Availability of Program Completer Survey Data for 2014 Biennial Reports

2014 Program Completer Survey Data will be available beginning early October 2014. To ensure confidentiality, the Commission determined that only those demographic questions with a minimum of 10 responses would be reported at the program level. Responses to non-demographic questions will be provided to sponsors irrespective of the number of respondents. Institutions should encourage their completers to take the surveys to increase the data gathered on all questions in the survey. Although the October release date will not meet the Biennial Report deadline for the Indigo cohort, data can be included in SV documentation. These Data will be available for Biennial Reports for both Red and Yellow Cohorts.
