California public schools. In addition to the written Teacher Supply report, information on the educator supply dashboards was updated with the most recent data.

Shilpa Ram, Public Advocates, spoke about progress in the percentage of new credentials issued and the total teacher preparation program enrollment. She raised concerns regarding the percentage of waivers issued and the decrease in the number of teachers hired in the last two school years. She suggested the Commission gain access to comprehensive teacher program enrollment completion data to better understand the percentage of teachers who exit programs prior to earning their credentials and to establish a centralized hub that shows teacher vacancies across the state to guide new teachers in finding a suitable placement and to better understand teacher supply and demand. She also raised concerns regarding the continuing downward trend in Career Technical Education credentials issued and the demographic data which underscores the need to prioritize not only teacher recruitment but teacher retention and safe inclusive communities for all educators, and spoke about the need for robust investments in educator preparation, training and recruitment so that the diversity of the educator workforce will more closely mirror the student population.

Manuel Buenrostro, Californians Together, submitted a written comment and spoke on this item.
