

Math and Science Teachers – where did they receive their bachelor degrees?

In 2009-10, more than 3,000 new single subject credentials were issued in Math and Science subjects*. At the state level, the total number of math and science credentials account for one-fourth of all single subjects recommended. The share of math and science bachelor degrees awarded and credentials recommended by the three higher education segments - California State University (CSU), University of California (UC), Independent institutions (IND), were different.

In 2009-2010, nearly half (44 percent) of the individuals who earned math or science credentials were recommended by CSU. Another 45 percent were recommended by IND. Nearly one-tenth (11 percent) were recommended by UC.
See chart on the left.

In looking at the number of bachelor degrees awarded for those recommended credentials in math and science in 2009-2010, CSU's share of bachelor degree (for those later certified to teach in these areas) was nearly half (49 percent) of the total bachelor degree at the state level. More than one-third (35 percent) of the math and science bachelor degrees were awarded by UC and little over one-sixth (16 percent) were awarded by IND.
See chart on the right.

*Data includes Math and Science teaching credentials recommended by IHEs only. Data includes intern credentials issued for Math Science by IHE segments also.
