

Dominican University of California
Department of Education
Education Specialist & Dual Credential Programs Scope and Sequence
Fall 2013

All Education Specialist candidates, as well as multiple and single subject candidates, follow the same developmental sequence of courses, which are divided into three categories: (1) core courses; (2) pedagogy and reflective practice courses; and (3) supervised fieldwork. Each course in this sequence has been assigned specific Teaching Performance Expectations (TPEs) and Education Specialist program standards. Through this sequence of courses, candidates in both the student teaching and internship option have opportunities to understand, practice and apply pedagogical competencies as defined by the TPEs.

The following table illustrates the program course design:
