrooms.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Founded as a Bible College in 1928, the growth of the institution into Hope International University has not diminished its original commitment to preparing students for a lifetime of quality living and dedication to service. The accessibility of faculty, staff, and administration is one indication that the University community embraces the foundational concept of servant leadership. The Education Department faculty is comprised of current and refined practitioners committed to academic excellence by providing research- based instruction and pedagogical models designed to prepare teachers to effectively serve the diverse student population found in California's classrooms. During 2004-2005, as part of the WASC Accreditation process, an academic matrix was developed and all courses were reviewed. In 2008 the Department completed its first Biennial Report for the CTC. Students and graduates appreciate the staff's and faculty's "personal touch" and interest in their individual progress during the program. Clear communication, small class size, and frequent supervision during student teaching are examples of the commitment to service by staff and faculty. Evening and weekend classes are scheduled to meet the needs of graduate students who are currently employed full-time.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Humboldt State University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Faculty and staff in the School of Education at Humboldt State University are committed to high quality education of teachers and to keeping children and adolescents at the heart of our teaching. We believe our society needs teachers who: are creative and independent thinkers, take on leadership roles in our profession, demonstrate academic excellence, and commit themselves to high ethical standards. We perceive students not as passive recipients, but rather as active, life-long learners. We believe that literacy is the responsibility of every teacher and essential for life-long learning. Our goal for all of our students is that they will graduate from our program and become exceptional teachers and strong, articulate advocates for children, adolescents, and for public education. We believe in offering a challenging academic program that focuses on best educational practices and the creation of a community of caring in our program and in our public school classrooms. We respond to our students' work personally; help our students become aware of their own assumptions, preconceptions, and personal filters; and assist them in understanding how such assumptions, preconceptions, and filters affect their teaching and the equity of the education that their students receive. We are committed to the act of teaching as being one of social activism and promotion of social justice. We see teachers as being agents of social change. We know that teaching is one of the most difficult and demanding professions, and we believe that no profession is more rewarding or more worth the dedication required than teaching.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Program leaders, coordinators, and faculty in the School of Education at Humboldt State University carefully select high caliber credential candidates for each program and collaborate with local school districts in identifying fieldwork classrooms with committed, well-qualified mentor teachers. A hallmark of our programs is the considerable amount of time spent working in fieldwork classrooms. Our programs offer individual mentorship with a graduation and employment rate among the highest in the country. Each program is a one-year course of study beginning in the fall.

Single subject (SED) credential candidates have the opportunity to fulfill their fieldwork requirements within the Early College High School at College of the Redwoods.

The Special Education (SPED) Program offers credentials in Mild/Moderate and Moderate/Severe disabilities. The SPED program faculty continue to use reading and math clinics for all credential candidates to more consistently prepare them to teach core academic content and to effectively use a variety of instructional strategies while continuing the existing time spent in a classroom with a mentor teacher.

Institution/Program: **Humboldt State University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The School of Education joined the Performance Assessment for California Teachers (PACT) consortium to meet the Teacher Performance Assessment requirements. The pilot of PACT teacher performance assessments was successfully completed during the 2007-2008 academic year. During the 2008-2009 academic year, the Elementary and Secondary Programs fully implemented PACT. Credential candidate assessments will be completed in Spring 2009. There are approximately 50 SED and 50 EED candidates participating in this first year PACT implementation.

The Special Education Program developed an Autism and Communication Disabilities Program in 2006 -2007, with a pilot program initiated in Spring 2007. Implementation of the program began in Fall 2008, and will continue with program revisions as needed. A Memorandum of Understanding was signed between Humboldt State University, the Humboldt County Office of Education and the Redwood Coast Regional Center in Spring 2009 to formalize the collaboration between the agencies. The program is designed as the first entrance into public education for individuals with Autism, and offers assessment services, instructional strategies for teachers, and serves as a transition lab for inclusion into the public school system.

The Elementary Education faculty member hired in 2007-08 assumed the Directorship of the Liberal Studies Elementary Education Program in the Fall of 2008.

Institution/Program: **Humboldt State University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **InterAmerican College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

InterAmerican College, a non-profit college, provides working adults access to a coherent and rigorous academic program based on adult learning principles. It educates students for success and full participation in a diverse society. IAC offers undergraduate and post-baccalaureate programs that prepare future teachers.

The college's affordable evening program accommodates classes to students' working schedules. The majority of students are bilingual teacher aides. The the other students are educated immigrants who are changing careers to become teachers.

The Education Department prepares competent, effective bilingual bicultural teachers who address not only academic needs of students, but also social issues in the community and in schools. At the undergraduate level, bilingual students are encouraged to achieve competence in English and in Spanish. IAC future teachers have made the commitment to work in low income culturally diverse schools. They are committed to providing every child with a academically rigorous education.

IAC offers CCTC approved teacher preparation programs. These include 2042 Multiple and Single Subject credentials with bilingual emphasis; the Fifth year Clear Credential program; the CLAD certificate; and the University Induction program. The credential program offers courses at the post baccalaureate level.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Credential courses are offered at the post-baccalaureate level. The program requires candidates to complete prerequisite course to prepare them to teach English language learners, bilingual students, lower economic and culturally diverse students. Prerequisite courses address content areas in history and culture of Latinos, civil rights,and educational equity. Candidates attend lectures given by local civic, academic, and political leaders. All candidates complete prerequisite courses in Spanish, in teaching mathematics, linguistics, Mainstreaming Special Needs students, Health for Teachers, and Teaching Physical Education in Elementary Schools.

An effective retention strategy for Latinos is the cohort model. Candidates progress through the program with the same students. The cohort system supports IAC's value of the spirit of "familia." Bilingual instruction and cultural diversity are factors which support the effectiveness of the program. Students help each other by forming study groups when preparing for standardized exams. By scheduling classes in the evenings, the program accommodates family and employment responsibilities of returning adult students.

The curriculum is designed to prepare candidates to meet the California Student Teacher Expectations. In their course work, instructors identify outcomes that are linked to the state frameworks, California student content standards, and certification standards.

Institution/Program: **InterAmerican College**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

In the new 2042 Credential programs, IAC requires that applicants for both the Multiple and Single Subject credentials pass the CBEST and CSET exams before being admitted into the program. These exams ensure that applicants are NCLB qualified before applying for employment in a Title I School.

The undergraduate courses for Multiple Subject candidates are aligned to the CA student content standards. By graduation students declaring education as a goal will have passed the CBEST and CSET exams.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **John F. Kennedy University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Department of Education at John F. Kennedy University was established in 1989 to prepare talented adults from diverse academic, cultural, and professional backgrounds for teaching in urban settings. The Education programs at JFKU are based on a theory of action that is guided by a strong emphasis on equity, multicultural understanding, community, and a vision of a more peacefu pluralistic,and democratic world. We are committed to developing educators who demonstrate a long-term commitment to principals of democratic schools and classrooms where diverse participation and voices are cultivated and where students and every member of the school community are active agents in the decision-making processes and structures of schooling. We believe every student not only has a right to learn, but a right to learn under the most optimal conditions that nurture personal well being, excellence, academic achievement, and success.

The mission of the Department of Education is to provide a holistic approach to teaching and learning that is characterized by ongoing reflection, inquiry, and application of knowledge in the field.The Multiple and Single Subject Teaching
Credential programs, emphasize the importance of the learning community in educators' lives. Candidates join a cohort of peers with whom they work and collaborate throughout the program. This cohort structure is designed to provide a support network for participants not only while they are in the program preparing for teaching or for school/district leadership but also after they graduate from the program.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The underlying principles of our programs are grounded in research on effective teaching and focus on preparation of teachers for the "real world" of schooling. The content of our curricula encourages candidates to question issues related to equity of access and student outcomes while learning pedagogical approaches that create equitable learning opportunities for diverse
learners. Our extensive fieldwork requirements are designed to provide candidates with multiple opportunities to apply theory to practice under the mentorship of exemplary educators. Our formative and summative assessment procedures promote ongoing self assessment and reflection.

Institution/Program: **John F. Kennedy University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Our SB2042 Credential Program was approved in October 2003.

We implemented the California Teacher Performance Assessment System as a part of our Summative Assessment Program to determine Teacher Candidates' Competence. The TPA data is also used to guide us in our program improvement.

In the 2004-2005 year, we systemized the entire formative and summative assessment of our program.

In the 2005-2006 year we became engaged in a university-wide process of program assessment and review. Program learning outcomes were estabished for the Teacher Credential Program, Master of Arts Program, and Administrative Services Credential Program. We are actively involved in evidence collection and ongoing program assessment.

In the 2006-2007 year we continue to be engaged in a university -wide process of program asssessment and review. We are actively involved in evidence collection review and ongoing program as program assessment and review. We are actively involved in evidence collection review and ongoing program assessment.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **La Sierra University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission statement of the teacher preparation program at La Sierra University is as follows: La Sierra University's Curriculum and Instruction department seeks to empower students through a process of seeking, knowing, and serving. Through study and practice of theoretical principles and pedagogical applications, students gain competency in educational professionalism, ethics, and effective methods in preparation for K-12 instructional efficacy.

This mission statement is based on the University mission statement, which is: To seek truth, enlarging human understanding through scholarship: To know ourselves, broadly educating the whole student: To serve others, contributing to the good of the global community.

The department's program is undergirded with the basic philosophy that all persons learn from their surroundings and that learning and schooling are not synonymous. The department has two major purposes. The first is the development of competent, professional teachers who are prepared to serve effectively in public schools and in private schools. The second major purpose is to provide opportunities for educators seeking advanced degrees who wish to hone their teaching skills.

The department desires to help students accept and practice those ethical and moral concepts which are approved by the enlightened conscience of humankind, to develop tolerance for the rights and opinions of others, to be considerate of the sensitivities of those from diverse ethnic, cultural, and socioeconomic groups, and to cultivate the ideal of service to humanity.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

La Sierra University (LSU) faculty are committed to continual program improvement, to teaching, and to research. Methods courses now include greater emphasis on multiple intelligences, brain-related learning principles, English language development, technological enrichment, and classroom resilience.

Web-assisted features enhance most coursework in the teacher education program (TEP). This modeling of technological applications prepares candidates to incorporate similar applications later in lessons they will teach in fieldwork placements.

LSU seeks to develop professional teachers who can create warm, caring classroom climates where effective learning takes place. Faculty espouse the concept that professionalism and Christian principles are not mutually exclusive.

The TEP encourages an understanding of the privileges of citizenship, importance of loyalty to country, and need for improved social order through education--whether public or private. Increased emphasis on English language learning and on appreciation for cultural diversity under girds all methods courses.

In alignment with the state's emphasis on teaching performance assessment (TPA), this is now integral to the entire TEP. All faculty are calibrated in TPA scoring and remain current through regular involvement in the

Institution/Program: **La Sierra University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

A new (parttime) faculty member oversees Teaching Performance Assessments (TPAs). Additionally, five Curriculum and Instruction faculty, one adjunct faculty member, and a full-time support staff member in the Curriculum and Instruction department all are trained in scoring of TPAs. The decision to have multiple faculty acquire training was made to insure that methods coursework aligns well with TPA expectations AND to insure that LSU's TEP remains relevant to student context and with teaching standards. TEP faculty commonly agree that TPA training provides a valuable component to teacher training/assessment and that it should contribute significantly to the overall quality of LSU's TEP.

A one-unit course has been added to our TEP in order to better prepare students to succeed on the TPA. This course is a one-unit seminar and is taught by a full-time faculty member in curriculum and instruction.

LSU faculty wish to express gratitude to CCTC for providing TPA training.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Los Angeles USD**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

As a result of the continuing shortage of fully qualified teachers in certain fields, the Los Angeles Unified School District elected to participate in the District Intern Program. This program addresses the declining pool of fully trained teachers and increasing student populations while providing new and innovative recruitment and training techniques.

The mission of the District Intern Program is to prepare urban public school teachers to effectively educate all students so that each contributes to and benefits from our diverse society. To that end the teachers completing the program will be:

**Committed to their diverse student population
**Effective instructional decision makers
**Able to assess each individual student's strengths, abilities, and needs in order to develop and implement instructional programs that facilitate student mastery of California Content standards
**Dedicated to the concept that the human system is open to change throughout all developmental stages
**Reflective about their practice

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

It has been the aim of the Los Angeles Unified School District (LAUSD) District Intern Program to implement an alternative approach to training teachers that would provide relevant and focused course work, guidance and support that prepares the new teacher adequately for the classroom realities of teaching. The program continues to reassess and re-evaluate the content and methodology each year to include the latest research on effective strategies to reach students in a large, urban multilingual, multicultural school district. These modifications are made to ensure that the teachers participating in this program receive cutting-edge professional development that is aligned with the District's instructional initiatives, the most current research and legislative mandates.

Interns participate in a three-year professional development program leading to a California Preliminary and Professional Clear Credential. The Program begins with a 240-hour Pre-Service Orientation. The Preparation or Level I phase that leads to the Preliminary Credential focuses on the Teacher Performance Expectations (TPEs) and California Standards for the Teaching Profession (CSTPs).

Institution/Program: **Los Angeles USD**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The following new initiatives to improve program excellence or effectiveness were implemented during the 2006-2007 school year:

*The continuing collaboration between LAUSD Division of Instructional Services and the District Intern Program resulted in curriculum institutes that are designed and implemented by the Division of Instructional Services content experts for District Interns during the Pre-Service Orientation: elementary English/ Language Arts, elementary Mathematics, Single Subject English/ Language Arts, Single Subject Mathematics and Single Subject Science.The 2006-2007 school year marks the first year that these institutes have taken place.

*In order to meet the continuing need for support providers, the Program has implemented an intense recruitment effort of outstanding retired teachers in order to ensure that each intern was assigned a support provider in his/ her content area. The retired support providers have school recency of three years or less and demonstrated proficiency in the content area and the necessary skill set to serve as a support provider. Additonally to meet the need for support providers, the District Intern Program actively recruited qualified graduates of the District Intern Program to serve as support providers at their school sites.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Loyola Marymount University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

In accordance with the Mission of Loyola Marymount University, the faculty, staff and students of the School of Education strive to work collaboratively in a student-centered environment to be professionals who are empowered to: value and respect all individuals, promote cultural responsiveness and social justice, integrate theory and practice, develop moral, intellectual and responsible leaders, collaborate and share leadership across communities, and integrate technology in teaching and learning.

Candidates, both undergraduate and graduate students, in the teacher preparation program are representative of the diversity in the Los Angeles area. These candidates teach in both public and private schools in neighborhoods that serve culturally, linguistically, and economically diverse students. Our undergraduate candidates pursue a teaching credential and Bachelor's degree at the same time.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

* Cultural Diversity Experience: Teacher candidates in the Loyola Marymount University program complete their credential equipped to teach students of diverse backgrounds.

* Highly Qualified Faculty: Teacher candidates interact with highly qualified faculty who are committed to teaching and research. Schools districts in California recruit students from the program.

* Low Student-Professor Ratio: Students receive individual attention and benefit from small class sizes.

* Integrated Use of Technology: The students have access to classrooms that are equipped with the latest technology, which allows them to experience teaching and learning with technology.

* Supervised Field Experiences: Candidates who are graduate students participate in supervised field experiences at the beginning of the program.

* Scholarships: Loyola Marymount University provides scholarships that allow greater access for all students.

Institution/Program: **Loyola Marymount University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

In 2003, the School of Education received continuing full accreditation by the National Council for the Accreditation of Teacher Education (NCATE) and the California Commission on Teacher Credentialing (CCTC). New intern programs were also started for the Multiple and Single Subjects programs under the new SB2042 credential standards. A new intern program in Special Education was instituted and enrollment in the Special Education program increased by 150%. These intern programs received support from a grant through the CCTC. The Multiple and Single subject programs also began requiring candidates to complete the California Teaching Performance Assessment. Candidates complete 4 tasks throughout their 2-year program that allow them to demonstrate that they have acquired requisite skills for beginning teachers.

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Teachers for Tomorrow's Schools program at Mills has a reform and change orientation. We believe that schools are not "working" as well as they ought to be and that we must work toward equity and excellent outcomes for all students. We want to provide our students with ample opportunity to develop the knowledge, skills, and dispositions that will facilitate their being able to participate in reform activities when they assume their teaching positions in schools. Our location in a major urban setting provides more than adequate impetus for the social justice agenda that guides the work we do.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The curriculum in the Teachers for Tomorrow's Schools program is centered, by design, on six core program principles. Guided by the overarching goals of equity and social justice, the work is organized around these principles which permeate every aspect of the program from coursework, to fieldwork, to the general culture of the Mills Education community. They are:

o Teaching is inherently moral work that must be guided by an ethic of care.

o Teaching is reflective work that requires active and systematic inquiry for learning throughout the teacher's career.

o Learning is developmental and constructivist and thus teaching is best guided by those conceptions of how learners come to know.

o Teaching is connected in deep and important ways to subject matter. A central goal of the work is to prepare students to acquire, understand, and construct subject matter knowledge.

o Teaching is collegial in that both teachers and students learn in the contexts of relationships that matter. Colleagues and community are central.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Mount Saint Mary's College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Since 1925 Mount St. Mary's College (MSMC) has prepared caring and skilled teachers for urban schools and diverse populations. MSMC has a diverse student population, a near-mirror reflection of the population of the Los Angeles area and is identified as a Hispanic Serving Institution of Higher Education. Placing emphasis on learning outcomes, the Education Department welcomes the challenge and enrichment that a diverse population offers. Through programs like the Center for Cultural Fluency and its Teacher Centers in urban school districts, the College provides models and guidance for meeting the specific learning needs of the students of Los Angeles.

Founded by the Sisters of St. Joseph, with a 350-year commitment to social justice, the college is grounded in Catholic values and provides a transformative liberal arts education. Education Department faculty is committed to the college values of service, leadership, ethics and inclusiveness. The teacher credential programs are designed to prepare teachers who are effective in working with K-12 students from varying backgrounds, are grounded in their content area, and committed to the belief that all children can learn. The teacher preparation programs at MSMC deepen students' knowledge of pedagogical principles through application in urban classrooms and in-depth reflection during class meetings.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Teaching Performance Assessment that was piloted in 2003-2004 was fully implemented in Fall 2005 and continues to be utilized. The results have been used to identify program strengths and weaknesses annually and courses are revised to enhance candidate preparation. The passing score is 12 out of 16 possible points.

The Education Department obtained approval from the college to initiate a new program in Fall 2009, a Certificate in Instructional Leadership for teachers who have completed a credential program and want to prepare for leadership roles in curriculum and instruction.

Faculty in the Elementary and Secondary Teacher Preparation Programs continue to offer a resource guide for CSET preparation. To emphasize the importance of early CSET preparation, the program application requirements require that candidates submit a score report for at least one of the required CSET examinations. This report is used by the admissions committee, in conjunction with the other application materials, to determine the candidate's potential for successfully meeting the subject matter requirement and to plan the preparation the candidate will need to meet this requirement.

Education and Math Department faculty continue to collaborate in a nation-wide curriculum development project to improve the preparation of undergraduates in the blended Liberal Studies/Elementary Teacher Preparation Program for the teaching of mathematics. Our undergraduates' content preparation in math has

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

In May 2007 the faculty reviewed the TPA results and identified areas for program improvement for the coming year. The faculty then proposed and received a Program Enhancement Grant through our institution called "Meeting Pre-K-12 Students 'Special Needs' in the General Curriculum for Teacher Preparation". This initiative will involve embedding special education modules in all preliminary methods courses. We began implementation of this program improvement initiative in Fall 2008.

Three new Intern programs were approved in 2007. We obtained CCTC approval for Intern programs in Multiple Subjects, Single Subject, and Education Specialist in Mild/Moderate Disabilities. Programs began with cohorts in Fall 2008.

In May 2008 the faculty reviewed candidate surveys and identified an area for program development for the coming year. The faculty then proposed and received a Program Enhancement Grant through our institution called "Meeting Technology Standards for the Teaching Profession and in K-12 Classrooms". This initiative will involve redesigning and improving faculty use of technology within courses and create consistency in curriculum offering related to teaching technology. We will begin implementation of this program improvement initiative in Fall 2009.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **National Hispanic University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The goal of the Department of Teacher Education at The National Hispanic University (NHU) is to prepare effective teachers for California's culturally and linguistically diverse classrooms. We are committed to serving the needs of students, many of whom come from language backgrounds other than English, in our local school districts. Fully integrated into the program are philosophies and strategies for teaching in a multicultural classroom that enhance learning and educational equity for English language learners.

As a result of the critical need in our local school districts, we have many credential candidates who are currently teaching in the elementary and secondary school classrooms as Intern teachers. Therefore, we collaborate with the Alum Rock Union Elementary School District, Eastside Union High School District and county-wide consortiums from San Mateo County Office of Education, Alameda County Office of Education and the Santa Clara County Office of Education to offer Intern programs that support beginning teachers through a comprehensive professional teacher preparation model. We believe that collaboration with local school districts is essential in order to address the critical need for qualified and effective classroom teachers.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

At NHU, the focus of the program is to provide strategies to help teachers address issues related to teaching students of diverse language and cultural backgrounds. As a result, some of the outstanding features in the 2006 -07 programs were the improvement of the supervision component of the credential program and the integration of theoretical understanding with practical methodological approaches that teachers are able to use in their classrooms immediately. The attention to practicality in the real-world classroom and the high level of support they receive in the university classroom from their instructors and their peers serve to empower new teachers and, above all, contribute to their excellence and effectiveness in the classroom.

Continued implementation of the 2042 credential standards added to the improvement of the program along with the addition of the Special Education Mild/Moderate Tier 1 Credential. Continued integration of the Cal TPA and required critical assessments at the end of each course provided data that led to changes in staff and in program delivery. Three professional development trainings on assessment practices, SB 2042, and the TPAs added to the abilities of staff. NHU teacher candidates gained additional knowledge and skills at the Academic Success ELL Conference for 450 people that NHU cosponsored with the Santa Clara County Office of Education. Three RICA preparation workshops were conducted by NHU faculty to better prepare teachers for the exam. Three hybrid on-line courses were initiated as 2042 professional clear courses. NHU was the cosponsor with the SCCOE of a Paraprofessional Teacher Training Program for three elementary school districts and the Eastside High School District.

Institution/Program: **National Hispanic University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

NHU is one of the few universities in the State that has been approved to offer the new CTEL (CLAD) certificate.

The Tier II Education Specialist for Mild to Moderate Credential is to be written and submitted for approval to CCTC in summer 2009. In addition, NHU is working on adding a Masters Program.

The California Teaching Performance Assessment (CalTPA) will be expanded to include Spanish and PE. 2008 will see all four required Teaching Performance Assessments implemented. NHU will continue training of supervisors and key personnel as assessors to use the ETS developed TPAs and new credential expectations.

NHU will increase its outside professional development activities for schools and teachers in strategies for second language students and struggling readers.

Institution/Program: **National Hispanic University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **National University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the School of Education at National University is to prepare educators as lifelong learners, reflective practitioners, and ethical professionals. The mission is accomplished in a learning community through professional preparation programs, partnerships with schools, and educational research.

In its strategic plan, the University articulates a commitment to be the career-long learning partner of California's K-12 teachers with the goal of improving public schools and developing solutions to the problems of low student achievement. The School of Education offers Bachelor's degrees,Master's degrees, and credential programs in San Diego and at eleven academic centers throughout the state. NU ranks first nationally in granting master's degrees in education to all minorities and according to the U.S. Department of Education, ranks first in the nation in granting master's degrees in education to Hispanics (Black Issues in Higher Education, 2004). In California, NU ranks first in granting master's degrees in education to Hispanics, African Americans, Native Americans, and Asian Americans (Black Issues in Higher Education, 2004).

The Department of Teacher Education offers preparation programs for the Multiple Subject and Single Subject Preliminary and Professional Teaching Credentials, including bilingual emphasis (Spanish) and university internship options in collaboration with selected school districts. The Department of Special Education offers the Preliminary Level I and Professional Level II Education Specialist Credential program with an emphasis in mild/moderate, moderate/severe disabilities,and deaf and hard of hearing along with internship options.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

School of Education faculty focus on assisting credential candidates in the developing a balanced relationship between disciplinary knowledge and educational practice. To ensure candidates' successes, faculty aligned, coursework, field experiences, clinical practices, TPA Tasks, Teacher Performance Expectations, K-12 academic content standards, and California Standards for the Teaching Profession. The credential curriculum is developmental design of candidate outcomes and demonstrated competencies throughout foundation and methods courses as well as clinical practices. The curriculum is designed in a developmental approach, requiring sequential content development and skill acquisition focus throughout the courses and field experiences, which, culminate in clinical practice. Content focused on students with special needs and English language learners is integrated into each course. Electronic portfolios are used for Teacher Education and Special Education candidates, thereby, creating formative assessment throughout the program and summative assessment of candidate competence upon program completion. Student teachers and interns receive ongoing supervisor support from university supervisors and district employed supervisors/support providers. Most candidates choose to complete additional coursework to earn a Masters degree aong with their credentials.

NU's unique one-course-per-month format promotes greater interest and motivation through a concentrated, focused approach to learning. In keeping with its commitment to alternative delivery systems, NU offers credential courses in online, onsite and hybrid formats supported by a nationally recognized elibrary system.

Institution/Program: **National University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

National University implemented the four Teaching Performance Assessment tasks. Secondly, in preparation for the WASC Educational Review (fall 2010), the University created Institutional Learning Outcomes, and each program developed Program Learning Outcomes aligned to professional, state and national candidate standards. Thirdly, using an alignment of learning outcomes, each credential program created comprehensive candidate assessment plans focused on standards-based competencies. Assessment results will inform program improvement efforts on a continual basis. Finally, National University implemented three new bachelor programs focused on multiple subjects (elementary) and selected single subjects (secondary) areas.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Notre Dame de Namur University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Notre Dame de Namur University currently offers the following credentials and certificate:

Preliminary Multiple Subject, Preliminary Single Subject
Fifth Year Program for a Clear Multiple/Single Subject
Education Specialist (Mild-Moderate, Moderate-Severe) Level 1
Education Specialist (Mild-Moderate, Moderate-Severe) Level 2
Administrative Services, Tier I, Reading Certificate
Specialist in Reading and Language Arts

Notre Dame de Namur University School of Education & Leadership has fully implemented California's teaching credential model (SB 2042). The design of the Multiple Subject and Single Subject programs is aligned closely with the University's Mission Statement and core values to ensure that candidates enjoy multiple opportunities to reflect on and experience excellence in their coursework and field experience. In keeping with Notre Dame de Namur University's Mission Statement,we commit ourselves to building a student-centered environment which honors the richness of diversity in the human population. We value each student as a person, respect each student as a learner, and appreciate each student as a rich resource for other learners. As teachers, we ensure the right to equal access to challenging learning opportunities. We recognize that technology will play an increasing role as a tool for expression, research and storage of information in the development of future teachers.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

At Notre Dame de Namur University, we highlight the centrality of the social dimension of learning. Together with our candidates we build a collaborative community of learners. In turn our candidates are encouraged to build similar collaborative communities in their classes, between home and school, between school and community, and with their colleagues.

Program qualities include:

* Outstanding service to students, from the first inquiry through the interview process, the responsive advising, and the personal supervision in the field.
* Two semesters of student teaching at two different levels resulting in candidates who are well prepared to take on full-time classroom responsibilities.
* Concurrent program blends theory and practice, making all coursework relevant to the real world of experience in the classroom.
* Job Fair prior to graduation maximizes exposure to multiple districts, all of whom send representatives to interview prospective candidates.

(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Occidental College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

OUR MISSION: TO PREPARE LEADERS IN EDUCATION . . . LEADERS IN LIFE

The Department of Education at Occidental College has two major goals: (1) preparing educational leaders by offering a rigorous and thorough professional preparation program for a select number of prospective teachers; and (2) developing future parent, citizen, business or professional leaders who understand contemporary society and education and who exercise essential personal or group leadership skills. Both goals require a thoughtful, reflective leader who is knowledgeable of and sensitive to the diverse needs of students in our public schools and adults in our increasingly more global American society. The greater Los Angeles urban metropolis, with its vast human and institutional resources and rich cross-cultural diversity, greatly enhances the learning of students with either goal. Occidental College offers two teaching credential programs - a Level I Multiple Subject Program and a Level I Single Subject Program.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The factors that have contributed to the excellence of the Educational Leaders Program at Occidental College include:

1. The cohort group of less than thirty candidates provided the opportunity for each to receive individualized instruction from their college supervisors in the student teaching experience and close collaboration with peers in their coursework.
2. Consistent, ongoing program evaluation which included feedback from students, master teachers, program graduates who are now teaching, principals of graduates of the program and other community members.
3. Assessment through Various Forms which requires demonstrated knowledge and application of the California Standards for the Teaching Profession and related TPE's and through the TPA's.
4. Consistent, ongoing collaboration with local schools which has enabled us to develop a resource list of highly successful classroom teachers who serve as classroom supervisors for our student teachers.
5. Emphasis on group development with strategies that are modeled in all Education classes and practiced by the candidates in their student teaching experience.
6. Development of cross-cultural sensitivity and pedagogy that encourages inclusion in all planning and teaching.
7. A developmental view of critical and social justice education is inherent in the coursework - enabling the candidates to begin teaching with an understanding of the factors which influence education and which affect their role as teachers from a global perspective of education.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Ontario-Montclair School District Intern Academy**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The OMSD Intern Academy was an alternative way to earn a California teaching credential. At the end of the two-year program, candidates who successfully completed all requirements, exams and course work were recommended to the California Commission on Teacher Credentialing for a Preliminary Multiple Subjects Credential by the Board of Trustees.
The mission is to guarantee our commitment to the highest quality education for all students, whatever it takes. The OMSD Intern Program strove to recruit, educate,and certify teachers who could effectively meet the needs of ever-changing culturally and linguistically diverse populations.
Participants acquired the knowledge, skills and professional attributes, to satisfy credentialing requirements through an integrated collegial support system, which reflected a balance between theoretical and practical aspects of teaching. OMSD is one of the largest elementary districts in California, with nearly 23,000 students, but has been experiencing declining enrollment since 2003-2004. Ethnicity includes: American Indian, Asian, Pacific Islander, Filipino, Hispanic, Black and White with 49.98% classified as limited English proficient.
The OMSD Intern Academy was fully accredited by CCTC in January 2001. This affordable alternative credentialing route was for teachers who desired a different way to become an effective teacher. Interns had the opportunity to apply what they learned as they learned, instead of waiting until the completion of their program. Interns were hired and responsible for multiple subject, self contained teaching assignments. Interns who were selected for the OMSD Intern Academy earned full salaries and benefits.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

"Pre-Service: Intro to the Teaching and Learning Process" consisted of 60 hours coursework and 60 hours of supervised fieldwork with a goal to provide interns with pedagogical knowledge and skills needed to begin teaching. Coursework is a balance of theory and application. Field experiences were done with effective master teachers. Interns observed and became familiar with curriculum, participated in assessing student work and assumed responsibility for as much of the teaching as possible. Master teachers provided feedback and coaching. Upon successful completion of Pre-Service, interns began the fully accredited two-year teacher credentialing program.

The program consisted of 32 semester units of coursework composed of pedagogical knowledge, skills, and strategies necessary to meet the needs of all students. The program was aligned with the California Standards for the Teaching Profession. Interns earned 10 semester units for "Practice in Teaching" activities, applying concepts and skills addressed in the courswork. All instructors possessed appropriate qualifications for the courses they taught. A system of support was provided which included master teachers, assessment coaches, support providers, and instructors.

Interns were required to complete and pass each of the four Teaching Performance Assessment Tasks. The TPA was utilized by the program as a summative assessment to verify the Interns' attainment of each Teaching Performance Expectation. Additionally, Interns attended an Intern Colloquium at the end of each year in which

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

There have been no new initiatives put into place that were not in place in 2006-2007; however, due to a significant drop in district enrollment and applications to the Ontario-Montclair School District Intern Academy, a request was submitted to the California Commission on Teacher Credentialing (CCTC) to put the Intern Academy on a temporary inactive status after the current cohort of interns has completed their program. The CTC elected to close the program effective July 1, 2008, which would allow for the reamiaining candidates to complete the two-year program. No new candidates were admitted in 2007-2008.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Orange County Consortium District Intern Program**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Orange County Department of Education District Intern Program serves a consortium of school districts by offering a two-year alternative credentialing program,Education Specialist Mild/Moderate. The program's mission is to educate teachers to become reflective practitioners committed to continual professional growth and the integration of current theory and best practices to foster the academic, social, and emotional development of all their students. Intern teachers are supported and instructed by a community of professional educators including course instructors, practicum supervisors, academic advisors, a school-based peer coach, a principal, and a district human resource administrator. The program's clientele are mainly from traditionally under-represented groups in the teaching profession, such as Latinos and males.

The intern teachers join a cohort taking coursework together over a two year period. The intern's teaching practice is supervised for three semesters. Weekly consultation occurs with the intern's peer coach at the school site. A professional portfolio addressing the Teaching Performance Expectations is required and interns present their portfolio to an exit panel of educators. The program offers preparation for taking the RICA (Reading Instruction Competence Assessment). Interns are prepared to teach ELL as specified through AB1059.

Consortium school districts accept course credit toward salary increments and invests in the intern teacher by providing a peer coach and six release days over the two-year period to observe exemplary teaching.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Orange County Department of Education District Intern Program strives to be client-centered. Coursework and supervision are designed to blend theory and practice for the novice teacher while maintaining a professional standards-based curriculum. Because the program is small, support is customized to meet individual needs of our interns,including adjusting schedules to meet the demands of working teachers and flexing deadlines that conflict with teaching duties such as parent conferences and year-round school cycles. Beyond the coursework offered, intern teachers attend intensive test preparation classes for the state-required examinations.

The faculty and staff provide a team approach for the support and education of each intern teacher. This support network, coordinated by the advisor, monitors the intern's academic and professional growth. Advisors work with each practicum supervisor, peer coach, school principal, and human resource administrator as a team. Each semester the Practicum Supervisor meets with the intern a minimum of five times. The Peer Coach meets weekly. If needed, the team assembles to discuss the progress and challenges facing the intern teacher. They facilitate any interventions and individualized response to the situation.

The program's faculty is a blend of practitioners (all part-time employees), including National Board Certified Teachers, and university adjunct faculty. Current teachers and administrators provide the rich experiences of the current realities of the classroom and school with the professional practitioner perspective. The university

Institution/Program: **Orange County Consortium District Intern Program**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The Orange County Consortium District Intern Program was reviewed for continuing accreditation by the California Commission on Teacher Credentialing during 2007-2008 for compliance with the Standards of Quality and Effectiveness for Education Specialist Credential Programs for Education Specialist: Mild to Moderate. The review team did recommend to the Commission that all 29 standards have been met by the District Intern Program.

Due to an ongoing need for qualified Special Education teachers in every district, the Orange County Consortium District Intern Program will continue to offer a two-year program that will meet the Standards of Quality and Effectiveness for Education Specialist Credential Programs: Mild to Moderate. For the next phase of program development, the Advisory Consortium is considering the need for Education Specialist, Communication Development, Moderate/Severe, with added authorization in Autism.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Pacific Oaks College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Teacher Education Program is embedded within a college-wide context that values social justice, respect for diversity, and the uniqueness of each individual. The shared vision for Teacher Education is expressed in the Mission Statement:
The mission of the Teacher Education Program at Pacific Oaks College is to prepare professional educators who understand diversity, are grounded in human development, and value children.

We believe that
-awareness of diversity is integral to an educational process in which each individual is valued for their own identity, culture, language, and ability, and where discrimination against others is identified and challenged;
-teachers as well as students must be involved in meaningful learning experiences characterized by inquiry, reflection, and support; courses must model learning environments that take current knowledge about human development into account;
-to best serve children in public or private schools, teachers must learn to integrate constructivist approaches, effective standards-based instruction, and technology within a challenging and interesting curriculum.
Students in the Teacher Education Program are non-traditional mature learners who are balancing their academic pursuits with work and families. Many are from underrepresented ethnically and racially diverse communities.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

In the 2007-08 academic year, our TPA program was approved by the California Commission on Teacher Credentialing. The process of creating and implementing the document helped us to reflect on program effectiveness and make changes accordingly. For instance, we looked at how well our courses addressed lesson planning, a concept that is at the core of the TPA tasks. We subsequently made shifts in our coursework so that lesson planning was woven throughout coursework in more deliberate and consistent ways.

In addition to beginning TPA implementation, our program hired 2 visiting faculty members to fill postitions recently left vacant. This allowed us to address the needs of the department more effectively, thereby better meeting the needs of our students. With a new team in place, we have also become better able to examine the trends in the field and the ways in which we can make shifts in our program so that graduates are equipped with the knowledge and skills that are reflective of such trends.

Institution/Program: **Pacific Oaks College**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Pacific Oaks College has been in a period of transition for the last two years. It has been a difficult period for the college and our department, as the future of the college has been clouded by uncertainty. However, the President of the college recently resigned, and a new interim president has been appointed, creating a sense of hope for a path forward. Our department is viewing this as a time of opportunity for us to receive the support we need and make the changes we envision.

In addition, in the Fall of 2008, the entire staff and faculty of our department (including adjuncts) came together once again to discuss coursework and to see how well our syllabi are aligned to the TPA tasks, and to one another. This has been, and will continue to be, an ongoing endeavor as we work to ensure that our program reflects our mission, and the larger mission of the college.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Pacific Union College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Pacific Union College is a Christian liberal arts college whose mission is to prepare its students for productive lives of useful human service and uncompromising personal integrity. Its student-to-faculty ratio is 15-1. The PUC credential program is accredited by the Commission on Teacher Credentialing to recommend individuals for SB2042 preliminary and clear multiple and single subject teaching credentials. It is also accredited by the North American Division of Seventh-day Adventists Department of Education which issues church teaching certificates to eligible individuals.

Purpose: To develop Christian teachers who have the skills and teaching strategies necessary to create a rigorous, stimulating, and caring classroom where learning takes place, and who demonstrate the following:

*Tolerance and sensitivity to the rights and opinions of others, especially those from diverse ethnic, religious, cultural, and socio-economic groups.

*Appreciation for the uniqueness and worth of each individual and the importance of the systematic development of the whole person, including the intellectual, spiritual, social, and physical.

*Skill as a classroom teacher as demonstrated by beginning teacher level proficiency in the Teacher Performance Expectations.

*Subject matter proficiency as demonstrated by academic performance and a dedication to excellence.

The department is currently preparing 32 teachers for preliminary credentials and eventual placement in K-12 classrooms. In addition, 47 practicing teachers are being prepared for clear credentials.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

*Faculty members have been successful teachers, principals, and superintendents and maintain K-12 state certification. They are regularly involved in collaboration with local schools and consult for the local community.

*In conjunction with their courses students take field trips to unique school settings. In addition, a wide variety of professionals from the field are brought into the credential courses to make presentations and share their perspectives on teaching.

*All multiple subject and single subject credential candidates spend two full weeks in an autumn "beginning of the year placement" prior to student teaching. This placement is made in a multi-grade classroom whenever possible. This experience prepares them for the unique challenges of beginning a new school year, of teaching two or more grade levels at once, and of teaching in a small school rural community.

*Most students begin working concurrently on subject matter and professional coursework as freshmen. They quickly engage in fieldwork, with part-time experiences in three different school cultures and grade levels before beginning full-time student teaching.

*Many students at PUC choose to take a year away from their coursework and serve as student missionaries

Institution/Program: **Pacific Union College**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

*During the 2007-2008 school year the department was heavily involved in creating the system to deliver the Teacher Performance Assessment to candidates. This involved restructuring coursework to accomodate the TPA, hiring a TPA Coordinator to oversee the program, developing support materials for students, continued training of faculty as assessors, finding and training additional off-campus assessors, assigning teacher responsibilities for TPA preparation, and writing the TPA proposal for submission to the CCTC. The proposal was approved by the CCTC and implementation will begin 7/1/2008.

*Faculty members in-serviced groups of employed teachers in the field in the areas of Beginning Reading and Glasser Quality Schools.

*A faculty member attended a technology in-service conference to improve computer instruction in the department.

*A new crew of student teaching supervisors were hired, trained, and assigned to students.

*The department increased its emphasis on recruiting quality individuals into the teacher preparation program and teaching profession.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Patten University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Patten is a private, coeducational, interdenominational Christian university located within the culturally rich area of the Fruitvale District in East Oakland, and on the undergraduate level is dedicated to providing a Liberal Arts education with ten undergraduate majors and one Graduate program.The mission of the university is to provide an excellent education on the undergraduate and graduate level, including: The Master of Arts in Education Program,and the Liberal Studies/Multiple Subject Teaching Credential Undergraduate Integrated Program , designed for motivated and committed students from a broad diversity of ethnic, geographic, and socio-economic backgrounds.The institution also endeavors to inspire students to serve their communities and live as morally responsible individuals in their chosen field.In line with the broader Patten goals, and consistent with the guidelines and policies of both the CCTC and WASC, both Single and Multiple Subject Teaching Credential Programs,prepare committed teachers who are striving for academic excellence, and have the ability to effectively analyze their teaching practices, and who will continue to develop professionally throughout their entire teaching career. The Education Division Faculty are selected on the basis of having a strong academic background, possessing appropriate higher education degrees, and showing evidence of having considerable practical experience in the classroom, bringing forth a balance between theory and practical application within the classroom setting. This program offers a highly multicultural curriculum incorporating instructionally proven effective teaching strategies, enabling new teachers to meet the myriad of challenges facing them.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Liberal Studies/Multiple Subject Teaching Credential Integrated Undergraduate,Multiple Subject and Single Subject credential programs,are specialized programs,formatted to include the CTC standards and the special emphases of Patten University,while accommodating differences and interests of individual teacher candidates. The programs incorporate a balance of educational coursework,beginning with the introduction of the TPEs,and continuing with valuable hands-on field experiences and supervised student teaching.
In keeping with the broader goals of the University, these programs seek to develop the ability to integrate educational theories and practices and attain high standards with emphasis on inner city teaching; Acquiring knowledge, skills, technology and best practices, crucial in delivering high quality instruction;maintaining sensitivity to students of different backgrounds,with differing special needs,promoting a classroom environment for a diverse student population,including english language learners;and providing challenging instruction to facilitate students' development;utilizing a variety of assessment strategies to evaluate students' growth and apply appropriate teaching interventions;Establishing between school, family, and community,a climate of mutual respect.

The Patten University programs have received outstanding commendations, citing their support for student teachers, citing the noted strong faculty cmmitment by the CTC Committee on Accreditation. Also noted was the outstanding collaboration with site administrators and School District personnel. Patten University's curricular and instructional planning skills and the academic level of teacher candidate work has been cited as

Institution/Program: **Patten University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Recent technology upgrades include enhancements to the 802.11b/g wireless system for campuswide access to all of the data,on-line library and multi-media files. Students, staff, and faculty also now have access to a variety of multimedia equipment including digital cameras and camcorders, both mounted and portable multi-media projectors,provided in part using partnership and Regional Intern matching grant funds.

With the guidance of the Education Division Advisory Commitee, and under the leadership of the Credential Programs Director, we have been enhancing our com-
munity connection with workshops and outreach activities including SB 2042, NCLB, SB 1209, and information programs for public and private K-12 schools in the area. The Director and the Credential Analyst both participate with Induction consortium and other new teacher support groups in three counties.

It should be noted that beyond the formal Student Teaching/Intern Practicum, candidates complete 100 hours in classrooms as part of the EDU 583 Course requirement. For Intern support providers, partnership grant funds are utilized, in part to enhance the student experience.

We have just completed the COA on-site Review process and are already addressing new reading standards, enhancing the Single subject program, and
incorporating new TPA accountability procedures.

The Director and Credential Analyst have completed certification for three of the TPA Tasks and fourteen

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Pepperdine University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Pepperdine has enjoyed a long history of preparing teachers and other educational leaders for California and our nation's schools. Each member of the University faculty exemplifies Christian values in daily teaching. Pepperdine's Teacher Education Program is an innovative learning community where faculty, staff, and students of diverse cultures and perspectives work collaboratively to foster academic excellence, social purpose, meaningful service, and personal fulfillment.

As a program within a Christian university, teacher education endeavors to educate and motivate students to assume leadership roles in professions that improve and enrich the lives of individuals, families, and communities. Pepperdine offers the teacher preparation programs for the SB 2042 Preliminary Multiple and Single Subject Teaching Credentials. The program at the Seaver campus in Malibu offers an undergraduate, integrated credential program. The Graduate School of Education and Psychology offers a graduate program that combines a Master of Arts in Education with Teaching Credential. It has four graduate campuses in Westlake Village, Encino, West Los Angeles, and Irvine.

The Seaver College undergraduate teacher education program information website ishttp://seaver.pepperdine.edu/humanities/. The Graduate School of Education and Psychology teacher education program information website is: http://gsep.pepperdine.edu/

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Since Pepperdine's candidates study and teach in one of the most culturally and linguistically diverse locations in the nation we support reading and language arts program in schools. Through a practicum experience candidates provide supplemental tutoring to English Speaking and English Language Learners. This course contributes to the candidates' success in teaching reading and preparation for the Reading Instruction Competency Assessment, while serving the needs of neighborhood schools.

The CA TPEs provide the opportunity to align coursework with the students' practicum experience in the public schools. All of the teacher candidates in the Graduate School are participating in the PACT. The Seaver College program has implemented the CalTPA.

As of September 07, The Graduate School was approved by CTC to include a University Intern Program (UIP) within our MAETC Program. The UIP provides districts in need of teachers with the opportunity to offer contracts to students who are enrolled in a CA credentialed teacher education program. This provides another opportunity to support young teachers working in underserved schools.

Another innovation is our course sequence. "Identity and Vocation." This course leads candidates through an action research project that evolves out of the student teaching experience. Candidates examine their perspectives on the communities in which they are placed and these points of view impacts the lenses in which

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Pepperdine University successfully launched the SB2042 Credential program for Multiple and Single Subject Teaching Credentials. Teacher Education faculty have engaged in training for Teaching Performance Assessment (TPA) and students participate in the TPA process. All Teacher Education faculties have incorporated into their curriculum the new TPEs, which are the foundation for the new TPAs.

The Masters of Education and Teacher Credential Program continues to build an emerging network of Professional Development Schools to better prepare teachers to meet the needs of students in highly diverse schools in the Los Angeles and Ventura County areas. Discussions to involve more community stakeholders in Pepperdine's teacher preparation process have yielded strategies such as an expanded advisory board, more diverse student teaching experiences and infusion of social justice curriculum into the program.

In 2008, a new director for the University Intern joined the faculty. Under her leadership the UI program will grow in numbers and is developing deeper connections with our partner schools.

In 2008 GSEP began implementing the PACT, and Seaver began implementing the Cal-TPA. We are closely monitoring our students' achievement and feedback through this process. We have aligned courses with the PACT and Cal-TPA requirements and are continuing to monitor this alignment.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Point Loma Nazarene University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

MISSION: To provide higher education in a vital Christian community where minds are engaged and challenged, character is modeled and formed, and service becomes an expression of faith. Being of Wesleyan heritage, we aspire to be a learning community where grace is foundational truth is pursued, and holiness is a way of life.

The University, established in 1902 by the Church of the Nazarene, offers quality liberal arts and professional programs in teacher education in San Diego Arcadia, Bakersfield and the Inland Empire.

CORE VALUES: 1-Excellence in teaching and learning
2-An intentionally Christian community
3-Faithfulness to our Nazarene heritage and a Wesleyan theological tradition
4-The development of students as whole persons
5-A global perspective and experience
6-Ethnic and cultural diversity
7-The stewardship of resources
8-Service as an expression of faith

The Program is grounded in the core values and mission of the University. The program prepares educators who demonstrate excellence in teaching anchored in research-based, brain-compatible learning theory. Emphasis is placed on continuous candidate transformation and renewal in teaching practices that impact student learning, and the development of dispositions of noble character in the context of an intentionally

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Point Loma's Teacher Credentialing Program consistently emphasizes the explicit transfer of theory into practice and guides candidates to define success by the impact they have on student learning in their classrooms of diversity.

Here are highlights of Point Loma's dynamic teacher preparation program:

1-The curriculum is results-focused AND candidate-centered, seeking to personalize and maximize learning aligned with professional standards for each candidate.

2-Content and effective instructional strategies are explictily taught and modeled.

3-Multiple assessments are used to determine whether candidates understand content and can transfer or apply the learning to new situations.

4-Continuous formative assessments are used to give immediate and specific feedback to candidates and to inform instruction and personalized coaching of candidates to meet university and credentialing standards of excellence

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

1. Exemplar Educational Effectiveness Plans for credential and advanced degree programs developed to guide continuous improvement were developed for WASC accreditation.

2. Biennial Report Field Study completed by Mission Valley Special Education faculty.

3. BTSA: the development and formative assessment approach to the CA TPA with transition induction plan forms for BTSA.

4. STUDENT TEACHING: new student teaching evaluation forms were piloted during 2006-07 that were aligned with the CSTPs and the TPEs. An evaluation form for teacher dispositions was also piloted. All of these were used by faculty, cooperating teachers, and university supervisors.

5. TEACHER PERFORMANCE ASSESSMENT
Credentialing candidates demonstrate their applied knowledge, skills, and dispositions as well as their impact on student learning through several measures, one being the Teaching Performance Assessments aligned with the California Teacher Performance Expectations.
PLNU School of Education implemented a full pilot of tasks 3 and 4 of the Teaching Performance Assessments in 2006-07 and used the performance data to improve and adjust course content, preparing every teacher candidate to better impact student learning.
University Professors and Supervisors of student teachers were trained as TPA assessors to align their

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Project IMPACT - San Joaquin County Office of Education-Teacher**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Project IMPACT is a district intern program sponsored by San Joaquin County Office of Education in partnership with over 50 school districts in and around San Joaquin County. School districts vary from single school rural districts to large unified urban districts. Participation ranges from one intern to more than 70 within a district. IMPACT provides training, concurrent with their teaching assignment, for multiple and single subject and education specialist teacher candidates.

The majority of teacher candidates within this program are recruited from the communities they serve and are often more mature than the typical college student. Many are changing careers to pursue teaching. Many candidates within the IMPACT program are interested in teaching in hard-to-staff schools including underperforming urban schools.

The goal of Project IMPACT is to support and train the best teachers for San Joaquin's classrooms. This is accomplished by attracting highly motivated, qualified candidates and providing them with intensive support which includes: being assigned to a cohort with whom they complete the program in support of each other; individualized coaching; and extensive coursework (over 300 hours). They are observed and coached by a supervisor (year 1=20 visits; year 2=10 visits). Additionally, they are supported by an on-site peer.

The interns complete their entire program with Project IMPACT. They complete the course work and apply for their preliminary credential; induction is completed in their last semester. They ultimately earn their clear California Professional Credential.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

1. Support: Candidates are provided with multiple layers of support. These include the assignment of an on-site peer coach, a practicum supervisor from the program, and currently practicing faculty members. Candidates are also placed in cohort groups providing an additional support structure.

Cohort groups provide the final structure for support and potentially the most important. Students attend all courses together and provide the support to each other needed to succeed in such an intensive program. There is a strong link between teaching efficacy and cohort support. We feel that the cohort structure in place in Project IMPACT is a key ingredient to candidate success. Intern survey data aligns with this.

2. There is a committment on the part of all partners to assist in the growth and development of interns. All parties work together to provide candidates with opportunities to learn.

3. Instruction. Courses are predominately taught by K-12 teachers. This provides candidates with access to expert teachers who apply theory everyday. Five faculty members are current or former Teachers of the Year and all have at least Masters degrees. The faculty is representative of the diverse ethnicities and cultures found in our community. IMPACT interns also receive more coursework than in traditional programs. They attend over 300 hours of coursework concurrent with their classroom assignment.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Project Pipeline**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Project Pipeline's mission is to provide eligible individuals an affordable and convenient way to earn a California teaching credential while meeting California's demand for new teachers.

Working with a consortium of Northern California school districts, Project Pipeline serves as a means for school districts to develop their teacher hiring pool with high-quality teacher candidates. Once hired, these candidates become full-time teacher interns receiving a salary plus benefits as they take courses through Project Pipeline to earn their credentials.

Project Pipeline does constant research to determine the most effective and promising practices for delivery of instruction to students in hard-to-staff schools. Attention to these important strategies makes it uniquely effective at training teachers to work in schools whose students live in areas of high poverty.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Project Pipeline is a two-year single subject or three-year Mild/Moderate Education Specialist Levels I and II teacher credentialing program that allows the participant to teach full-time at one over 90 participating school districts in 15 counties including Sacramento, Alameda or Contra Costa. The program has a focused recruitment campaign that aggressively recruits candidates who are proficient in mathematics, science, English and Special Education as well as candidates from under-represented ethnic minority groups. A cohort of interns take their courses evenings and weekends and are taught by well-regarded professors/practitioners active in education. Interns teach with the assistance and guidance of qualified mentor teachers and supervisors who are veterans in the teaching field. Upon completion of the credentialing requirements of the program, an intern earns either a Single Subject California Preliminary Credential or Professional Clear Credential for Special Education (awarded by the California Commission on Teacher Credentialing). Program qualities are: 1) Approximately eighty-five percent of the participants remain in the classroom after five years, mostly in the urban city schools to which they were originally assigned; 2) There is strong advocacy from the staff, instructors and supervisors for the new teachers to succeed; 3) Structured teaching practices are deemed essential in Project Pipeline for preparation of new teachers; 4) The students are in a cohort together for their entire program. They work in teams and gain guidance from each other; 5)The staff has strong people skills and are encouraged to bring out the best attitudes from the interns.

Institution/Program: **Project Pipeline**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Project Pipeline continues to ensure a quality education for its candidates while focusing on future changes. Project Pipeline places emphasis on the Teaching Performance Expectations but also continues to teach the California Standards for the Teaching Profession. Project Pipeline has integrated all changes made to its curriculum as a result of SB 2042 and, as of July 1, 2008 has implemented the Teaching Performance Assessments in the general education program.

Support for the interns has been enhanced. Project Pipeline has implemented a Buddy Program where recent graduates help interns set up their classrooms for the first day of school. The Buddy Program has been added to our infrastructure as support for new teachers which includes field supervisors and on-site mentors.

Most recently, in January 2009, Project Pipeline partnered with University of Pacific and started a master's program in Curriculum and Instruction and a master's program for Special Education. Of the 32 units required for the master's program, sixteen are transferred from Project Pipeline credential courses. The remaining sixteen units are provided during one year of coursework taught by University of Pacific professors and Project Pipeline faculty.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Saint Mary's College of California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Our purpose is to prepare high performing professionals, who can act as agents for change in their communities. The programs of the School of Education at Saint Mary's College offer a blend of theory, research, and practice, presented in an environment that is inquiry-focused and humanistic. During their studies candidates examine their beliefs about learning in the context of educational research and theories about best practice. To develop the field-based competencies necessary to support high quality teaching, candidates work with K - 12 students in both public and private schools, and in urban and suburban settings. All programs promote candidate's growth as spiritual beings, as independent thinkers and as active citizens.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

In recognition of the need to prepare teachers who can educate all students, credential programs are designed to address the ethnic, linguistic, and cultural diversity represented in California's student population. This focus is in keeping with the tradition of the College, which is based on a commitment to educate those who are disadvantaged and disenfranchised.

Four principles organize our programs:

· Focused study of educational foundations, educational theory, and best practice as the foundation for sound pedagogy;

· Consideration of how to meet the needs of ALL learners infused throughout coursework;

· Integration of state approved K - 12 curriculum standards in all methods courses;

· Concurrent involvement in fieldwork, seminars, and academic coursework.

This integration of fieldwork and coursework provides developmentally appropriate support to candidates through on-site coaching, theoretical analysis of teaching experiences, and reflection on practice.

Institution/Program: **Saint Mary's College of California**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **San Diego Christian College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The purpose of the Department of Education is to provide courses which lead to California State Multiple and Single Subject Teaching Credentials, Association of Christian Schools International Teaching Certificates, and TESOL Certificates.

The overriding goal of the Department is to nurture and develop highly qualified Christian teachers who have an appropriate subject-matter foundation upon which has been built an understanding of student behavior, competence in teaching abilities, the ability to develop and encourage critical judgment and creativity, and a commitment to high ethical standards.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

1) Pre-screening candidates for admission to the teacher credential program based on personal interview, academic strength, essay, prior successful experiences working with children or youth, and motivation to teach.

2) Personal attention for each teacher candidate during the teacher credential program.

3) Course assignments designed to apply the California Standards for the Teaching Profession (CSTPs), the Teaching Performance Expectations (TPEs), and the Teaching Performance Assessments (TPAs)

Institution/Program: **San Diego Christian College**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

In the spring of 2009, the Teacher Credential Program implemented TaskStream, a web-based software system that will be used initially for the submission, scoring, and tracking of the TPAs. This system has been used successfully at many other colleges, and has already streamlined these processes greatly at SDCC. With the capabilities for generating reports that TaskStream has, data collection will become much more efficient. In the fall of 2009, SDCC students will begin using Taskstream to create electronic portfolios for the teacher credential program.

Due to the increasing number of duties involved in the implementation of the TPA, SDCC created a part time position for a TPA Coordinator in fall 2008. This person will coordinate TPA submission, scoring and tracking using TaskStream, creating a more streamlined, efficient process for students and faculty.

In the fall of 2008, teacher credential program course numbers were modified and approved. These modified course numbers signify the post-graduate status of the teacher credential program at SDCC, allowing students who are finished with the program the ability to transfer to masters programs elsewhere with more credits upon entering.

In the fall of 2008, the process of financial aid and business office check-in was streamlined by creating a combination "orientation and registration clearance" event. All teacher credential program students are required to attend to gain important information about the upcoming semester, and complete their financial obligation check-in processes for the college.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **San Diego State University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

SDSU's teacher education programs prepare elementary and secondary general and bilingual education and special education professionals for San Diego and Imperial Counties. The primary mission of these programs is to enable candidates to develop knowledge, skills, and dispositions for promoting P-12 student achievement and improving their quality of life. Students of color constitute the majority (65.5%) in San Diego County schools; 46% qualify for free or reduced lunch. Approximately one-fourth are English learners and represent some 54 different language groups, with Spanish as the primary language for 86% of the English learners. Approximately 12% of students are identified as needing special education services. In the Imperial Valley, 91.7% of P-12 students are students of color with the majority (87%) identifying as Hispanic. Some 43 percent are English learners, 70.2% qualify for free or reduced lunch, and 8% receive special education services. Within this context, the teacher preparation programs are committed to a conceptual framework that focuses on (a) research-supported practice to promote learning in culturally, linguistically, and economically diverse schools and (b) documentation of graduates' competence and performance in the field.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Partnerships with P-12 schools characterize our teacher preparation programs and contribute to excellence and effectiveness. For example, general and bilingual credential programs implement a cohort model, often in field-based settings in which university and P-12 teachers and administrators collaborate to prepare candidates and cooperating teachers. Because of the county-wide demand for special education personnel, special education programs partner with multiple districts. Working with school districts in Imperial and San Diego counties, special education internship programs help address shortages of personnel trained to provide services to children and youth with disabilities. All programs require a minimum of two semesters of field experience in culturally, linguistically, and economically diverse schools. The City Heights Collaborative is one example of a comprehensive, strategic partnership among the university, school district, and community to improve achievement in a low-income, ethnically and linguistically diverse urban neighborhood. The University manages the Collaborative's elementary, middle, and high school, where pre-service teacher preparation, graduate education, and research are integrated to raise student performance on standardized tests. SDSU collaborates with San Diego and Imperial county school districts, to prepare bilingual education teachers through course work and field experiences in Mexico and California.

Institution/Program: San Diego State University

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

SDSU teacher training programs continue to address the three phases of teacher preparation and development - undergraduate, preservice and induction. In 2008, Special Education credential programs began requiring specific coursework in autism. A new dual bilingual special education credential program commenced, as well as an on-line master's program for teachers interested in integrating technology. In 2008/2009, students completing elementary and secondary credential programs are taking a state-required teacher performance assessment to be recommended for a credential. Piloting of the assessment provided useful information for program improvement. In Fall 2008, the College of Education began a multi-year university-community symposium to enhance preparation of educators for closing the achievement gap. In Spring 2009, the College engaged in futures planning focused on identifying strategies for making a difference in the lives of those we serve.

Institution/Program: **San Diego State University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **San Diego Unified School District**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the San Diego Unified School District's Teaching Intern Programs is to improve student achievement by preparing and supporting aspiring teachers in a rigorous and reflective program that supports California state standards and curricular frameworks. Our Goal is to select and train the most highly qualified teacher candidates who will serve as an elite corps of teacher models and leaders in the San Diego Unified School District.

The General Education Teacher Intern Program has been authorized to prepare elementary (K-6, bilingual) teachers and secondary (english, mathematics, science and music) teachers. Candidates admitted to the program complete a two-year professional development plan in conjunction with their teaching assignment.

The Special Education Teacher Intern Program has been authorized to prepare Educational Specialist Mild/Moderate teachers. Candidates admitted to the program complete a three-year professional development plan in conjunction with their teaching assignment.

Interns work for the district under an intern credential and receive beginning teacher salary as well as full benefits. Upon successful completion of the program, elementary candidates are recommended for a Preliminary California Multiple Subjects Credential with BCLAD emphasis. Secondary candidates are recommended for a Preliminary Single Subject California Teaching Credential for English, science, mathematics, or music. Special Education candidates are recommended for a California Clear Teaching credential for Educational Specialist Mild/Moderate.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Interns enter the program as a cohort and remain together for five semesters. This cohort meets weekly throughout the two years of their internship. Upon entering the program, interns participate in a minimum of 160 hours of pre-service where they receive instruction and are given an opportunity to observe classes and deliver some lessons prior to their teaching assignment. Once in the classroom, interns are assigned a support provider to assist and coach them on a weekly basis. Support providers are full-time classroom teachers that have been released from the classroom for this specific assignment. The ratio of interns to support providers is 5:1 for first-year interns and 8:1 for second-year interns. In addition to the classroom support, interns receive support for instruction through coursework which is provided by program instructors. Weekly seminars provide additional support for interns to problem solve and address questions and concerns. The program manager and support providers work as a team with site administrators to help ensure interns have effective and successful teaching experiences.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

- A more rigorous intern-selection process.
- Editing and rewriting curriculum.
- Increased coordination between Intern Program and District Departments: Curriculum and Instruction {Science, Mathematics, Second Language, and Visual and Performing Arts).
- Restructuring of course sequencing.
- Increased staff development with regards to English learners.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **San Francisco State University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The College of Education provides academic programs for students interested in pursing a Multiple, Single Subject, and/or Educational Specialists teaching credential, as well as those seeking advanced degrees (MA Ed, PhD's / EdD's). Candidates are provided with the knowledge and skills needed to work in urban, suburban and rural school environments and/or community based settings. The College of Education seeks to prepare reflective and innovative professionals and practitioners as leaders to ensure the educational development of diverse populations within dynamic educational contexts. Particular focus is placed on helping candidates understand how language and culture, shape our thinking, learning and action within the classroom, as well as within society.

The College of Education is committed to collaborating with local school districts, communities, and university programs to ensure that all candidates learn how to bridge the knowledge and skills gained in their undergraduate degree programs with pedagogy, research and practice. All candidates are offered courses and given opportunities to participate in symposia, workshops and brown bag discussions aimed at increasing their understanding of issues that impact the lives of children, families and communities with whom they will be teaching or serving. The College of Education faculty and staff serve on school district and community organization committees in order to gain a greater appreciation of the needs of the schools and communities that the university serves. Moreover, the College continues to work with public and private schools, and organizations to develop programs to serve the needs of its candidates and community.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

SFSU COE promotes academic and professional excellence, and equity and social justice in its curriucula and programs. Throughout the year the faculty, administration and students are encouraged to engage in research, professional associations, and activities at the local, state and national levels that reflect these ideals.

Through grants and foundations, scholarships and stipends are awarded to students and faculty so that they can pursue their academic and professional goals. Information about scholarships and other opportunities are provided through the COE's Associate Dean for Graduate Studies, Research and Development and the Teacher Preparation/Credential Services and Data Management Offices. The College recognizes students, as well as alumni during an annual luncheon, and faculty at the annual COE Faculty meeting.

In addition to offering credentials, internships, an M.A. in education, and a joint doctoral degree in Special Education for over 20 years; an M.A in Equity and Social Justice, and a doctoral degree in Educational Leadership are now offered. Along with the College of Humanities and International programs, the COE established the Confucious Institute in order to increase teacher training in Mandarin and Chinese/Asian culture; the COE manages the California Department of Education's Learning Resource Display Center # 7 (K -8 texbook adoption series); jointly sponsors the World Savvy Conference (to raise public and international awareness among youth); and offers courses and programs for diverse high school students through the Step to College Program. These services and opportunities are aimed at furthering the professional and academic

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The College of Education is committed to program excellence and quality control. To that end the College continues to seek out ways to enhance its curriculum and programs. Faculty and administration continue to work on developing and implementing assessment systems aimed at evaluating and improving program and curriculum quality. The College joined the Performance Assessment for California Teachers Consortium and is developing and implementing this system within its teacher credential programs. In addition to this, faculty in secondary education developed and implemented an electronic portfolio using the Teaching Performance Expectations.

The College of Education continues to survey graduates and credential students. Survey data is used by elementary, secondary and special education programs to determine what, if any, program changes are needed. Faculty in Elementary, Secondary and Educational Specialist programs continue to review and develop alternative models for supervision. They are currently working with school district personnel on ways to provide supervision for students and support to those providing supervision for teacher candidates; as well as, collaborating with school districts on internship partnerships and induction plans.

Based on data collected over the last three years by the California State University Chancellor's office Teacher Effectiveness survey, the College has gathered data on areas that need improvement and as well as those are working well for student candidates. An external evaluation of the single subject program was initiated and completed.

Institution/Program: **San Francisco State University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **San Jose State University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the College of Education at San Jose State University is to prepare educators who have the knowledge, skills, disposition and ethics that ensure equity and excellence for all students in a culturally diverse, technologically complex, global community. The College is divided into eight academic departments (Child and Adolescent Development, Communicative Disorders, Counselor Education, Educational Administration and Higher Education, Elementary Education, Instructional Technology, Secondary Education and Special Education), and utilizes department chairs and program coordinators to oversee various areas of academic emphasis. The College also makes use of an Office of Credentials and Student Services, an Office of Field Placement, several internship programs, professional development schools, a diagnostic speech clinic, an accent modification clinic, and a few technology enhanced classrooms.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Strengths of the College of Education teacher preparation programs include a dynamic, continually developing faculty, an attention to partnerships and action-oriented, applied research, and an emphasis on excellence and equity in education. Faculty members spend time working and teaching in schools to provide real-world, applied approaches to teacher preparation in socially and technologically diverse school settings. The College has over a dozen partnerships that range from internship placements and a professional development school to on-site course delivery and recognition of outstanding multicultural actvities in the schools. By emphasizing excellence and equity in education, the College is committed to continuous improvement of courses, programs, and services in a socially just environment where every student has a right and opportunity to learn.

Institution/Program: **San Jose State University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Here are a few changes that will improve our program excellence and effectiveness. Two very important agreements for teaching credential candidates, one a campus wide agreement on subject matter preparation and the other Community College transfer agreements. Both will ensure that students receive accurate information and are able to streamline their pathway through the programs. Improvements in the follow-up data from teaching credential graduates and their supervising employers have been achieved. Future results will be enhanced by an increase in response rate and the formation of composite data. The feedback will enable us to better evaluate our curriculum. Two potential decisions, one on electronic portfolios and the other on the establishment of a University Center for Teacher Education will improve exit evaluations and improve the recruitment of potential teachers.

For Further Information Regarding the Teacher Preparation Program, visit the program website at:

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Santa Clara University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Santa Clara University is a Jesuit institution that makes student learning its central focus. Student learning takes place in an environment that integrates rigorous inquiry and scholarship, creative imagination, reflective engagement with society, and a commitment to fashioning a more human and just world.

The aim of the Teacher Education Program at Santa Clara University is to prepare highly competent educators who understand issues in education and are motivated by their conscience and compassion to make sure that all individuals—regardless of culture, ethnicity, socioeconomic status, gender, or ability—receive a quality education that provides the foundation for a satisfying and productive life. The department plays an important role in advancing the mission of the University and takes seriously the Jesuit commitment to excellence, a reality base, and critical reflection leading to action and social justice.

The Department of Education prepares individuals for careers in both public and private education. The department offers teacher credential programs for single-subject and multiple-subject teaching under the 2042 teacher program standards, mild/moderate specialists, early childhood special educators, reading language arts specialists and administrative services.

The department seeks to attract students that represent a wide range of ethnic and social diversity. Graduates of the teacher preparation program are sensitive to all forms of diversity and develop learning environments where students can grow in knowledge, imaginations, compassion, competence, social responsibility and self-esteem.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Integration of theory and practice, with a heavy emphasis on field applications, contributes to program excellence and effectiveness. Students have field experience assignments during each phase of their preparation. Students in the regular Pre-service program are assigned to a school for the entire program. This allows for an immediate application of the concepts presented in classes and the issues brought back from the classroom enrich on-campus discussion. Intern students have responsibility for a classroom and are, therefore, eager to learn those concepts and principles that will enhance their success. They are able to obtain this information through constant interaction with university and district supervisors and in regular classroom session that focus on the challenges of teaching in the contemporary world.

All students take courses focusing on cross-cultural communication, social and philosophical dimensions of working with diverse populations, teaching linguistically diverse students, and first and second language acquisition. In addition, students are involved in a service learning project which requires implementation of a literacy project at sites such as community centers and juvenile facilities. The goal of this assignment is to provide an experience working with under-served populations. It has the additional benefit of helping students understand that everyone can learn. The major emphasis throughout these courses is on professional inquiry and on the development of reflective teachers.

Institution/Program: **Santa Clara University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The Department of Education continues to attract more educators from local Dioceses who wish to become fully credentialed teachers and are taking part in our three (3) and six (6) year private school program option.

The Department of Education also hired a new Executive Director and several new professors.

Institution/Program: **Santa Clara University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Simpson University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Mission and Context: Simpson University is California's northernmost four-year, comprehensive Christian liberal arts university, located in Redding, California. Founded in 1921, Simpson University is WASC accredited offering bachelor and master degrees, and teaching and administrative services credentials. The School of Education believes its educational programs equip men and women to teach in elementary and secondary education in the United States and globally. ¶The multiple and single subject credentialing programs and master's degrees are designed to serve professional needs of individuals who seek advanced academic preparation; prepare students for subsequent doctoral programs; provide credential preparation for multiple and single subject teaching in public, private, and international schools; produce individuals who can articulate a Christian worldview; and respond to the educational needs of the north state by preparing qualified educators. ¶Accredited by the California Commission on Teacher Credentialing, our 5th year teacher credentialing program is typically completed within three semesters. Candidates may complete a Master of Arts in Education in concert with the preliminary credential with 21 additional units. Candidates may begin in fall, spring and summer semesters. Simpson University also administers a $1.26M federal grant to provide advanced instructional strategies for teachers to support English language learners.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Program Qualities

It is personal, it is character education, and rich field experience. Quality professors, small class sizes and personal attention are the hallmarks of the Simpson University experience. Candidates are well served by full-time professors and exemplary practicing educator adjuncts. Simpson University credential graduates are well received by area administrators. Candidates are deeply prepared in curriculum, content standards, classroom management, pedagogy, and use of technology. Woven throughout is character education.

Another strong feature of the teacher credentialing program is the weekly visit by the student teaching supervisor during the full-time semester-long student teaching. Candidates appreciate the ongoing support that connects their coursework knowledge to practice. Multiple Subjects candidates may complete part of their student teaching in overseas international schools or Department of Defense Schools.

Master teachers participate in a cognitive coaching course to develop mentoring skills for guiding their student teachers.

Candidates are served by a full-time credential analyst who guides them through their credentialing process.

The education faculty, adjunct faculty, supervisors and staff work as a team to closely support developing new

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Sonoma State University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Sonoma State University (SSU), located in northern California, is committed to excellence in the professional preparation of educators in a public liberal arts setting. SSU has an enrollment of 8900 students including 789 credential and graduate students in the School of Education. The liberal arts provide a foundation for the preparation of future educators who are well grounded in their disciplinary content and pedagogical knowledge, and who continuously use inquiry and reflection to improve their practice. There were 19.5 full-time faculty in the School of Education during the period indicated. There was also an Educator-in-Residence for the year.

SSU recommended 691 students for credentials of all types. Our graduates hold positions in rural, urban, and suburban school districts in six counties in Northern California. In all of our Credential Programs candidates receive special preparation in teaching English language learners and students from diverse cultural backgrounds. SSU offers advanced credentials in Administrative Services and Pupil Personnel Services, and resource specialist credentials in Reading, Special Education, and Adapted Physical Education. The Master's Degree includes: Curriculum, Teaching, and Learning; Early Childhood Education; Educational Leadership; Reading; and Special Education. SSU offers integrated/blended subject matter/credential programs that allow a student to complete courses and field experiences in General Education, their major, and a basic teaching credential in four years.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The majority of Preliminary Level I Education Specialist Credential candidates are Interns, working as special education teachers on Intern Credentials. They are grouped into cohorts which proceed through the program together with an Intern Seminar Faculty Leader. The cohorts make extensive use of technologies to enrich their face to face meetings and seminars.

The Multiple Subjects Credential Program includes rigorous academic coursework, a partnership model for student teaching, and an integrated assessment system that is based in a digital portfolio process. At the Collaborations for the Renewal of Education (CORE) sites, a university professor works on site one day a week as part of the learning community of beginning credential candidates, student teachers, classroom teachers, administrators, and K-6 pupils.

The Single Subject Credential Program ensures candidates can critically apply their course-based learning in middle and high school classrooms. Before Single Subject candidates can advance to student teaching, they must present their portfolios to a team of university faculty and middle school and high school educators.

Multiple Assessments. Each credential program has a carefully articulated curriculum and multiple assessments, aligned with the California Standards for the Teaching Profession and NCATE standards.

Institution/Program: **Sonoma State University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

1. Credential and graduate programs offered in the School of Education continue to document candidate performance quality in relation to program standards and outcomes; we use performance data as well as data from the CSU Survey of Graduates and Employers to inform their continual program improvement activities. We are fully implementing the state approved Performance Assessment for California Teachers (PACT) model of teacher performance assessments in our credential programs.

2. The joint doctoral program, Ed.D. in Education Leadership, has approximately 60 students enrolled in three cohorts.

3. Faculty from all programs in the School continue to expand and deepen their involvement with initiatives in area school districts to support P-12 student learning and achievement. Among these is a county-wide initiative to better support ELL in our schools.

4. The School of Education and the School of Science and Technology continue to collaborate on initiatives to increase the number of science and mathematics teachers.

5. School of Education faculty continues to lead a state-wide, federally funded, initiative to ensure that university faculty are prepared to support the highest quality learning opportunities of all college students, including those with disabilities. This initiative is receiving both state and national recognition.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Stanford University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Stanford Teacher Education Program (STEP) of the Stanford University School of Education (SUSE) aims to cultivate teacher leaders who share a set of core values that includes a commitment to social justice, an understanding of the strengths and needs of a diverse student population, and a dedication to equity and excellence for all students. STEP's approach to teaching and learning is sensitive to the family, community, and political contexts of education; focused on the needs and development of diverse learners; and grounded in the study of subject matter that enables inquiry, critical thinking, problem solving, and high academic achievement.

STEP seeks to prepare and support teacher leaders working with diverse learners to achieve high intellectual, academic, and social standards by creating equitable and successful schools and classrooms. Desired outcomes for graduates include an understanding of teaching as intellectual work and as a caring profession; a depth of content knowledge and a repertoire of powerful pedagogical practices; and a view of teaching and of the role of education in society informed by appreciation of the socio-cultural contexts of education. The program is organized to foster an understanding of and commitment to inquiry and reflection, collaboration, a blending of theory and practice, and the effective use of technology as a teaching and learning tool.

STEP's graduates will meet both the practical and intellectual challenges of the teaching profession as they serve the needs of the diverse population of today's students and revitalize the profession and the field.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

STEP is a 12-month course of postbaccalaureate study for prospective teachers. The program combines a year of student teaching with 45 credits of coursework leading to an MA in Education and a Preliminary Single Subject Teaching Credential (Secondary) or a Preliminary Multiple Subject Teacher Credential (Elementary). Through the BCLAD option STEP elementary also prepares teachers to teach bilingually in linguistically diverse classrooms. STEP's small size (between 75 - 90 students), access to top faculty and cooperating teachers, and coherent design offer highly focused instruction interwoven with hands-on teaching experience, sustained mentoring, and personalized advisement. STEP's design takes into account the integration of the many areas of knowledge that underlie effective teaching and provides opportunities for observing, planning, and practicing pedagogical approaches in specific clinical contexts. Teacher candidates are placed in clinical placements in the classrooms of cooperating teachers in local schools year-long. University supervisors are experienced teachers of the subject matters and grade levels in which they supervise. Together, cooperating teachers and university supervisors provide structured and supportive coaching and mentoring to the STEP teacher candidates. Stanford faculty members and practicing teachers co-teach selected courses of the university-based curriculum, which is designed and sequenced to articulate with the clinical experience. This program of study is designed to help teacher candidates gradually develop the many areas of knowledge that constitute the basis of professional teaching practices, and engage in various modes of inquiry and constant reflection.

Institution/Program: **Stanford University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Stanford University has started an elementary teacher preparation program offered to Stanford undergraduates. The first graduating class completed the program in June 2006. In the following year, starting in Summer 2007, the elementary program enrolled teacher candidates who were Stanford undergraduates as well as external applicants.

In May 2008, STEP received national and state of California accreditation through NCATE and CCTC respectively.

Recently, Stanford University was selected by the Woodrow Wilson Foundation as one of four universities nation-wide for the Leonore Annenberg Teaching Fellowships. Starting summer 2008, STEP will award 25 Leonore Annenberg Teaching Fellowships over a three-year period to teacher candidates in the program.

Stanford University continues to be one of eleven institutions of higher education selected to participate in the Teachers for a New Era initiative supported by the Carnegie Corporation. Under the auspices of this initiative, the School of Education is developing strategies to engage faculty from the Humanities and Sciences and from other professional programs in the work of the Teacher Education Program.

STEP continues to be a member of the PACT (Performance Assessment for California Teachers) consortium - a coalition of teacher education programs working on developing, piloting, and evaluating valid and reliable performance assessments for beginning teachers.

Institution/Program: **Stanford University**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Stanislaus County Office of Education**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Whereas there is a critical shortage of special education teachers in this area;
Whereas districts are desirous of replacing emergency permits with intern certificates for their teachers;
Whereas teachers seek programs that are specifically designed for those who are earning a credential while teaching;
Whereas students whose IEP's assign them to special education classrooms deserve teachers who are knowledgeable, prepared, and caring; and
Whereas there is no district intern program for Mild/Moderate and Moderate/Severe Special Education teachers currently available in Stanislaus County to meet the critical shortage;

The Stanislaus County Office of Education has written for, been approved to provide, and operates a Special Education Mild/Moderate and Moderate/Severe District Intern Program that:

- provides support for interns who are teaching and earning a credential simultaneously
- sequences courses to meet the most critical needs of teachers and students in a timely way
- provides a comprehensive education as specified by the CCTC program standards
- ensures that candidates who successfully complete the program will be recommended for an Education Specialist credential that has prepared them for a resource or special day K-12 classroom assignment in California.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Stanislaus County Office (SCOE) Special Education District Intern Program has a spiraled set of courses, such that critical issues are addressed at the front end of the program and readdressed, in greater depth, later in the program. Additionally, due to the large numbers of English learners in this area, issues pertinent to second language learners are threaded throughout the sequence of courses. The courses may be one unit (15 class hours), two units (thirty class hours), or three units (forty-five class hours) to allow for this flexibility.

The SCOE program has assembled an impressive and diverse faculty, each member with deep experience with special education programs or, for the content specific courses, real expertise in specific curricular areas. This faculty includes practicum supervisors who have experience working in the field of special education, and frequently with observing and providing feedback to special education teachers new to the profession.

The SCOE program has provided a schedule that allows teachers to arrive comfortably after the school day and leave early enough to enjoy their families and prepare for the next teaching day. Interns attend classes two evenings a week, typically, with an evening in between to ensure adequate time to complete homework assignments and be prepared for their teaching responsibilities.

Two talented special educators manage the SCOE program; and both conduct informative, one-on-one intake sessions with potential candidates; teach within the program; and work with the faculty. Therefore, both know

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Stanislaus County Office of Education initiated the practice of using Start Up coaches to ensure that interns had support and assistance early on in their internship. Start Up coaches provided assistance for interns who were enrolled in the programs for fall 2008. Both program coordinators served as Start Up coaches. Newly hired interns recieved a total of four visitations from the Start Up coaches prior to the employing district assigning a "district" Peer Coach. Start Up coaches assisted interns with classroom set up which included establishment of rules/consequences, procedures and routines. Start Up coaches also provided emotional support, facilitated assignment of "district" Peer Coaches and suggested methods of organization.

As the program matures, there is constant review and enhancement of course syllabi, program policies and procedures, intern demonstration of competencies, addition of new faculty and site support. The program is responsive to intern candidate needs by considering feedback from candidates who have completed the program. All program enhancements or changes are conducted carefully to ensure adherence to the CCTC program standards.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **The Master's College and Seminary**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Master's College provides approved professional preparation programs for candidates desiring to teach in elementary or secondary schools. The mission of The Master's College is to "empower students for a life of enduring commitment to Christ, biblical fidelity, moral integrity, intellectual growth and lasting contribution to the Kingdom of God." The Teacher Preparation Program, within these guidelines, purposes to provide (1) a program founded on a biblical perspective and scriptural principles, (2) preparation oriented to the needs of elementary and secondary pupils, (3) periodic review of the program in light of changing (a) needs of credential candidates, (b) research on schools and learning, (c) demands of the education profession and (d) needs of the local school community. The goal of the Education Department is to prepare teachers who will be successful and effective in California's public or private school environments. Candidates are carefully selected and provided with an academically strong, nurturing atmosphere to foster development of their unique abilities as they move toward their professional goal. The Master's College has cultivated positive relationships with 5 local school districts serving students from diverse backgrounds for many years.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Full-time faculty teaching professional courses have public school classroom experience. They also supervise student teachers weekly. Adjunct professors are currently teaching in public schools.

Faculty members advise candidates each semester regarding course registration. Candidates keep the same advisor through graduation and credentialing. Meetings are held each semester to alert candidates to requirements.

The college provides a number of opportunities to serve in the inner city of Los Angeles as well as in countries around the world. Candidates may study for a semester in Israel. This gives them first-hand experience with diverse backgrounds.

Courses are designed to require candidates to apply what they are learning to assignments that are similar to the tasks they will have as teachers. Candidates have fieldwork with every professional class, and are required to plan and teach units in a classroom.

Master teachers are carefully selected with the particular candidate in mind. College supervisors meet personally with teachers to orient them to college requirements. During student teaching, candidates are visited weekly by the college supervisor.

The administration and other departments in the college are supportive of the goals of the department and create and adapt courses as necessary. There is a strong commitment to incorporating technology into courses college-wide. This has included equipping classrooms with computer ports and PowerPoint projectors and supplying computers to all faculty.

Institution/Program: **The Master's College and Seminary**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The Education Department is always examining the programs and procedures that have been set in place. One of those is the data collection and reporting of the primary assessment piece called the Teacher Performance Assessment (TPA). During the pilot phase of the TPA, the lead assessor developed reporting procedures that gave feedback to the faculty, in terms of rate of completion and over-all scores, as well as the rate of success in achieving mastery of the Teacher Performance Expectancies (TPEs) for the students. The next step in development of the data system was to give formative feedback to the students, which noted the score on the TPA and the individual TPEs that were assessed. These reporting measures were very helpful for the faculty and the students and gave direction to the program as a whole. As of July 1, 2008 the state of California began its implementation phase of the TPA.

During the past year, the academic dean of the college asked for data that would document the department's Student Learning Ourcomes (SLOs) and accompanying assessments so that he could review the program and develop documentation for things such as WASC accreditation. To begin to implement this data development and transfer, the lead assessor, the faculty, and the dean and his staff began the process of taking all of the information from the department level to the college-wide level. The data was uploaded on to the Access Information Management System (AIMS), which now gives the college the ability to generate necessary reports which improves program excellence.

Institution/Program: **The Master's College and Seminary**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Touro University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The institutional values of Touro University - California are expressed in its vision statement: " Educating Caring Professionals To Serve, To Lead, To Teach". Consistent with that vision, the College of Education seeks to fulfill its mission of "promoting social justice by serving the community and larger society through the preparation and continuous support of professional educators to meet the needs of a constantly changing, challenging and diverse student population". Touro University - California provides graduate level programs in health care and education in concert with the Judiac commitment to social justice, intellectural pursuit, and service to the community.

The College of Education offers teacher preparation programs leading to single subject, multiple subject, and education specialist/special education teaching credentials and the Master of Arts degree in Education. Touro University - California seeks to identify and attract candidates who are committed to teaching students who are historically underserved. The College of Education offers a preparation program that provides a supportive learning environment coupled with early and intensive field experiences that prepare candidates for the challenges and rewards of teaching in California's diverse schools.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Teacher preparation programs offered through the College of Education promote a constructivist approach to learning and are designed so that candidates experience the type of teaching they are expected to practice and display. One feature of the programs is that traditional coursework and field experiences are fully integrated into comprehensive instructional blocks. These instructional blocks are based on multi-dimensional ideas essential to successful teaching underscoring the idea that learning is dynamic and active rather than simply incremental. Each instructional block has an associated component of practicum field experience to facilitate candidates' understanding of the complexities of teaching and immerse the candidates in actual practice situations. Seminars within each instructional block provide a structure for candidates to process and reflect on those experiences, to make sense of new ideas in a supportive environment under the guidance of faculty. It is through this construction of personal meaning that candidates learn to understand and develop their craft of teaching.

To enhance the learning experience, candidates are grouped in cohorts, progressing through the program together. The cohort provides an ongoing learning community for candidates, offering a peer group for professional reflection as well as a source of strength and support during the challenges and successes that occur during the program. Ideally, relationships formed in the cohort will extend beyond the preparation program and develop into an ongoing collegial professional network. Each cohort is assigned a Faculty Cohort Leader who provides a personal faculty connection for each student in the College of Education.

Institution/Program: **Touro University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The College of Education has continued to expand to meet the needs of the local community. A proposal has been submitted to California Commission on Teacher Credentialing for approval of an Administrative Services Tier II credentialing program. Once approved, Touro will begin admitting cohort groups for the Fall 2009.

In addition our Special Education program has instituted a Masters of Arts in Education with an emphasis in Autism Spectrum Disorders. This program can be done concurrently with an Education Specialist Level II Credential or as a masters' program only. The first cohort began in the Spring 2009.

This year Touro has also expanded its Masters of Arts in Education with an emphasis in Educational Technology to include three new school district cohorts. There are now cohort groups with the Benicia Unified School District, Vallejo City Unified School District and Vacaville Unified School District which started in Spring 2009. The Fairfield Suisun Unified School District began its second cohort of students in the Spring 2009 also.

In order to more fully emphasize the cohort model of our credential program plans have been made to switch from our current block curriculum model to a Semester system beginning with the 2009/2010 academic year/Summer 2009.

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC Berkeley**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of California's mission to combine theory, research and practice distinguishes UC Berkeley's programs in education. The Graduate School of Education has a dual mission:

-To engage in research and development of the highest quality, and to be at the forefront of educational inquiry and innovation; and

-To use the knowledge gained in research to provide outstanding leadership, training, and service for the field of education, in order to enhance opportunities for diverse communities of learners.

Teacher preparation programs in the Graduate School of Education emphasize school reform, urban education, and the development of educator scholars through exemplary teacher education models. The preparation of teachers to meet the needs of the diverse student population of California schools is a high priority.

Teacher preparation programs are:

-Based on a clear theoretical and research base including the role and importance of language, the importance of development, and cultural differences in learning;

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

UC Berkeley teacher preparation programs offer:

-The opportunity to study with eminent scholars. Prominent faculty members are encouraged to participate directly in credential programs. Program faculty are specialists in their fields; having extensive experience as practitioners in the subjects they teach and supervise.

-The opportunity to complete professional training in diverse, multicultural settings. The Bay Area includes a wide variety of schools, allowing students to encounter a broad range of district policies, curricula, and socio-economic settings.

-The opportunity to benefit from faculty research related to practice; programs are designed to help teacher education candidates translate current research findings into professional practice.

-Innovative and model professional preparation programs, including a strong and integrated technology component. Also, all programs combine the credential with a Master of Arts degree.

-Strong grounding in academic disciplines. Programs emphasize the concepts, methodology, and current findings of the various disciplines fundamental to specific credential programs.

Institution/Program: **UC Berkeley**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

UC Berkeley's School of Education continued its involvement in the California College Preparatory Academy, a public charter school co-designed by UC Berkeley faculty and opened in 2005. Enrollment grew this year and the school now offers grades 6-10. Our science and math credential program continues to use the Cal Prep site for part of their required student-teacher placements.

Berkeley continues its work in the Performance Assessment of California Teachers consortium. PACT has been fully implemented in our three teacher preparation programs and is being used as one of our "high stakes" assessments of classroom teaching skills for Berkeley's teacher education graduates.

The School continued working on the Arts Education Initiative, partnering with IHEs and community art organizations to infuse the arts in teacher education and educational leadership preparation.

The School also continued working with the math, science, and engineering departments at UC Berkeley on Cal Teach - a program designed to prepare and support students interested in becoming K-12 math and science teachers. As part of Cal Teach, the School is developing a new course for teaching math and science.

An outgrowth of the work of our administrative services credential program (PLI), is the development of the Center for Urban School Leadership. The Center prepares supports, and sustains equity-minded and evidence-driven leaders in Bay Area urban schools. The Center is undertaking a strategic planning process

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC Davis**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

A core principle of the University of California, Davis Teacher Education Program is to prepare highly qualified teachers who are advocates for equity in learning for all students. We target inquiry about the role of teaching on student learning as the main vehicle to promote equity. We offer a 5 quarter credential/MA program leading to the elementary credential or secondary credential in agriculture, English, foreign language Spanish, mathematics, science, and social science. UC Davis continues to offer qualified candidates the option of enrolling in the BCLAD emphasis.

Our programs are particularly effective in preparing our candidates to work with K-12 students who come from culturally and linguistically diverse communities. Coursework includes methods of teaching a second language and developing academic literacy in all discipline areas. Collaborating K-12 teachers contribute to the programs by participating in the design of the curriculum, teaching some of the required courses, hosting student teachers; and participating in the screening and assessment of program applicants. We have been successful in maintaining a program commitment to creating and serving a diverse community of student teachers, with ethnic minority students representing at least thirty-five percent of our program enrollment.

Key to the success of our graduates is our program's focus on advocacy for equity in learning opportunities, the creation of small learning communities within each credential program, explicit instruction on discipline knowledge and the tools of inquiry essential to design and monitor instruction.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The design, implementation, and assessment of the UC Davis credential program is guided by its mission to prepare teacher-leaders who can assume four key roles in ethnically and linguistically diverse school communities. These roles are: 1) collaborative professionals who work with students, colleagues, and parents to forge effective teaching practice; 2) advocates for educational equity who champion high learning expectations for all students; 3) investigative teachers who employ classroom inquiry to improve teaching practice and create effective classroom communities; and 4) reflective practitioners who continuously examine, define and refine their teaching practice to promote student learning, targeting underachieving students as a particular focus. Students work with graduate faculty who engage in research about school-based teaching and learning, and with teacher education faculty who have substantive and exemplary discipline teaching experience in the public schools. The university faculty who supervise the student teaching field experience also instruct credential candidates in the teaching methods classes.

Our research on the UC Davis program accomplishments confirms that these four organizing roles provide our students with critical knowledge and tools for working successfully in California's K-12 classrooms. Seventy-three percent are teaching in schools with a student body that is at least 51% culturally diverse; 69% teach in schools that serve significant numbers of English learners. Feedback from employers and candidate self assessment confirms that our new teachers are well prepared to work in schools that serve culturally and linguistically diverse K-12 students.

Institution/Program: **UC Davis**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

During the program, all candidates engage in inquiry about their classroom practice. This powerful experience contributes to a richer understanding of teaching and learning. The steps of teacher inquiry in which our candidates engage include: asking questions about students' learning needs; designing an intervention around a set of instructional strategies to address these needs; and planning systematic ways to gather and analyze data to investigate the effects of the intervention.

Credential candidates develop habits of mind that enable these teacher leaders to make instructional decisions that further their students' academic achievement. Program-wide rubrics, developed by the faculty, are used in formative and summative evaluations of these inquiry projects. Our credential/masters graduates present the findings of their classroom teacher inquiry project at a symposium. Most subsequently present their findings to teachers and administrators in their schools and school district. As a result of these presentations, in a number of schools where our graduates work, instructional practices have been re-examined and/or changed.

The website to review the teacher inquiry projects is:
http://teach.ucdavis.edu/teacher_research

Embedded in the Program design are opportunities for candidates to develop instructional proficiency to meet the State's Teaching Performance Standards. UC Davis participates in the consortium which developed the PACT teaching performance assessment. Program faculty use the PACT for formative mentoring and

Institution/Program: **UC Davis**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC Irvine**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Teacher education programs at the University of California, Irvine are organized around the assumption that the single most important variable related to the improvement of schooling for all children is the quality of the teaching force. Our schools and teachers must be prepared to serve the needs of a highly diverse student population through practices which represent the very best theoretical and clinical perspectives.
Together, the clinical faculty created a mission statement embedded in the acronym TEACH to embody our commitments to our candidates:
•Think critically about the connection between educational theory and practice. •Engage, motivate & inspire all students. •Analyze student learning needs to design and implement creative instruction. •Collaborate to advocate for equity and diversity. •Hone classroom practice
To be highly competent in such a context, teachers must be reflective and proactive practitioners, prepared to make educational decisions based upon the needs of the students they teach and informed by the knowledge and realities of classroom practice, subject matter standards, and professional and ethical considerations. As proactive educators, teachers need to understand their own cultural and pedagogical references and develop sensitivity to the multicultural and multilinguistic contexts that characterize their classrooms. Knowledge of research and theories related to teaching and learning, habits of reflection-on-practice, skill in using various technologies and a disposition towards flexibility and purposeful change will enable teachers to make decisions that facilitate the learning of all students.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

UCI continued to pilot the Performance Assessment for California Teachers (PACT) in 2007-08, anticipating that the State would require its full implmenetation starting July 2008. This assessment continues to refine candidate performance with its concentration on planning, instruction, assessment of student learning, reflection, and academic language. The analysis of assessment results offers a guide to continuous improvement. That, combined with survey results from the beginning, middle and end of program help us respond to candidate feedback.

Institution/Program: UC Irvine

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

New research faculty have joined the Department of Education and provide instructional leadership to the credential programs. These researchers have made presentations and held discussions with other faculty as well as teaching key courses in the program.

A MAT/Credential Program Steering Committee comprised of Senate Faculty, the Teacher Credential Program Director, the Student Affairs Director, and a Program Coordinator provides leadership in admissions, program design and the improvement of curriculum.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC Los Angeles**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of UCLA's teacher education programs is to attract, prepare, and retain highly qualified teachers to work in urban schools that serve low-income children of color. At UCLA there are three pathways to attaining a credential: the Center X Teacher Education Program (TEP) which leads to a credential and Master's degree, TeachLA, a university internship program and the UCLA Extension Urban Internship program. TEP and TeachLA offer both Multiple Subject and Single Subject (in the areas of English, social studies, mathematics, music, and science) Teaching Credentials. The Center X TEP program has a joint mathematics/education program and science/education program for UCLA mathematics and science undergraduates. The UCLA Extension program offers a Multiple Subject Credential. TEP offers bilingual emphasis (Spanish) credential authorization (BCLAD).

The goals of these programs are to assist novice teachers in constructing communities of learning and inquiry for their students. In the UCLA programs, teachers develop the professional knowledge, skills, and beliefs necessary to engage culturally and linguistically diverse groups of students. UCLA is located in the heart of Los Angeles and the context for observation, participation, student teaching and teaching is in urban, low income partnership school districts that reflect the diversity of California's urban schools.

The recruitment of teacher candidates focuses on under-represented groups in the teaching profession. UCLA has been extremely successful in attracting and enrolling a candidate pool that mirrors the diversity of Los

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The commitment to blending research and practice is the most outstanding quality of our teacher education programs. Our philosophy stems from considerable literature on educational change, teacher development, and efforts to create more equitable schooling for low-income students, students of color, and students from diverse backgrounds. Our work with new teachers is more than the transfer of skills and knowledge; it helps them forge new identities as social justice educators as they work in urban schools.

Center Schools were created to form connections and relationships with the faculties, administrators and neighboring urban communities of specific school sites. These Center Schools, located in L.A. County, embody how the program's philosophy is put into action. TEP & Center School personnel select guiding teachers to mentor novice teachers; collaborate around issues of urban schooling & teacher education; and promote novice teachers' involvement & participation in the school. This unique partnership also reinforces the support mechanisms designed to improve teacher quality, development, and student learning.

To build on the program's presence at Center Schools, Neighborhood teams consisting of novice teachers in urban communities of close proximity are placed in specific school sites for course work, observation & participation, & student teaching. These on-site locations allow novice teachers to become an integral part of the school culture to learn about the school, its students, and its resources.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

During 2007-08, the Teacher Education Program finalized plans to implement a second literacy course for multiple subject candidates.

For single subject candidates, an additional content specific methods course is now integrated into the curriculum.

The program also completed an action plan to significantly change the number of teacher candidates assigned to each faculty advisor. The concept was based on reducing the size of each team to allow for greater individual support and supervision from the program's faculty.

Institution/Program: **UC Los Angeles**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC Riverside**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the University of California, Riverside's School of Education encompasses research, instruction and service. Research includes investigations of both fundamental and applied issues in education. The range of topics is diverse--teaching and learning, assessment and school organization, the subject matters, and school leadership. The School's agenda links scholars from a variety of social science disciplines and methods, along with foundational areas such as history and philosophy, around the theme of knowledge in practice. Instruction centers on engagement with knowledge, practice and policy and their relationship. The heart of the enterprise is the preparation of academicians and practitioners--teachers and administrators--who will serve as leaders by virtue of their ability to produce and mobilize useful knowledge. The establishment of a full-fledged professional program extends the scope of preparation back to undergraduate years and forward to post-credential induction years, and requires tighter integration of credential and academic programs. Students in all of our programs analyze complex problems; engage in spirited debates about public education, while concurrently spending significant time in the public school. The University's goal is to lead all students to high levels of academic achievement and performance, regardless of the circumstances of their birth and environment. We believe our role is to develop and implement credential and graduate programs of extraordinary quality. Through robust, committed partnerships with area schools, we believe we are in reach of our goal.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The UCR Graduate School of Education's partnership with the Tomas Rivera Library's Education Services was renewed. Education Services is a teacher resource center for K-12 curriculum materials which is located in the Tomas Rivera Library. The Center expanded their services to include some evening and weekend hours so UCR student teachers, interns and the campus community could obtain materials more easily. The staff worked closely with the Graduate School of Education to increase the awareness of their special collections and the services provided to our future teachers. The Center houses award winning children’s literature, lesson planning ideas, educational games, and manipulatives that students and teachers can utilize to support their instruction. Education Services also hosts the Learning Resources Display Center for Riverside County, where textbook publishers display their materials which have either been adopted or are being reviewed for adoption in California public schools.

Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

A number of changes have occurred to improve curriculum and advising for UCR candidates. The following is a few changes that have taken place:

1. A sequence of courses were created to support students in completing the teacher performance assessment;
2. Course prerequisites were revised to facilitate access to our program;
3. Unit credit was increased for the Education Specialist intern fieldwork;
4. A Student Handbook was created;
5. A Student Representative Committee was formed to increase and facilitate student input into program design and implementation;
6. The internationally reknowned researcher, Dr. Spencer Kagan, presented at the Graduate School of Education's Student Teacher Orientation.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC San Diego**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The faculty of Education Studies (EDS) at the University of California, San Diego are committed to equitable education for all children. We prepare new teachers to systematically reinvent their curriculum and pedagogy in response to the changing needs of their students and the community. EDS offers a 15-month graduate program leading to the Master of Education/California Preliminary Multiple Subject Credential and the Master of Education/California Preliminary Single Subject Credential in English, Mathematics or the Sciences. In addition, EDS offers bilingual emphasis (BCLAD) in Spanish-English and American Sign Language-English.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

To effectively facilitate the equitable participation of all children in public schools requires fundamental changes in our approach to teaching and learning. Standardized approaches to curriculum design and social and cultural awareness training are not sufficient preparation for teachers to make learning accessible and equitable for underserved children in our public institutions. EDS credential candidates learn to assess student and community needs, access and apply current research on teaching and learning, and systematically monitor their teaching performance using reflective practice portfolios. The goal of the program is to produce graduates who possess the knowledge, skills and confidence required to teach in low-income communities that are often challenged with large numbers of English language learners, low-income families, and a high teacher attrition rate.

Institution/Program: **UC San Diego**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

All Multiple and Single-Subject candidates will have successfully completed all tasks for the Performance Assessment for California Teachers (PACT) in order to satisfy the Teaching Performance Assessments requirement.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC Santa Barbara**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Santa Barbara Teacher Education Partnership believes:
o All our children deserve the education that few students currently have;
o The survival of our democratic traditions requires nothing less;
o Every member of a community has a stake and a role in the education of our children and the survival of our democracy;
o The best hope for our children and our country is to reconstruct the preparation, induction, and support of educators while simultaneously re-constructing the institutions responsible for that work.
This vision requires teachers who:
o Believe that all students want, and have the capacity to, make sense of their world;
o Believe that content -- the knowledge, skills, and dispositions teachers have to share (including a balance of skills-centered and meaning-centered approaches) -- will help their students make sense of their world;
To become teachers who embody these values and beliefs is a life long process. The goal of our program is thus, not to tell people how to teach, but to prepare people to learn from teaching (their own and others) so that they can, over time, become the teachers students and their families deserve. We prepare teacher through six inter-related program themes:
(a) Autobiography/Philosophy of Education, (b) Study of Children/Study of Schools,
(c) Methodological Competence, (d) Diversity, (e) Collaboration, (f) Reflection.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Instructional quality resides in the interactions among and between the student, the teacher, and the content. Therefore, the conversations and relationships that constitute our programs revolve around those centering elements of instructional quality. The Santa Barbara Partnership for Teacher Education believes this reality of teaching and learning is embedded within the California Standards for the Teaching Profession (CSTP). The curriculum, the teaching, the assessments, the partnership, and our research revolve around the CSTP.

Programmatic structures and processes that support our candidates' development towards meeting the CSTP include:
- A common, clear vision of quality instruction apparent in all coursework and field experiences;
- A curriculum grounded in substantial knowledge of child and adolescent development, learning theory, cognition, motivation, and subject matter pedagogy taught in the context of practice;
- An entire school year of field experiences carefully selected and maintained to support the ideas and practices presented in simultaneous, closely interwoven coursework;
- Well-defined standards of practice and performance that are used to guide and assess coursework and field experiences;
- Strong relationships, common knowledge, and shared beliefs among school- and university-based faculty;
- Extensive use of case study methods, teacher inquiry, performance assessments, and portfolio evaluation to ensure that learning is enacted in the crucible of classrooms and schools.

Institution/Program: **UC Santa Barbara**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **UC Santa Cruz**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The UC Santa Cruz campus offers 32 gradate programs. Within those programs, there are a range of options for concentrated study in a specialized field. Graduate study at Santa Cruz emphasizes close interaction between faculty and students, independent student research, supervised teaching experience, and interdisciplinary work. The UCSC teacher preparation program is a combined Masters of Arts in Education and credential program spanning five academic quarters including Summer. The program offers both the SB2042 Preliminary, Multiple Subjects and Single Subject credential. Single Subject areas offered are, English, Math, Science and Social Science. The Bilingual, Crosscultural Language and Academic Development (BCLAD) emphasis (Spanish) is also offered. The program seeks applicants from diverse cultural and linguistic backgrounds to teach in multicultural K-12 classrooms. Students are expected to integrate theory and practice in courses, classroom placements, and research projects.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The UCSC program conceives of teacher development as a seamless continuum beginning in the undergraduate years and extending throughout the teacher preparation program and beyond throughout the career of a teacher. Through our undergraduate Minor in Education and content -specific undergraduate pathway programs, UCSC provides undergraduates with opportunities to develop theoretical and practical understandings that will prepare them to pursue a career in teaching. Increasing numbers of graduates who have completed the Minor are enrolling in the UCSC teacher preparation program, enriching it with their academic background and classroom experience.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of La Verne**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of La Verne Teacher Education Program is approved under the California SB2042 requirements. Methodologies are integrated throughout to deliver comprehensive instruction to English learners and to work with special populations in the general education classroom. The BCLAD credential is also available. The program fosters prospective teachers' ability to: (1) create an environment that incorporates communication with students, (2) develop an appreciation for differences, (3) understand the basis for a healthy self-concept, and (4) develop self-awareness, all within the context of appropriate pedagogical skills. The Education Department Mission Statement supports this rationale: "The mission of the Education Department is to provide students with the knowledge, skills, and value orientation to become competent facilitators of human development. Small class size and access to professional staff characterize the education environment. Leadership is provided by motivated faculty who possess appropriate academic preparation, extensive practical experience, and excellent teaching. Program emphases are the development of self-awareness, celebration of diversity, growth in personal meaning and values, through a theoretical and applied knowledge base and diverse instructional methodology." University of La Verne's prospective teachers represent the diversity found in the student population of California, and the program is founded on the belief that all California teachers need a variety of skills to serve diverse populations. Students are trained on the main campus in La Verne, and off campus, in Bakersfield, Newhall, Ventura, Cerritos, Central Coast and High Desert.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Program excellence indicators are found in the following areas: (1) The quality of the reading preparation in the program: Candidates in the Multiple Subject program participate in a rigorous program of preparation to teach reading. Each student in both Multiple and Single Subject programs is independently visited and assessed by a reading supervisor two times during the semester, in addition to the assessment of teaching of reading by the University supervisor assigned to the candidate for student teaching. This emphasis on the teaching of reading and its success is supported by the 99% passage rate for the RICA in the 2004-2005 year. (2) The diversity of the candidates in the program, and the commitment to serve the needs of California's diverse populations: Candidates in the Multiple Subject Program and the Single Subject Program represent the diversity found in the classrooms in California. The candidate pool is 35% Caucasian, 35% Hispanic/Latino, 6% African American, 5% Asian, and 19% Other/Not Provided. The University believes that all teachers in California need a variety of skills to meet the needs of the K-12 students served. (3) Support Intern Teachers: The University is committed to support intern teachers. Weekly visits are a part of the student teaching phase, and the small class environment provides opportunity for learning growth in teaching strategies. (4) All four Teacher Performance Assessments are fully implemented. These assessments validate candidates' readiness to teach.

Institution/Program: University of La Verne

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

As the Teacher Education Program continues to prepare teachers for the diverse populations of the California schools, continual reflection and assessment of the program needs to occur. New initiatives to improve program excellence beyond the year 2007-2008 include: (1) Increase the number of full-time faculty to coordinate and teach in off campus sites: to date four full-time faculty coordinate the off campus sites. The goal is to add an additional full-time faculty in this capacity. (2) Hire faculty to represent the diversity of the candidates in the program and in the schools in California. Currently the full-time teacher education faculty is 60% white, 25% Latino, and 15% African-American. As the program grows, commitment to hiring diverse faculty is a priority. (3) Continue to keep the student foremost as the program grows: The University of La Verne prides itself on the student focus in the program. The small class, personalized nature of the program will be preserved as the program grows. (4) Development of a distance learning component to increase full-time faculty participation in quality control of the coursework being offered is proposed. A distance learning component for each course taught would insure continuity in coursework throughout the system. (5) Prepare for national accreditation through NCATE and continuing state CCTC accreditation in spring 2011. Assessment plans and the conceptual framework reflect the further development of the Teacher Education Program through preparation for this process.

Institution/Program: **University of La Verne**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of Phoenix**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

MISSION: is to provide access to higher education opportunities that enable students to develop the knowledge and skills necessary to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities.
PURPOSES: •To facilitate cognitive and affective student learning—knowledge, skills, and values—and to promote use of that knowledge in the student's work place. •To develop competence in communication, critical thinking, collaboration, and information utilization, together with a commitment to lifelong learning for enhancement of students' opportunities for career success. •To assess student learning and use assessment data to improve the teaching/learning system, curriculum, instruction, learning resources, counseling and student services. •To provide instruction that bridges the gap between theory and practice through faculty members who bring to their classrooms not only advanced academic preparation, but also the skills that come from the current practice of their professions. •To provide General Ed & foundational instruction and services that prepare students to engage in a variety of instructional curricula. •To use technology to create effective modes and means of instruction that expand access to learning resources and that enhance collaboration and communication for improved student learning.•To be organized as a for-profit institution in order to foster a spirit of innovation that focuses on providing academic quality, service excellence, and convenience to the working adult. •To generate the financial resources necessary to support the University's mission.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

INSTITUTIONAL PHILOSOPHY/PROGRAM FRAMEWORK
Learning is the key to any educational program. The University of Phoenix offers a teacher education program that is focused on P-12 student learning by improving the educator responsible for that learning. Candidates for this program have already earned a bachelor's degree and wish to gain the pedagogical skills and knowledge that will assist them in becoming competent and effective educators.

OUTCOMES
The teacher preparation program has been designed to connect teacher learning directly to P-12 curriculum standards and, therefore, classroom learning. Assignments and experiences are grounded in the P-12 classroom so that the candidate can immediately understand how to impact their own students' learning. Teacher candidates who complete the program will understand and have experience in:

-Teaching in Diverse Environments
-Learning Theory
-School Law and Ethics
-Classroom Management
-Curriculum Design and Assessment
-Instructional Strategies

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of Redlands**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of Redlands School of Education fosters a student-centered approach to learning in which candidates for teaching, counseling and administrative credentials and graduate degrees experience rigorous academic preparation, scholarly inquiry, and professionally supervised field experiences that blend theory and practice. All of our programs carry forth our mission to provide skills in realizing educational equity for all learners, promote social justice, and nurture personal growth through reflection and self-evaluation. We are keenly aware our students will serve a widely diverse student population and they must be well prepared to work toward achieving effectiveness with people from diverse cultural and linguistic backgrounds. Our Preliminary Teacher Credential Preparation Program which is aligned with SB 2042 serves both undergraduate students and working adults who attend evening classes. Courses are offered on campus as well as at some area school and district sites.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The University of Redlands School of Education is proud of its tradition of academic excellence through its implementation of innovative programs. Its diverse faculty adherence to effective practices that are informed by research and theory, small class size, and infusion of technology, classroom management, and language acquisition-related issues throughout each course and across the curriculum contribute to program excellence. The new school facility allows for student meetings, professor-students conferences, student group projects, and computer work through TaskStream, Blackboard, Powerpoint, Inspiration, and other technological tools.

Institution/Program: **University of Redlands**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of San Diego**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of San Diego is an independent Catholic institution located in San Diego, founded in 1949 by the Catholic bishop of San Diego and the sisters of the Religious Congregation of the Sacred Heart. In 1972 the colleges and law school merged to form the University of San Diego. Today, the USD is a nationally ranked institution with more than 7,000 undergraduate, graduate and law students. USD includes a School of Leadership and Education Sciences, a College of Arts and Sciences, a School of Nursing and Health Science, a School of Law, and a School of Business Administration and Engineering. USD offers the doctorate (Nursing D.N.P. and Education Ph.D.), the J.D. (Law), the master's degree in thirty fields, and undergraduate majors in thirty-five fields. USD's mission statement is: "The University of San Diego is committed to advancing academic excellence, expanding liberal and professional knowledge, creating a diverse and inclusive community, and preparing leaders dedicated to ethical conduct and compassionate service."

The mission of the School of Leadership and Education Sciences (SOLES) is derived from that of the University. It shares a commitment to principles associated with respect for human dignity. Faculty, students, and staff are dedicated to the pursuit of truth, academic excellence, and a community enriched by a diversity of viewpoints. This commitment manifests itself in a dedication to provide and instill consistent leadership regarding issues of social justice. As a result, faculty infuse all programs and courses with values, concepts, and themes that help students become knowledgeable, reflective, ethical, and committed leaders and advocates who improve the lives of others.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

SOLES' Department of Learning and Teaching prepares candidates in Multiple Subjects and Single Subject credentials, Level I and II Education Specialist credentials (including a Level II Deaf/Hard of Hearing credential offered in collaboration with the John Tracey Clinic in Los Angeles. M.Ed. and M.A.T. programs are also offered by the department. Teacher credential programs are open to USD undergraduate students and holders of bachelors degrees.

SOLES teacher candidates are assessed using the Performance Assessment for California Teachers (PACT). 2007-2008 program improvements: SOLES hosted a PACT Scorer Training to involve more full- and part-time faculty in the process. Also in 2007-2008, the diversity of candidates' fieldwork experience was enhanced by hirng five new student teaching supervisors.

Faculty and administration identified the coordination of field experiences for candidates as an area that needed examination and updating. The decision was made to reevaluate the structure and administration of candidate fieldwork experiences in Multiple and Single Subject credential programs.

Institution/Program: **University of San Diego**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

A new pathway to a single subject credential was approved in Spring 2008 and the first cohort was accepted for Fall 2008. The Masters Credential Program combines a Single Subject credential program with a masters degree in education which can be completed in 15 months. Program students will participate in in a full year of student teaching providing greater integration of theory and practice.

The Special Education program began preliminary preparations for developing the approval document for incorporating the English Language Learner in all Special Education programs. In addition, Special Education is preparing to integrate the 2009 Standards when they are approved.

For Further Information Regarding the Teacher Preparation Program, visit the program website at:
www.sandiego.edu/soles/

Institution/Program: **University of San Diego**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of San Francisco**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The University of San Francisco, the City's first institution of higher education, was founded by the Society of Jesus in 1855. The University's academic philosophy emphasizes enrichment of personal values, expression of personal responsibility, and lifelong learning. The USF School of Education links instruction, research, and service in a manner that reflects the intellectual, ethical, and service traditions of Jesuit education. Teacher credential programs within the School of Education recruit and prepare candidates for the mild/moderate education specialist and the multiple and single subject preliminary (SB 2042/1059) credentials with option to add a Bilingual (BCLAD) emphasis. The education specialist credential, in the Learning and Instruction Department, is a two year internship program. The Teacher Education program also provides internship opportunities in the multiple and single subject credential programs. Our programs emphasize preparation to serve children in multicultural and multilingual urban schools. Consistent with the mission of the University, our programs aim to develop educational leaders who will work for justice for all people and who will shape a multicultural world with creativity, generosity, and compassion.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Mild/Moderate Education Specialist Credential Program, a two-year on-the-job training program, is housed in the Learning and Instruction Department. Curriculum is taught by faculty and doctoral students in Special Education. Instruction is aligned with job demands. Upon completion of the 37-unit credential program, candidates are eligible to earn a Masters degree by completing 6 additional units. On an intern credential, candidates earn a teacher's salary and benefits. Scholarship funds are available (AmeriCorps Education Awards program).

The Multiple and Single Subject Preliminary (2042/1059) Credential Program, with option for a Bilingual emphasis (BCLAD in Spanish), is housed in the Teacher Education Department. An internship program, similar to the Special Education program, is available. It provides on-the-job training during which candidates earn a teacher's salary and benefits while completing credential requirements. Combined credential/masters programs vary in units depending on the options selected, but typically take two years. Masters options (6) include the Master of Arts in Teaching, Digital Media and Learning, Teaching English as a Second Language, Teaching Reading, and Catholic School Teaching or Catholic School Leadership. The curriculum focuses on foundational studies and emphasizes three core themes: philosophical inquiry into educational problems and practices, education as an instrument for promoting a more just society, and concern for the individual developmental needs of children and adolescents. Scholarship funds are available (Title VII grant, AmeriCorps Education Awards program).

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of Southern California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The mission of the USC Rossier School of Education to improve urban education locally, nationally, and globally. Educators in urban areas face a unique set of challenges, including poverty, density, mobility and immigration, strained social conditions around housing, healthcare and crime, and cultural and linguistic diversity. Urban education takes place within many contexts including prekindergarten through high school, in human services settings, in higher education and in diverse workplace settings.

We seek to transform urban education by:

•Preparing and developing educational leaders who are change agents with a commitment to improving urban education and competencies to address the complex educational and social issues facing urban communities.

•Leading the search for innovative, efficacious, and just solutions to the challenges in urban education by engaging in research on educational practices and policy.

•Creating mutually beneficial partnerships to rethink curriculum, improve educational environments, and develop sound policy.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Program qualities, which contribute to program excellence of the RSOE, can be viewed in the school's fidelity to the following principles – extensions of its conceptual framework:

1. All children have the potential to learn rigorous content and achieve high standards.
2. Our educational system must guarantee a learning environment in which all children can learn and achieve their own kind of individually configured excellence and which nurtures their unique talents and creativity, and incorporates the diversity of their experiences into the learning process.
3. We will graduate teachers who can support the intellectual, social, emotional, moral and physical development of students, respond with flexibility and professional judgment; and actively engage them in their own learning so they can use and generate knowledge in effective and powerful ways.
4. We believe teaching and learning comprise a holistic process that connects ideas and disciplines to each other and to the personal experiences, environments and communities of students. Consequently, the process of teaching must be dynamic and reciprocal, responding to the many contexts within which students learn.
5. We believe professional teachers assume roles that extend beyond the classroom and include responsibilities for connecting to parents and other professionals, developing the school as a learning organization, and using community resources to foster the education and welfare of students.
6. We believe teachers' professional development occurs during the course of an entire career.

Institution/Program: University of Southern California

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The USC teacher preparation faculty has just completed a year self-study, culminating in the design of the new MAT@USC. The redesign of the MAT (Masters of Arts in Teaching) was intended to improve practice in the preparation of pre-service teachers in response to state requirements, emerging research trends in the field, and to follow the tradition of research universities of providing leadership models of exemplary practice in the field. The changes are based on agreement among the faculty about what constitutes problems with traditional methods of preparing teachers, referred to as "Problems of Practice". These "Problems of Practice" frame each syllabus, with regard to how the syllabus will cause teacher candidates to be aware of and address them within the content of the course.
The revisions are also based upon presenting teacher candidates' learning through a socio-cultural approach, so they in turn can understand this as an approach to present learning in their own future classroom. The socio-cultural approach is based upon the idea that 1) learning to teach must be anchored with an understanding of oneself, the learner and the community, 2) understanding learning is central to effective teaching, 3) good teaching is about creating relationships with children, and 4) teacher candidates' learning occurs when a program either elaborates or disrupts the cognitive schema that pre-service teachers enter the program with. The program highlights a focused inquiry approach, with purposeful questioning to help teacher candidates understand the complexities of teaching underserved populations.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **University of the Pacific**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

The Gladys L. Benerd School of Education at the University of the Pacific prepares thoughtful, reflective practitioners at undergraduate, Master's, and doctoral degree levels for service to diverse school populations. School of Education faculty strive to research the needs of schools and communities and foster the intellectual and ethical development of professional education candidates through personalized learning experiences.

Our degree and credential programs in Multiple Subject, MS-BCLAD, Single Subject, Mild/Moderate and Moderate/Severe Disabilities prepare candidates to teach all students in CA schools. Single Subject content areas include English, Social Sciences, Mathematics, Sciences, Physical Education, Spanish, Art, and Music. Undergraduate candidates complete a Liberal Studies major or a Single Subject content major, along with professional education coursework, during a four-year bachelor's degree program. Graduate candidates can pursue an M.Ed. to complete a preliminary credential. All teacher education programs emphasize content expertise, pedagogical skills, (especially with culturally diverse and special needs children and youth), teaching literacy and reading, instructional assessment skills, classroom technology skills, and commitment to teaching in public schools. Candidates benefit from field experiences and student teaching assignments in K-12 classrooms, primarily in ten school districts in the Stockton area of San Joaquin county. These schools reflect the richness and growth of ethnic, linguistic, and economic diversity in CA's Central Valley. All programs in the School of Education, baccalaureate through doctorate, are accredited by the CCTC & NCATE.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The teacher education credential programs used feedback surveys from cooperating teachers, student teachers, university supervisors, and graduates one year into their teaching positions. Data from our surveys were used for teacher education program review of courses and experiences. Program faculty focused on articulation among courses in teacher education to accommodate new assignments, new instructors, and to improve content delivery and field-based experiences. Also, the program sent instructors to the PACT consortium for the Teaching Performance Assessment system calibration. The faculty continued a pilot for fall semester 2007 through Spring 2008 for student teachers and interns to use the PACT Teaching Event.

We continued to work with teachers in the Lodi USD, providing cooperating teacher forums. We work with Aspire Schools for fieldwork placements in math and science. We continue field placements in selected Stockton USD schools.

The Education Specialist Program also developed signature assignments. Work on the English Language Authorization submission to CCTC was completed. Special topics courses in Autism and Bi-Polar Disorders were offered. A bachelor's degree program for paraprofessionals was continued with a new cohort group in Fall 2007.

Institution/Program: University of the Pacific

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The teacher education programs required the Performance Assessment for California Teachers (PACT)in the fall semester 2006 and continuing throughout 2007 to present with credential and master of education candidates. All student teachers and interns in the spring semester 2007, fall semester 2007, and spring semester 2008 completed the PACT Teaching Event protocol, again, as a pilot prior to full implementation targeted for fall semester 2008. Four program faculty were trained by the PACT consortium to do scoring of the Teaching Event/Experience protocol for literacy and mathematics in April and May 2007 and in February 2008. These scorers will score the PACT Teaching Event/Experience in fall semester 2008 and thereafter. A Teaching Performance Assessment will be required for new candidates after July 1, 2008.

The Curriculum and Instruction department completed CCTC program standards for the Multiple and Single Subject credentials (Standards 19, 20, and 21), due by January 1, 2008.

The new Biennal Report was completed according to deadlines for the orange group in the accreditation cycle for CCTC by October 15, 2008. Our program submitted our program documents and assessment plan on February 1, 2009.

The teacher education faculty revised prerequisite courses in the teacher education program to articulate themes, assignments, and assessments. New courses were submitted with new coding prefixes and course numbers in December 2008 to university committees. The Education Specialist programs will be revising courses and implemented changes based on revised and new standards.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Vanguard University of Southern California**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Vanguard University's Graduate Program in Education is authorized by the California Commission on Teacher Credentialing under SB 2042 guidelines to offer a Multiple Subject Credential, Single Subject Credential and a 5th Year Clear Credential. Eligible students may apply their Vanguard University (VU)credential coursework or district induction work toward the Master of Arts in Education. The program is dedicated to a highly personalized approach to teacher education and graduate training.

The mission of the Graduate Program in Education is to provide a supportive, reflective learning community in which teachers develop the professional relationships, skills, and knowledge base necessary to empower ALL students to reach their highest potential. This program integrates vibrant Christian faith with all facets of learning and life.

A former Superintendent of Schools of a large urban district in Orange County commented, "What I love about teachers from Vanguard University is that they see teaching as a calling, and not just a job." This sense of calling permeates all aspects of teacher preparation at VU. Our institution is committed to preparing candidates to teach in schools with highly diverse student populations, such as those in our partner school districts.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Vanguard University offers students a community of support, personal attention, and challenging preparation for their calling to teach. Our belief is that every child is precious, full of potential, worthy of our best efforts, and capable of becoming thriving, contributing members of a colorful, culturally-diverse world. These core attributes and beliefs create the environment in which candidates can blossom and grow as they recognize their own worth and promise.

Candidates also find strong mutual support, since they travel as a cohort, developing strong collaborative relationships with their peers throughout their professional training. This strong mutual support is fostered and encouraged by Vanguard University faculty. The faculty includes outstanding scholar practitioners with doctoral degrees and excellent records of accomplishment.

Vanguard University's Teacher Education Advisory Council (TEAC), made up of teachers and administrators in local partner school districts (such as Newport Mesa Unified, Santa Ana Unified, Anaheim City, Saddleback Unified and Capistrano Unified School Districts), offers outstanding guidance to the program on issues of program quality and candidate preparation. Our University Supervisors and adjunct faculty members are of the highest quality. Our partnerships with local school districts are strong and continually growing.

Institution/Program: **Vanguard University of Southern California**

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Western Governor's University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Western Governors University (WGU) is the only regionally accredited university in the U.S. offering competency-based, online degrees. WGU was founded by the governors of 11 western states (a number that has since grown to 19 member states) who anticipated the potential of distance learning technologies to assist in addressing one of their most pressing problems—rapid population growth confronted by limited public funds for educational services. The university was incorporated in 1997 and enrolled its first degree-seeking candidates in 1999. The Teachers College enrolled its first candidates in March of 2003, and has as a consistent element of its mission to be a truly national college of education, providing avenues for certification in all 50 states and the District of Columbia.

Institutional Vision and Mission: Western Governors University's vision is to deliver exemplary, lower-cost higher education opportunities; and, as a result, be recognized as the premier competency-based, online, and truly national university.
The mission of Western Governors University is to improve quality and expand access to post-secondary educational opportunities by providing a means for individuals to learn independent of time and place and to earn competency-based degrees and other credentials that are credible to both academic institutions and employers.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Bachelor of Arts in Interdisciplinary Studies builds logically on the University's general education foundation. Currently, the program is approved for initial licensure in CA, TX, and NV. Over the past eighteen months, the program has gained acceptance in 19 additional states. As a result, through these program agreements and additional reciprocity agreements with other states, students matriculated in the elementary education pre-K – 8 B.A. degree programs are eligible for initial teacher licensure either through acceptance/approval or reciprocity in 48 of the US, Washington, DC and Guam. The path students take to licensure is carefully monitored by WGU-TC staff to assure that it is the most cost-effective and least duplicative for the student.

Our assessment items are of two types: 1) objective test items for comprehensive competency exams, and 2) performance tasks. The faculty helped to rewrite performance tasks, realign aspects of the grading rubrics and identify learning resources for sourcing the tasks. We hired outside writers to help our faculty write objective assessment items and align them to resources. Over the course of these six months, we will write, review and edit more than 1500 juried test items to flesh out our database while increasing our item pool. We apply a robust, multi-level review process of style, content, and contextual fit to all items we develop. This resulting increased item pool will enable multiple versions of each assessment that can be provided for our students.

Institution/Program: **Western Governor's University**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Many challenges face us in the degree programs as we address credentialing and licensing students that complete our academic programs. Most universities license students in one state. We are working to license in all fifty states. Placing and supervising students wishing to certify in all fifty states (not to mention constant pressure to offer Demonstration Teaching experiences outside the fifty states) is a constant challenge to Teachers College staff. We are challenged on a daily basis to keep our processes up to date, require the appropriate assessments, and to keep the licensure processes as simple as possible for WGU students. Managing the many individual state requirements has required the addition of staff to the administrative arm of the Teachers College.

Perhaps the greatest challenge in the degree programs is articulating the nature of the program to prospective students. Student survey results indicate that students often find the programs confusing and they don't always know what to do next. Students enter WGU degree programs with an unreasonable sense of the time commitment one must make in order to complete their degrees and gain initial certification within 48 months (the traditional time to completion expectation for bachelor degree programs). Another area of frustration for students is the twelve-week requirement for Demonstration Teaching. Adult students with full-time jobs and family obligations have a difficult time quitting their jobs in order to complete this requirement.

We are scheduled for a March 2009 California site visit to review our multiple and single subject programs, as well as our internship programs.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Westmont College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Within the Christian liberal arts context, the Westmont teacher education program strives to develop reflective teachers who meet the needs of all learners through integrated and balanced instruction, who embrace the moral dimensions of teaching, and who desire to grow professionally.

DEFINING PRESUPPOSITIONS OF TEACHER EDUCATION AT WESTMONT COLLEGE

Teacher Education is a developmental process. Both learning and teaching are developmental in nature. Therefore, learning experiences must be meaningful and must intentionally contribute to the learner's lifelong cognitive, moral and personal development.

Teacher Ed should be reflective, integrational and balanced in nature. The best teachers are the best learners. They are able to make their own and their students' intellectual scaffolding. They do not throw aside time tested strategies as new approaches appear on the horizon, but rather evaluate and integrate to achieve an effective balance.

Teacher Ed must embrace all learners. Effective teachers recognize that they are called to meet the needs of all the students in their classroom regardless of ethnic, linguistic, racial, socioeconomic diversity and special needs.

Teacher Ed must embrace the moral dimensions of teaching. Teaching is essentially a moral endeavor. An effective teacher needs a personal sense of vocational calling. She/He must be motivated by a sense of passion for teaching/learning and be concerned with shaping an ethical community within the classroom and the school environment.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

PROGRAM DISTINCTIVES OF TEACHER EDUCATION AT WESTMONT COLLEGE

Small is good:

Teacher Education at Westmont is characterized by a small full time faculty who share responsibility for advising, teaching core curriculum and supervising student teachers. Cohorts of candidates are small as well, never more than 30 to 35 in the one year program.

Connectedness is essential:

Because the department is small, the faculty can provide connectedness in the following ways:

The Education Department is coherently connected to the College as a whole and finds the context of the Christian liberal arts an effective, supportive growing ground for teacher education.

Faculty in teacher preparation have chosen to work as a team. We see ourselves, not as researchers and specialists, but as practitioners, generalists and team players modeling the kind of collaboration and support needed in public school faculty. We also work as a team in reviewing and evaluating work of candidates and

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **Whittier College**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

Whittier College, nationally recognized for its outstanding liberal arts curriculum, has a tradition of excellence in the preparation of teachers and school administrators. Undergraduates seeking to prepare for teaching careers develop subject matter expertise by completing a high quality academic major and an interdisciplinary liberal education curriculum. At both the undergraduate and graduate levels, an in-depth study of various pedagogical issues as well as theoretical and philosophical perspectives occurs within the context of the liberal arts.
Whittier College's education programs include an undergraduate minor in education, graduate credential, and Master of Arts in Education degree programs. Currently, the college offers the following Preliminary teacher credential preparation programs: (1) Multiple Subject and (2) Single Subject.
Teacher education programs at Whittier College are grounded in a set of guiding principles. Among others, these include commitments to: (1) developing a constructivist approach to learning and teaching; (2) valuing cultural and linguistic diversity and supporting all students' learning; (3) establishing a climate which promotes fairness and respect, along with both independent and group learning; and (4) growing professionally by continually reflecting on one's practice and pursuing other opportunities for learning.
Teacher preparation programs at Whittier College are strongly supported by fieldwork experiences in local schools. Many of the program graduates choose to remain in the greater Los Angeles area serving children and youth in socio-economically, ethnically, and linguistically diverse communities.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

Intensive and varied fieldwork experiences are embedded in all Whittier College teacher preparation coursework. Typical experiences include tutoring individual children in literacy skills; working with individuals and small groups of children in an after-school computer-based program; conducting interviews with students and families with respect to language and cultural issues; and observing and working in elementary and secondary classrooms. Broadoaks, a campus demonstration school renowned for its developmental program, provides additional opportunities for observation and supervised practice to both undergraduate and graduate students. Given the small size of teacher preparation classes and the commitment of full-time faculty to teach and supervise pre-professional fieldwork, Whittier College teacher candidates have high quality professional preparation experiences that closely connect theory and practice.

Cross-cultural perspectives are central to Whittier College's mission. A hallmark of the institution's programs is the diversity represented in our student body. Among teacher candidates, there are numerous ethnically and linguistically diverse, first-generation college students who are readily able to serve as role models to K-12 students with respect to emphasizing the value of education. A respect for diversity is also highlighted in departmental standards, which complement the current California Standards for the Teaching Profession. Throughout course work, field experiences, and student teaching, candidates are expected to demonstrate (1) respect for diverse perspectives;(2) commitment to fostering learning; and (3) equitable behavior toward all of the school community.

Institution/Program: **Whittier College**

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

The California TPA (Teacher Performance Assessment)program has been fully implemented for all mutiple and single subject credential candidates. Department faculty members have participated in TPA assessor training to ensure that relevant practice and support for successful candidate completion of the tasks is imbedded in all credential coursework. In addition, review workshops are offered prior to each RICA (Reading Instruction Competencies Assessment)testing date for multiple subject candidates.

Part D: Accreditation Status of the Teacher Preparation Program

This teacher preparation program is currently approved or accredited by the State of California, and is not designated as a "low performing" program as defined by the State.

Institutional Report of Teacher Preparation Programs in 2007-2008
(Annual Report Pursuant to Federal HEA, Title II, Section 207)

Institution/Program: **William Jessup University**

Part A: Optional Qualitative Information about Each Teacher Preparation Program

Institutional Mission and Context for Teacher Preparation Programs:

William Jessup University's Credentials with Character teacher preparation program prepares and supports professional educators for successful careers in both public and private school systems. The department is committed to instilling faith in the Bible, Jesus Christ, and the Church, while promoting a program that is recognized for excellence in the education community. Graduates of the Credentials with Character program will have the skills to engage students, make subject matter comprehensible, plan and adapt instruction, and assess student learning. As professional educators, they will be leaders on school campuses and strive to continue to develop as educators and people of faith.

The Credentials with Character (CWC) program is fully compliant with SB 2042 and has a focused emphasis on character education. The CWC program can be completed in either a four-year undergraduate or a one-year post-baccalaureate format. In the undergraduate format, the student completes concurrently a bachelor of arts degree with a major in liberal studies, a minor in Bible and theology, and the requirements leading to a recommendation for a California preliminary multiple subject teaching credential.

For those already possessing a regionally-accredited bachelor's degree, the CWC program is offered in a post-baccalaureate format.

The experienced faculty teaches and develops character growth in the candidate. Integration of faith and learning allows the candidate to grow personally and professionally, allowing each to develop into a positive change agent.

Program Qualities that Contributed to Program Excellence or Effectiveness for Candidates During 2007-2008

The Credentials with Character (CWC) program distinctives include:

* Christ-centered, faith-based courses
* Character development
* Experienced, highly educated faculty
* Smaller classes
* Personalized advising
* Accessible credential analyst
* Ample fieldwork opportunities in local school districts
* Institutional job fair
* Mock interviews for program completers
* High placement rate in public and private schools

The CWC program has required candidates to successfully complete all four TPA projects since the inception of the program at William Jessup University. The rigor of the preparation program has led to a high placement rate for graduates of the program.

Part A (continued):
Optional Qualitative Information about Each Teacher Preparation Program

New Initiatives to Improve Program Excellence or Effectiveness that Were Not Yet in Place in 2007-2008

Upon recommendation of an outside consultant, student teaching fieldwork experience was expanded beginning Fall 2007 from ten weeks to eighteen weeks.

In order to improve transferability into the Credentials with Character undergraduate program, articulation agreements with area community colleges have been developed and posted on the www.jessup.edu website.

Additional TPA assessors were trained and calibrated to provide authentic input for program enhancement.

University goals were aligned with CCTC program standards and course content.

TPA projects are now submitted and scored electronically.

MOU's were established with partner schools.

University supervisors were added. Adjunct faculty have been given an expanded role regarding program improvements.

For Further Information Regarding the Teacher Preparation Program, visit the program website at:
www.jessup.edu

Part B: Quantitative Information about Each Teacher Preparation Program

Number of Candidates Who Completed One or More Courses During 2007-2008 in a Program Which Included Supervised Student Teaching or Internship Teaching

	Totals	Programs with Supervised Student Teaching	Programs with Internship Teaching
Multiple Subject Candidates	56	56	0
Single Subject Candidates	0	0	0
Education Specialist Candidates	0	0	0
Totals	56	56	0

Numbers of Candidates in Supervised Student Teaching/Internship Teaching During 2007-2008

	Totals	Admitted Candidates in Supervised Student Teaching	Admitted Candidates in Internship Teaching
Multiple Subject Candidates	17	17	0
Single Subject Candidates	0	0	0
Education Specialist Candidates	0	0	0
Totals	17	17	0

Institution/Program: **William Jessup University**

Part B (continued): Quantitative Information about Each Teacher Preparation Program

Number of Supervising Teachers During 2007-2008
(Includes full-time and part-time supervisors)

	Student Teacher Supervisors	University Intern Teacher Supervisors	District Intern Teacher Supervisors
Multiple Subject Programs	**2**	**0**	**0**
In Academic Positions with Rights and Responsibilities	1	0	0
In Non-Academic Positions without Rights and Responsibilities	1	0	0
Single Subject Programs	**0**	**0**	**0**
In Academic Positions with Rights and Responsibilities	0	0	0
In Non-Academic Positions without Rights and Responsibilities	0	0	0
Education Specialist Programs	**0**	**0**	**0**
In Academic Positions with Rights and Responsibilities	0	0	0
In Non-Academic Positions without Rights and Responsibilities	0	0	0

Ratios Between Student Teachers and Full-time Supervisors of Student Teachers During 2007-2008*

	Student Teacher Supervisors	University Intern Teacher Supervisors	District Intern Teacher Supervisors
Multiple Subject Programs	6 :1	0 :1	0 :1
Single Subject Programs	0 :1	0 :1	0 :1
Education Specialist Programs	0 :1	0 :1	0 :1

* *California teacher preparation programs do not typically have full-time supervisors. Ratios are based on budgetary equivalencies, which vary between programs. Therefore, caution should be exercised when making ratio comparisons between programs.*
