Strengthening Subject-specific Pedagogy in a Small-College Setting

Commission on Teacher Credentialing Webinar
March 23, 2011

Andrew Dean Mullen, Ph. D.
Chair, Department of Education
Westmont College
Santa Barbara, CA
Standard 8B

• A potentially vulnerable point for many of us?
• Green cohort: Prediction as of March 2009
• Not traditional orientation of department
• An on-going project! Strengthening!
• Fulfillment of 8B throughout Program as a whole
Program’s Institutional Context

- Undergraduate college of 1350 students
- Multiple Subject & Single Subject Programs
- 3 full-time faculty (2 new as of 9/09)
Mission Statement

Westmont’s Department of Education provides a supportive collegial community in which to acquire a rigorous, practical, and professional preparation for K-12 teaching. Building on teacher-candidates’ liberal arts education, our program is designed to develop exemplary instructional skills, habits of reflection, and moral and cultural sensitivities that promote lifelong learning of diverse students.

Overall orientation:

A “practical pragmatism” (Larry Cuban)
Context, continued

- Between 1998 and 2009: average of 3 SS credentials awarded annually (Past 3 years, average of 5; and trajectory of growth)
- Subject areas: English, History-SS, Math, Art, Physical Education, Science
- Approval to offer Music (2010)
And some final context

• Cohort model (September entry)
• Four or five-year option (majority 5)
• No waivers: all students qualify on basis of CSET
• Typically 4-5 pre-requisite courses completed prior to academic year in which credential awarded
• Most students continuing from Westmont; do accept candidates prepared in subject-area elsewhere
Coursework especially pertinent to Standard 8B
(see also Handout on Organization of all coursework)

Factors to which candidates & alumni attribute success: #1

1) Field work—
   - Semester long student teaching
   - Full-time, focused student teaching
   - Selection of mentors
   - Continuity of relationship with professors in role of supervisor
Opportunities for mentoring in field

<table>

</tr>
</tbody>
</table>
Factors to which candidates & alumni attribute success: #2

- Peer Teaching—getting comfortable with self in Teacher Persona
- Learning from modeling and counter-modeling of their peers
## Peer Teaching assignments

<table>

<td>• 1 major presentation to peers (not necessarily in the content area)</td>
</tr>
</tbody>
</table>
| Fall semester         | Content-area Pedagogy         | • Minimum of 2 whole-group lessons in field, in addition to required small-group and 1-on-1 instruction.  
| Fall semester         | Content-area Literacy         | • Peer teaching lesson (30 minute; videotaped) from mini-unit                                  
|                       |                               | • 20 brief presentations (10 minutes) modeling instructional strategies appropriate for content-area |
Factors to which candidates & alumni attribute success: #3

Modeling of professors in content area—in this case Westmont’s History faculty
Content-area Professors as Models

Well, they know I'm going into teaching...it's something we talk about.

From Dr. Mallampalli's example I've been inspired to talk about my own experience and travel...Like my kids are so excited when I show pictures from being in Europe.

Dr. Pointer in Recent American History modeled using lots and lots of different resources. Like he brought a whole stack of old Vanity Fair magazines from the library, and we learned about fashions during the 1920s.

Dr. Robins really emphasized the research and writing process, and that's helped me in teaching literacy strategies in history, and

Dr. Chapman tells stories, and brings us into history through stories....

So I use all of their different methods---they all modeled different parts of what's involved in teaching history.
Extract from “Ten Things You and Your Department Can Do to Support Future Secondary Teachers”

8. Deliberately and systematically (and PUBLICLY) reflect on the influence of K-12 teachers on your own intellectual and disciplinary development, and use positive examples from your own K-12 teachers (and/or your own K-12 development) in explaining concepts in your own teaching.

9. Get better acquainted with local teachers in general, especially in your disciplinary area—teachers at your church, the teachers of your own children and extended family, and so forth. Brainstorm ways to extend those relationships, through visits to Westmont (see #6), your own visits to a high school classroom, or creative ideas of your own.
Require more systematic/intentional reflection?

- One possible assignment—Activate candidates’ awareness of SSP strategies and skills, through written assignment on content-area professors as models and/or counter-models?
Specific assignments deliberately focused on building SSP skills

• Not necessarily raised by alumni & candidates, at least initially; or in some cases, unless prompted
Specific assignments deliberately focused on building SSP skills—I of II

</table>
| Fall semester    | Content-area Literacy              | • Analyze content standards pertinent to literacy and write on the role of literacy within the content area  
|                  |                                    | • Compile content-specific instructional strategies resource binder.       |
| January Session  | Secondary Curriculum & Instruction | • Join professional association & subscribe to discipline-appropriate professional journal  
|                  |                                    | • Summarize and present professional article in content-area              |
|                  |                                    | • Prepare syllabi for courses to be taught during student teaching        |
| Spring           | Full-time student teaching         | • Among other responsibilities, full teaching responsibility for school’s entire semester for three classes daily  
|                  |                                    | • Portfolio documenting fulfillment of TPEs                                |
Toward more systematic documentation

• Holistic assessments from cooperating teachers & alumni don’t suggest there’s a problem with substance of our candidates’ & graduates’ achievement, including fulfillment of 8B.

• However—Reflecting on treatment of 8b in our most recent program document: Opportunity to learn documented more thoroughly than demonstration of that learning.

• One next step, then: more systematically documenting the fine print of candidate’s achievement.
An exercise with the 8B History-Soc Sci standards

• Extracts from Essay #1 in recent candidate portfolio. See Handouts:

• Sample:...*I have worked hard at trying to make history relatable to the students. One way I have done this is by making connections between history and their lives today. For instance, when I was covering the Japanese Attack on Pearl Harbor, I related the response of many Americans to join World War Two to the American response to the terrorist attacks of 9/11 to go to war in Afghanistan and Iraq. By relating the content to today, it provides a base for students to understand the content and also an aid to help them remember Pearl Harbor....*
...Because a majority of my students are English Language Learners, most of them learn much more visually than they do simply listening to a teacher explain history. I choose my pictures carefully in order to catch my students’ attention. This is evident in my PowerPoint of the Civil Rights movement. I used pictures of Emmett Till’s open casket funeral to shock students into the injustices of racism in the South. I also used specific pictures of MLK Jr., Malcolm X, and Stokely Carmichael which show that all three were powerful speakers. In addition to the pictures, I kept the PowerPoint black and white to symbolize the civil rights struggle against blacks and whites.
What a hypothetical completed form might look like

- See Handout

Candidate self-assessment (Hypothetical example)
ED 121

Teaching History-Social Science in a Single Subject Assignment
As a summative in a Single Subject Teaching Classroom in Middle School, I have

<table>
<thead>
<tr>
<th>Candidate Self-Assessment</th>
<th>Hypothetical Example</th>
</tr>
</thead>
</table>
| 1. Demonstrated the ability to match the most important academic content standards for student performance with:
  a. Classroom instructional strategies and instructional materials
  b. Assessment strategies and tools
  c. Planning for extended instructional strategies for students with special needs
  d. The use of technology to support instructional strategies for students with special needs |
| 2. Planned instructional activities that align with the content standards, aligned with the needs of the students, and aligned with the needs of the school and community |
| 3. Developed instructional activities that promote the development of critical thinking skills in students, aligned with the needs of the students, and aligned with the needs of the school and community |
| 4. Implemented instructional activities that promote the development of critical thinking skills in students, aligned with the needs of the students, and aligned with the needs of the school and community |
| 5. Evaluated the effectiveness of instructional activities that promote the development of critical thinking skills in students, aligned with the needs of the students, and aligned with the needs of the school and community |

Theglobal (corrected spelling) view of world history and social science is often seen through a narrow lens, focusing on the conflict between East and West. To see this as a global perspective on world history and social science is to see how people from different cultures and times have understood and contributed to the development of human societies.

- Perspectives on the past from the United States and other countries of the world |

Convincing to a Review Team?

- Assuming you had access to candidate e-portfolios so as to be able to access quickly and easily the identified artifacts; and assuming that artifacts indeed reveal a depth and rigor in execution, would you be convinced? What more would you want to see?
Other possible future steps

1) Adding 10 hours to Fall Field Experience, so as to allow requiring additional structured Interviews and Observations with 2-3 identified local Subject-Area Super Stars?

2) Require use of teachers’ editions of textbooks during Fall Semester, to gain familiarity.

3) More systematic use of Subject-Area Practitioners in Content-Area Pedagogy course?

4) Requiring attendance at subject-specific professional conference?
