Induction Program Design for Mentoring Clear Teaching Credential Candidates

Standard 1: Program Purpose
Each Induction Program must support candidate development and growth in the profession through designing and implementing a robust mentoring system as described in the following standards that helps each candidate work towards meeting the California Standards for the Teaching Profession.

Standard 2: Components of the Mentoring Design
The Induction program’s mentoring design is based on a sound rationale informed by theory and research, and provides multiple opportunities for candidates to demonstrate growth in the California Standards for the Teaching Profession. The mentoring approach implemented by the program must include the development of an Individualized Learning Plan (ILP) for candidates based on needs determined by the teacher, site administrator, and program provider and identified candidate competencies that support the recommendation for the credential. Mentoring support for candidates must include both “just in time” and longer term analysis of teaching practice to help candidates develop enduring professional skills. The program’s design features both individually and as a whole serve to strengthen the candidate’s professional practice and contribute to the candidate’s future retention in the profession.

Standard 3: Designing and Implementing Individual Learning Plans within the Mentoring System
The individualized learning plan (ILP) provides the road map for candidates’ induction work during their time in the program along with guidance for the mentor in providing support. The ILP is collaboratively developed at the beginning of induction by the candidate and the mentor, with input from the employer regarding the candidate’s job assignment, and guidance from the program staff. The ILP includes candidate professional growth goals, a description of how the candidate will work to meet those goals, defined and measurable outcomes for the candidate, and planned opportunities to reflect on progress and modify the ILP as needed. The candidate’s specific teaching assignment will provide the appropriate context for the development of the overall ILP; however, the candidate and the mentor may add additional goals based on the candidate’s professional interests such as, for example, advanced certifications, additional content area literacy, and early childhood education. Within the ILP, professional learning and support opportunities for each candidate are identified for candidates to practice and refine effective teaching practices for all students. The program assists the candidate and the mentor with assuring the availability of resources necessary to accomplishing the ILP. The program ensures dedicated time for regular mentor and candidate interactions and other activities contained in the ILP. In addition, the mentoring process supports candidate’s consistent practice of reflection on the effectiveness of instruction, analysis of student and other outcomes data, and the use of these data to further inform the repeated cycle of planning and instruction. Within the ongoing mentoring interactions, the mentor encourages and assists candidates to connect with and become part of the larger professional learning community within the profession.
**Standard 4: Qualifications, Selection and Training of Mentors**

The induction program selects qualified mentors and provides guidance and clear expectations for the mentoring experience based on the program’s design. Qualifications for mentors include but are not limited to:

- Knowledge of the context and the content area of the candidate’s teaching assignment
- Demonstrated commitment to professional learning and collaboration
- Clear Credential holder
- Ability, willingness, and flexibility to meet candidate needs for support
- Minimum of three years of effective teaching experience

Guidance and clear expectations for the mentoring experience provided by the program include but are not limited to:

- Providing “just in time” support for candidates, in accordance with the ILP, along with longer-term guidance to promote enduring professional skills
- Facilitation of candidate growth and development via providing modeling, guided reflection on practice, and feedback on classroom instruction
- Connecting candidates with available resources to support their professional growth and accomplishment of the ILP
- Periodically reviewing the ILP with candidates and making adjustments as needed

The program provides ongoing training and support for mentors that includes, but is not limited to:

- Coaching and mentoring
- Goal setting
- Use of appropriate mentoring instruments,
- Best practices in adult learning
- Support for individual mentoring challenges, reflection on mentoring practice, and opportunities to engage with mentoring peers in professional learning networks.
- Program processes designed to support candidate growth and effectiveness

**Standard 5: Determining Candidate Competencies for the Clear Credential Recommendation**

The Induction program must include a variety of assessments to demonstrate candidate progress towards mastery of the *California Standards for the Teaching Profession* and to support the recommendation for the Clear Credential. The assessments must be consistent with the learning and professional growth goals indicated within the Individualized Learning Plan.

Prior to recommending a candidate for a Clear Credential, the Induction Program sponsor verifies that the candidate has satisfactorily completed all program activities and requirements, and that the program has documented the basis on which the recommendation for the clear credential is made. The program sponsor’s verification is based on a review of observed and documented evidence, collaboratively assembled by the
candidate and the mentor and/or other colleagues according to the program’s design. The Induction program’s review includes a defensible process of reviewing documentation, a written appeal process for candidates, and a procedure for candidates to repeat portions of the program, as needed.

**Standard 6: Program Responsibilities for Assuring Quality of Program Services**
The program regularly assesses the quality of services provided by mentors to candidates, using criteria that include candidate feedback, the quality and perceived effectiveness of support provided to candidates in implementing their Individualized Learning Plan, and the opportunity to complete the full range of program requirements. Induction program leaders provide formative feedback to mentors on their work, including establishment of collaborative relationships. Clear procedures are in place for the reassignment of mentors, if the pairing of candidate and mentor is not effective.

The program provides a coherent overall system of support through the collaboration, communication and coordination between candidates, mentors, school and district administrators, and all members of the induction system.
