

CODED CORRESPONDENCE

DATE:

January 4, 2010

NUMBER:

10-03

TO:

All Individuals and Groups Interested in the Activities
of the Commission on Teacher Credentialing

FROM:

Dale A. Janssen
Executive Director
Commission on Teacher Credentialing

SUBJECT: Expansion of Credentials Issued on the Basis of National Board Certification

Summary:

Assembly Bill (AB) 239 (Chap.316, Stats. 2009) was signed by the Governor on October 11, 2009. The bill has two provisions both effective January 1, 2010. One of the provisions is the expansion of the types of credentials that may be issued on the basis of National Board Certification (NBC). The second provision of AB 239 regarding special education district intern programs was distributed in Coded Correspondence 10-02.

Key Provisions:

The change in statute authorizes the Commission to issue a clear teaching or services credential based on NBC in a qualifying California credential area. The focus is primarily for individuals who have earned their teaching or services credential in another state. Individuals applying under this route are exempt from the basic skills requirement and all other credential requirements except if a prerequisite credential is required.

One additional change requires the Commission to issue an authorization to provide instructional services to English learners based on NBC. Individuals holding the appropriate California prerequisite credential may add an English learner authorization to an existing credential (with the exception of life credential holders) or be issued a separate Crosscultural, Language, and Academic Development (CLAD) Certificate. Holders of life credentials may only be issued a separate CLAD Certificate.

In the review of current NBC certificates, the subject area of health science was added for the Single Subject Teaching Credential. See the References section for links to the information leaflets for all new NBC areas.

The chart on the top of page 3 displays the additional NBC areas included in AB 239 and the corresponding California certification that the applicant will receive. For the Career Technical Education (CTE) Teaching Credential, the subject area of the NBC must align with one of the fifteen industry sectors that are listed on the California CTE Teaching

Credential. The eight NBC cluster areas are listed on the chart at the bottom of page 3 along with the corresponding CTE industry sector.

Individuals may apply directly to the Commission by submitting a photocopy of National Board Certification; completed application (form 41-4), a completed LiveScan receipt (form 41-LS) if not previously submitted to the Commission; and appropriate application processing fee. The Pupil Personnel Services in School Counseling or Teacher Librarian Services Credentials are also available through the Commission's Online Direct Application process (<http://www.ctc.ca.gov/credentials/online-services/default.html>).

Important Dates:

January 1, 2010 – Implementation date for provisions of AB 239

Background:

The Commission has issued clear teaching credentials based on National Board Certification since 1999. Originally certification was limited to out-of-state prepared elementary and secondary teachers and was later expanded to include teachers who obtained NBC after their California preliminary teaching credential was issued. The National Board expanded their subject areas in 2001 which allowed special education teachers to also qualify for this option.

The National Board for Professional Teaching Standards is an independent, nonprofit, nonpartisan organization that works to advance teaching quality through standards for accomplished teaching and its voluntary National Board Certification program.
