I. Program Purpose and Rationale for this Report

The primary purpose of the California School Paraprofessional Teacher Training Program (PTTP) is to create local career ladders that enable school paraprofessionals – including teachers’ assistants, library-media aides, and instructional assistants – to become certificated classroom teachers in K-12 public schools. This pathway to teaching program was established in 1990 by Chapter 1444 of the Statutes of 1990 (SB 1690, Roberti) and added sections 69619 to 69619.3 to the State Education Code (see Appendix A). The PTTP program was subsequently expanded by Chapters 737 and 831 of the Statutes of 1997 (The Wildman-Keeley-Solis Exemplary Teaching Training Act of 1997) which added sections 44390 to 44393 to the State Education Code (see Appendix B).

Section 44393 of the Education Code requires the Commission on Teacher Credentialing (Commission) to report to the Legislature regarding the status of the California School Paraprofessional Teacher Training Program. This report fulfills the Commission’s requirement to report to the Legislature the following information.

- the number of paraprofessionals recruited
- the academic progress of participating school paraprofessionals
- the number of paraprofessionals recruited who are subsequently employed as teachers in the public schools
- the degree to which the program meets the demand for bilingual and special education teachers
- the degree to which the program or similar programs can meet the demand if properly funded and executed
- other effects of the program on the operation of the public schools.

This report also includes the economic status of participants and information about the annual cost per participant based upon all state, local, federal and other funding sources.

II. Program Funding History

Although the initial legislation authorizing the California School Paraprofessional Teacher Training Program was enacted in 1990 and amended in 1991, funding for
implementation was not provided until the 1994-95 state budget. The PTTP was identified at that time as a pilot program, with a legislative requirement to recruit a maximum of 600 paraprofessional participants. Initial program funding in the 1994-95 state budget was set at $1.478 million in local assistance funds for program implementation, and $60,000 in funds added to the budget of the Commission on Teacher Credentialing to administer the program. These state operations funds were available for that fiscal year but were not included in subsequent budgets. For the other eleven years that the Commission has administered the program, administrative costs have been sustained in the base budget of the Professional Services Division of the Commission.

Subsequent expansion legislation (1997) required the PTTP to recruit a minimum of 600 paraprofessionals and established an expenditure cap of $3,000 in state funds per participant per year. However, no funding was allocated for the required program expansion. Additional funding became available in the 1999-2000 state budget through a $10 million program augmentation, bringing program funding to $11.478 million.

PTTP program funding was reduced in July 2002 in response to fiscal challenges faced by the state. The PTTP allocation was reduced from $11.478 million to $6.583 million. Although there have been increases in tuition costs, the PTTP received no funding increase since funding augmentation in 1999-2000. (Senator Jack Scott is addressing this issue thorough legislation in the 2007 legislative year.) The Budget Bill Act of 2007 allocated a PTTP per capita funding increase of $500. As of July 1, 2006, program funding increased from $6.583 million to $7.80 million and participants receive $3,500 annually to support their teacher certification goal.

Although funding has decreased over the years, interest in the program has not diminished. The program awarded a total of six new grants during two 2006-2007 Competitive Grant Processes (CGP). Programs awarded during the first 2006-2007 CGP, Merced County Consortium and Santa Clara County Office of Education, began operations during fiscal year 2006-2007. Four additional programs, Alameda County Office of Education, East Side Union High School District, Enterprise/Shasta County Consortium and the Los Angeles County Office of Education, all have implementation dates of 2007-2008. Data relative to the 2007-2008 programs will be included in the 2008 legislative report. The statewide PTTP served 1,755 participants during 2006-07 within thirty-three local school district/college and university partnerships. A complete listing of program sponsors and partner colleges and universities can be found in Appendix C.

III. Program Outcomes

As of summer 2007, 1,471 graduates of the California School Paraprofessional Teacher Training Program have successfully completed the program by earning a California Preliminary Teaching Credential. An additional 116 current program participants are presently serving as a teacher of record in K-12 public schools while completing a District or University Intern program (85 participants), or serving on an emergency or provisional permit (31 participants).

In 2006-07, the PTTP program served 1,755 participants who are working on completing their bachelor’s degrees and/or their professional teacher preparation. Of the 1,755 PTTP participants, 502 are enrolled at the Community College level; 772 are working on completing their B.A.
degrees at a California four-year college/university; and the remaining 481 are enrolled in the 
teacher preparation program at a California four-year college/university and/or a district or 
university intern program.

Current program participants represent a range of cultural and linguistic minority groups 
(including 830 Latino/Hispanic, 160 African-American, and 33 Southeast Asian participants, 
among others). Sixty-four percent of program participants are minority group members. Fifty 
one percent are fluent in another language. Approximately 35% of participants identified their 
household annual income range as being either (a) under $10,000 (168), or (b) between $10,000 
and $20,000 (416). Approximately 39% indicated they are heads of households and 34% pay all 
or part of their own medical insurance coverage. Seven hundred twenty-four participants (41%) 
also indicated that they are the first in their family to attend college.

IV. Program Policy Issues

A. Budgetary Constraints

Education Code Section 44393 requires that each participant shall receive no more than $3,000 
in annual financial assistance through the grant. The per capita increase that was included in the 
Budget Act of 2007 increased that amount to $3,500. Costs that exceed the annual $3,500 
expenditure cap must be paid by the participant.

Recent increases in undergraduate student fees at all three public systems of higher education in 
California have had a direct impact on the local program budgets. In 2006-2007, the annual 
undergraduate student fees are $6,780 for the University of California, $3,199 for the California 
State University, and $20 per unit for the California Community Colleges. Currently, 71% of the 
1,755 participants are enrolled in four-year institutions. Consequently, the $3,500 annual 
financial assistance provided by the state does not meet the tuition and academic needs of these 
participants, and results in local budget shortfalls to provide required services to participants. To 
address their program budget shortfalls, program sponsors urge participants to take advantage of 
available grants, scholarships and loans. Additionally, programs regularly use other sources of 
funding, including other grants, to relieve fiscal cost pressures.

B. Declining K-12 Enrollment and Effects of Class Size Reduction

The Class Size Reduction (CSR) legislation and the conditions that followed the implementation 
of this initiative continues to result in circumstances that affect the PTTP. Three factors occurred 
at the same time to cause an oversupply of elementary teachers. From 1997 to 2003 teacher 
preparation programs increased the number of teachers prepared to meet the demand generated 
by CSR. By 2003 the demand caused by CSR was met and leveled out resulting in a lower 
demand for teachers.

Local education agencies continue to face diminishing numbers of student enrollees and at the 
same time many districts have also reduced the scope of their class size reduction programs. This 
situation has further increased the potential oversupply of multiple subject credentialed teachers 
in certain areas of the state. The surplus of fully-qualified multiple subject credential holders
continues to be an obstacle for many recent paraprofessional program graduates who are seeking employment. The recent oversupply of elementary teachers, however, is likely to change in the near future with the anticipated retirement of thousands of veteran teachers.

As a result of these teacher demand forces, some paraprofessionals completed the program but were unable to immediately find a teaching job in the local area. One program reports that, for the past four consecutive years, the district had less than five multiple subject openings at the K-8 level, resulting in a loss of eight fully-credentialed PTTP graduates to neighboring districts. Another district reports that there is no need for elementary teachers within their district, and their PTTP participants are being encouraged to earn Single Subject and Education Specialist credentials. Other program sponsors no longer recruit paraprofessionals seeking multiple subject credentials. Instead, program sponsors have either redesigned or are in the process of redesigning their local projects to place a focus on recruitment of paraprofessionals seeking science, mathematics and special education certification.

Declining enrollment and oversupply of certain staff also adversely impact internship credential holders. In the past three years, the number of Multiple Subject internship positions has diminished from more than 3,900 in 2003 to 1,800 in 2006. Entering an internship program after completion of the B.A. degree is the preferred employment option for many PTTP participants, since serving on an internship credential also allows the holder to earn a salary while serving as a teacher of record. Due to the currently available supply of elementary teachers, however, districts frequently make the decision to employ a fully-credentialed teacher instead of an intern. When an internship option is not available in a school district or county office of education local program directors search for neighboring districts through which their paraprofessionals may complete their teacher preparation program. If, however, a paraprofessional does not qualify for issuance of an internship credential, the paraprofessional may sometimes be forced to make the difficult decision of requesting a leave of absence to complete traditional student teaching. This outcome presents a staffing hardship for the employer, and at the same time places a financial hardship on the participant because no salary is earned while the paraprofessional is on leave.

C. Balancing Home, Work and Educational Obligations

Paraprofessionals continue to cite the balancing of educational obligations with home and work as a significant challenge. Since the PTTP program began in 1994-95, the range of prior academic experience of program participants has varied from completion of little or no postsecondary coursework (0 - 6 units) to completion of extensive prior coursework (90 or more units). During their time in the PTTP program, all participants must continue to work as part-time paraprofessionals. They must also adhere to its academic standards, including completion of a minimum number of units per quarter/semester, and maintenance of a minimum grade point average. Most of the participants have families, and many function as the heads of their households. Because of these professional, academic and personal obligations, almost all program participants are part-time students. Taking all of these factors into consideration, it could take seven years or more of part-time study for a participant who began the program with little or no prior coursework to earn a baccalaureate degree and complete a teacher education program.
D. Reimbursement Requirement

Participants are subject to a reimbursement provision contained in Education Code Section 44393(d)(3) that mandates that “any participant who does not fulfill his/her obligations” (i.e., to graduate from an postsecondary institution with a bachelor’s degree, complete all of the requirements to obtain a multiple subject, single subject, or education specialist teaching credential, and complete one school year of classroom instruction in the district or county office of education for each year that he or she received assistance for books, fees and tuition while attending an institution of higher education under the program) must repay all of the assistance received from the program. Included in the same subsection of the law is a provision for deferral of reimbursement for those paraprofessional participants who are released from employment due to reductions in force.

As outlined in C above, many paraprofessionals enter the PTTP with few applicable college credits. It may take these individuals a longer time to complete the program and, in some instances, paraprofessionals who entered the program with full intention to become a certificated California teacher may be unable to continue due to reasons beyond their control. Nonetheless, current law requires these individuals to repay the support received if they are unable for any reason to complete the program in a timely manner and to serve as a K-12 teacher for the equivalent number of years that they received support. Funds recovered from dropped participants who fail to earn a teaching credential are reverted back to the Proposition 98 reversion account.

V. Description of the California School Paraprofessional Teacher Training Program

The California School Paraprofessional Teacher Training Program (PTTP) provides academic scholarships and other related academic support services to individuals, recruited from paraprofessional job classifications, seeking a preliminary California teaching credential as a K-12 teacher (with special emphasis on individuals seeking to become bilingual, special education, K-3, or teacher in another field of identified district need). PTTP programs are sponsored by local school districts, county offices of education and/or consortia that apply to the Commission for program funding based on a competitive grant application process. Although there is no legislative requirement for expenditure of matching local funds by program sponsors, participating districts are nonetheless responsible for local efforts in terms of recruiting and enrolling participants in the program, monitoring the progress of participants in accordance with each participant’s individual education plan, providing supplementary academic support services as needed by participants, and expending the state program funds in accordance with the approved program budget. Participants do not directly receive program funds. Instead, the program sponsor expends state program funds on behalf of the participants for the tuition, fees, books and other services at an institution of higher education (IHE) while the participant is completing his/her education and/or teaching credential preparation.
A. Number, Ethnicity and Economic Status of Paraprofessionals Recruited

Each year, through its web-based consent form process, the Commission collects data about the participants in the PTTP. These data are collected to assure accountability in funding and to provide information about those who participate in the program. In 2006-07, the PTTP enrolled 1,755 paraprofessionals. Sixty-eight percent of program participants responding to the question are minority group members. The same number of participants responded to the question asking if they are fluent in a second language. Of those, 51% stated that they are fluent in a second language. As described in this report, and as Table 1 shows, the PTTP serves a linguistically and culturally diverse group.

B. Economic Status of Participants

Of the 1,680 participants responding to this question in the annual participant data collection, 34% identified their household annual income range as being either (a) under $10,000 (168), or (b) between $10,000 and $20,000 (416). Table 2 identifies the income range for those paraprofessionals who responded to this question.

Commission on Teacher Credentialing
Paraprofessional Teacher Training Program Annual Report
October, 2007
One thousand six-hundred eighty participants responded to questions asking if they are the head of the household and if they pay for their medical benefits. Of those respondents, 39% indicated they are heads of households and 34% pay all or part of their own medical insurance coverage. Participants were also asked if they are first-generation college students. Of the 1,504 participants who responded to this question, 724 (41%) indicated that they are the first in their family to attend college.

C. Program Funding Levels

Table 3 shows the state funding level for each local PTTP program site for the 12-month period from July, 2006 through June, 2007. Although the use of state funds for program participants is capped at a maximum of $3,500 per participant per year, the actual annual cost per participant and the distribution of program resources per participant vary, depending on the following factors:

1. The numbers of participants who attend a community college (lower tuition and fee costs), and the numbers who attend a four-year college or university campus (higher tuition and fee costs)
2. The numbers of participants who complete the program and exit during the year
3. The amounts of local resources that are invested as in-kind contributions to the program by sponsoring districts
4. The availability of local resources to support program administrative costs, and the percentage of state funding that support these costs
5. The percentages of each grant used for the indirect costs of local education agencies
6. Outside state funding and federal grants

</tbody>
</table>

As indicated above, all program sponsors (including the sponsoring district/county office of education and collaborating colleges and universities) provide in-kind support to participants in addition to the state funding allocations. Program sponsors report a cost range from $1,350 for those participants attending community college to more than $6,700 per school year for those attending a four-year institution. During 2006-2007, programs reported that more than 51% of grant funds disbursed ($3,101,792) were expended for tuition, books, and other college/university fees. Program sponsors also provided $1,014,372 of in-kind support for paraprofessionals participating in the PTTP. When in-kind costs are factored into the equation, educational costs prove to be even higher. It should be noted that the level of in-kind support for the program varies from locality to locality due to variations in local resources.

**D. Academic Progress of Participating School Paraprofessionals**

The PTTP program is currently serving 1,755 paraprofessional participants who have not yet completed the program and earned a California Preliminary Teaching Credential. Of the current PTTP participants, 502 are enrolled at the Community College level; 772 are working on
completing their B.A. degrees at a California four-year college/university; and the remaining 481 are enrolled in a teacher preparation program at a California four-year college/university. A complete list of the participating districts and universities can be found in Appendix C.

A notable program success is the effective collaboration between school districts and postsecondary institutions. The purpose of these partnerships was to strengthen the relationships between local school districts and the postsecondary institutions that prepared teachers who typically were hired by these districts. The partnerships assured the smooth operation of the program as the participants enrolled in their bachelor’s degree and/or teacher preparation coursework. One private university partner, in conjunction with San Joaquin program sponsors, established an accelerated bachelor’s degree program for paraprofessionals who aspire to be teachers and who have completed 72 semester hours of coursework. This degree program can be completed in 15 months and is now also offered to other adult learners who attend the university. The Kern County program and their CSU partner are developing online coursework for participants who reside and work in geographically isolated areas of the county. Updates about these collaborative efforts and their success will be provided in subsequent legislative reports.

E. Meeting the Demand for Bilingual and Special Education Teachers

Table 4 below shows the degree to which the current PTTP participants are preparing to earn bilingual or special education certification. It should also be noted that participants of two programs (Antelope Valley Union High School District and Riverside County Office of Education, comprising a total of 54 participants) are seeking special education certification exclusively. A grand total of 908 (52%) are seeking bilingual and special education authorizations. It should be noted that with the implementation of Senate Bill 2042 in 2001 and SB 1059 in 2002, all Multiple or Single Subject credentials include an English learner authorization.

F. Numbers of Participants Employed as Teachers in the Public Schools

As of summer 2007, 1,471 graduates of the School Paraprofessional Teacher Training Program have successfully completed the program by earning a California Preliminary Teaching Credential. An additional 116 current program participants are presently serving as a teacher of record in K-12 public schools while completing a District or University Intern program (85 participants), or serving on an emergency permit (31 participants).

The PTTP is in its twelfth year of operation and the majority of the graduates of the original 13 programs have fulfilled their certificated service requirement. Many are no longer in contact with program sponsors, have moved from the area and are serving in another local education agency or are now retired. This makes it challenging for original program sponsors to monitor the employment paths of graduates who have fulfilled their obligation to the program. However, programs report that of the 1,471 program graduates, a total of 1,398 (95%) are current California public school employees.

VI. Degree to Which the Paraprofessional Teacher Training Program can Meet Teacher Demand

The original 13 programs that were established in 1995 served their last participants in 2004-2005. Since all graduates of the program hold full teacher certification, they meet the definition of “highly qualified teacher” in compliance with the No Child Left Behind (NCLB) federal legislation. Between 2007 and 2009, graduation and full certification of an additional 481 program participants are anticipated.

The 1,755 PTTP participants in 2006-07 include 1,253 paraprofessionals (71%) who are enrolled in course work at a four-year college or university. These paraprofessionals currently meet the new employment requirement for paraprofessionals established in the NCLB federal legislation. NCLB requirements include completion of at least 2 years of study at an institution of higher education, possession of an associate’s or higher degree, or completion of a formal local assessment through which the paraprofessional can demonstrate the ability to assist in instructing reading, writing and mathematics. The remaining 502 participants (29%) of the program are completing course work at the community college level and will meet the NCLB requirement within the next three years. By helping participants in the PTTP meet these employment requirements for both teachers and paraprofessionals, the program directly facilitates the State of California’s compliance with NCLB federal mandates.

The PTTP was established to address local employer needs and teacher shortages, particularly in the areas of bilingual education, English language learner education, and special education. The number of successful program graduates from the program, their areas of certification and their retention rate in the education profession demonstrates a dedication and commitment to teaching. Taking these factors into consideration, continued full funding and operation of the PTTP will positively impact teacher shortage areas during the 2007-2008 school year.
Appendix A

Chapter 1444 of the Statutes of 1990, which established The School Paraprofessional Teacher Training Program

Senate Bill No. 1636

CHAPTER 1444

An act to add Article 6.7 (commencing with Section 69619) to Chapter 2 of Part 42 of the Education Code, relating to education, and making an appropriation therefore.

(Approved by Governor September 28, 1990. Filed with Secretary of Senate September 30, 1990.)

The people of the State of California do enact as follows:

SECTION 1. Article 6.7 (commencing with section 69619) is added to Chapter 2 of Part 42 of the Education Code, to read:

Article 6.7. California School Paraprofessional Teacher Training Program

69619. The Legislature hereby finds and declares that over the next five years, as many as 50% of the classroom teachers in many urban school districts with large percentages of minority pupils will be eligible for retirement. The Legislature further finds and declares that in many school districts there are a number of classified employees, particularly minority group members, who are enrolled in, who have been enrolled in, or who would be interested in enrolling in, a teacher training program leading to a teaching credential if they were provided assistance in applying for admission and financial aid for that purpose.

The Legislature also finds and declares that educational paraprofessionals who serve pupils in the public schools provide valuable instructional services to public school pupils. A program to enhance instructional competencies and to prepare school paraprofessionals to become teachers would result in improved services in terms of their role in the instructional program in the classroom.

69619.1 (a) The California School Paraprofessional Teacher Training Program is hereby established for the purpose of recruiting paraprofessionals to participate in a pilot program designed to encourage them to enroll in a teacher training program and to provide instructional service as a teacher in the public schools.
(b) No later than July 1, 1992, the Commission on Teacher Credentialing in consultation with the Chancellor of the California Community Colleges, the Chancellor of the California State University, and representatives of certificated and classified employee organizations, shall select 12 or more school districts or county offices of education, each of which applies for that selection and has 300 or more classified employees, to participate in a pilot program for the recruitment of school paraprofessional employees who wish to enroll in teacher training programs. The commission shall ensure that a total of 600 school paraprofessionals are recruited from among the 12 participating school districts or county offices of education. The commission shall also require that at least 40% of the school paraprofessionals employed by each school district or county office of education selected to participate in the pilot program are members of racial and ethnic minority groups, as determined by data compiled under the California Basic Educational Data System maintained by the State Department of Education. The criteria adopted by the Commission for the selection of school districts or county offices of education to participate in the pilot program shall include the following:

1. The extent to which the applicant district or county office demonstrates the capacity and willingness to accommodate the participation of school paraprofessionals of the district in teacher training programs conducted at institutions of higher education.
2. The extent to which the applicant district's or county office's plan for the implementation of its recruitment program involves the active participation of one or more local campuses of the California Community Colleges or the California State University in the development of coursework and teaching programs for participating school paraprofessionals. Each selected school district or county office of education shall be required to enter into a written articulation agreement with the participating campuses of the California Community Colleges and the California State University.

(c) Each selected school district or county office of education shall provide information and assistance to each school paraprofessional it recruits under the pilot program regarding admission to a teacher-training program.

(d) The school district or county office of education shall recruit and organize groups, or "cohorts," of school paraprofessionals, of not less than 30 paraprofessionals in each cohort. Cohorts shall be organized to consist of school paraprofessionals having approximately equal academic experience and qualifications, as determined by the district or county office of education. The members of each cohort shall enroll in the same campus, and shall be provided by the school district or county office of education with appropriate support and information throughout the course of their studies. Each school district or county office of education shall certify that it has received a commitment from each member of a cohort that he or she will complete one school year of classroom instruction in the district or county office of education for each year that he or she received assistance for books, fees, and tuition while attending a community college or a campus of the California State University under the program. To the extent possible, members of each cohort shall proceed through the same waiver and credential programs. "Teacher training program," for the purposes of this article, means any undergraduate program of instruction conducted at a campus of the California Community Colleges, or undergraduate or graduate program conducted at a campus of the California State University,
that is designed to qualify students enrolled in the program for a teaching credential authorizing
instruction in kindergarten and grades 1 to 12, inclusive.

(e) The commission shall contract with an independent evaluator with a proven record of
experience to assessing career advancement teacher training programs to determine the success
of the recruitment programs established pursuant to subdivision (b). The evaluation shall be
made on an annual basis and shall include, but shall not be limited, all of the following-

(1) The number and racial and ethnic classifications of school paraprofessionals participating
in the pilot program who successfully complete the teacher training program each year.

(2) The number and racial and ethnic classifications of school paraprofessionals participating
in the pilot program who successfully complete the teacher training program each year.

(3) The total cost per person participating in the pilot program who successfully obtains a
teaching credential, based upon all state, local, federal, and other sources of funding.

(4) The economic status of persons participating in the pilot program.

(5) A description of financial and other resources made available to each recruitment
program by participating school districts or county offices of education, the California
Community Colleges, the California State University, and other participating
organizations.

(f) Each selected school district or county offices of education shall report to the commission
regarding the progress of each cohort of school paraprofessionals, and other information
regarding its recruitment program as the commission may direct.

(g) No later than January 1, 1993, and again by January 1, 1994, and by January 1, 1995, the
commission shall report to the Legislature regarding the status of the pilot program, including,
but not limited to the number of school paraprofessionals recruited, the academic progress of
school paraprofessionals recruited, the number of school paraprofessionals recruited who are
subsequently employed as teachers in the public schools, and other effects upon the operation of
the public schools.

(h) "Teaching paraprofessional," for the purposes of this article, includes the following job
classifications: teacher associate, teacher assistant, teacher aide, pupil services aide, and library
aide.

(i) "Local education agency" for the purposes of this article includes county offices of
education that can participate in the pilot programs.

69619.3 The Commission on Teacher Credentialing shall conduct a survey of classified
employees in each school district or county office of education maintaining kindergarten and any
of grades 1 to 12, inclusive, that has 300 or more classified employees here at least 40 % of the
paraprofessionals employed by the district or county office are members of racial and ethnic
minority groups. The survey shall be addressed to those classified employees of each of those districts or county offices who express the desire to, enroll in a postsecondary education program in order to obtain a teaching credential authorizing instruction in kindergarten and grades 1 to 12, inclusive, and shall determine the educational attainment of each of those classified employees, and the approximate coursework that would be required in order for the classified employee to obtain that teaching credential. The survey shall be designed to determine the extent to which the need exists, in the 1992-93 fiscal year and thereafter, for the pilot program described in Section 69619.1. The survey shall include the views of the management employees of the local school districts or county offices of education regarding their participation in the pilot program. The commission shall submit draft recommendations based on the results of the survey to the Legislature no later than May 1, 1991. The commission shall submit the results of the survey to the Legislature no later than July 1, 1990.

SECTION 2. The sum of eighty-five thousand dollars ($85,000) is hereby appropriated from the Teacher Credentials Fund to the Commission on Teacher Credentialing for the purpose of conducting the survey pursuant to Section 69619.3 of the Education Code.
Appendix B

Chapters 737 and 831 of the Statutes of 1997,
which authorized expansion of the California School Paraprofessional Teacher Training Program

EDUCATION CODE SECTION 44390-44393

44390. The Legislature hereby finds and declares that over the next five years, as many as 50% of the classroom teachers in many urban school districts with large percentages of minority pupils will be eligible for retirement. The Legislature further finds and declares that in many school districts there are a number of classified employees, particularly minority group members, who are enrolled in, who have been enrolled in, or who would be interested in enrolling in, a teacher training program leading to a teaching credential if they were provided assistance in applying for admission and financial aid for that purpose.

The Legislature also finds and declares that educational paraprofessionals who serve pupils in the public schools provide valuable instructional services to public school pupils. A program to enhance instructional competencies and to prepare school paraprofessionals to become teachers would result in improved services in terms of their role in the instructional program in the classroom.

44391. This article shall be known and may be cited as the Wildman-Keeley-Solis Exemplary Teacher Training Act of 1997.

44392. For the purposes of this article, unless the context clearly requires otherwise, the following terms shall have the following meanings:

(a) "Institutions of higher education" means the California Community Colleges, the California State University, the University of California, and private institutions of higher education that offer an accredited teacher training program.

(b) "Program" means the California School Paraprofessional Teacher Training Program established pursuant to Section 44393.

(c) "Teaching paraprofessional" means the following job classifications: educational aide, special education aide, special education assistant, teacher associate, teacher assistant, teacher aide, pupil service aide, library aide, child development aide, child development assistant, and physical education aide.

(d) "Teacher training program" means any undergraduate or graduate program of instruction conducted by a campus of an institution of higher education that includes a developmentally sequenced career ladder to provide instruction, coursework, and clearly defined tasks for each level of the ladder, and that is designed to qualify students enrolled in the program for a teaching credential authorizing instruction in kindergarten and grades 1 to 12, inclusive.

44393. (a) The California School Paraprofessional Teacher Training Program is hereby established for the purpose of recruiting paraprofessionals to participate in a program designed...
to encourage them to enroll in teacher training programs and to provide instructional service as teachers in the public schools.

(b) The Commission on Teacher Credentialing, in consultation with the Chancellor of the California Community Colleges, the Chancellor of the California State University, the President of the University of California, the chancellors of private institutions of higher education that offer accredited teacher training programs, and representatives of certificated and classified employee organizations, shall select 24 or more school districts or county offices of education representing rural, urban, and suburban areas that apply to participate in the program. The commission shall ensure that, at a minimum, a total of 600 school paraprofessionals are recruited from among the 24 or more participating school districts or county offices of education. The criteria adopted by the commission for the selection of school districts or county offices of education to participate in the program shall include all of the following:

1. The extent to which the applicant school district or county office of education demonstrates the capacity and willingness to accommodate the participation of school paraprofessionals of the school in teacher training programs conducted at institutions of higher education.

2. The extent to which the applicant's plan for the implementation of its recruitment program involves the active participation of one or more local campuses of the participating institutions of higher education in the development of coursework and teaching programs for participating school paraprofessionals. Each selected school district or county office of education shall be required to enter into a written articulation agreement with the participating campuses of the institutions of higher education.

3. The extent to which the applicant's plan for recruitment attempts to meet the demand for bilingual cross cultural teachers.

4. The extent to which the applicant's plan for recruitment attempts to meet the demand for multiple subject credentialed teachers interested in teaching kindergarten or any of grades 1 to 3, inclusive. For purposes of this paragraph, each paraprofessional selected to participate shall have completed at least two years of undergraduate college or university coursework and shall have demonstrated an interest in obtaining a multiple subject teaching credential for teaching kindergarten or any of grades 1 to 3, inclusive.

5. The extent to which the applicant's plan for recruitment attempts to meet the demand for special education teachers.

6. The extent to which the applicant's plan for recruitment includes a developmentally sequenced series of job descriptions that lead from an entry-level school paraprofessional position to an entry-level teaching position in that school district or county office of education.

7. The extent to which the applicant's plan for recruitment attempts to meet its own specific teacher needs.

8. The extent to which the applicant's plan for implementation of its recruitment program involves participation in a district internship program pursuant to Sections 44325, 44326, 44327, 44328, and 44830.3 or a university internship program pursuant to Article 3 (commencing with Section 44450) of Chapter 3.

(c) Each selected school district or county office of education shall provide information and assistance to each school paraprofessional it recruits under the program regarding admission to a teacher training program.

(d) (1) The school district or county office of education shall recruit and organize groups, or "cohorts," of school paraprofessionals, of no more than 30, and no less than 10,
paraprofessionals in each cohort. Cohorts shall be organized to consist of school paraprofessionals having approximately equal academic experience and qualifications, as determined by the school district or county office of education. To the extent possible, the members of each cohort shall proceed through the same subject matter and credential programs. The members of each cohort shall enroll in the same campus, and shall be provided by the school district or county office of education with appropriate support and information throughout the course of their studies.

(d) (2) Each school district or county office of education shall certify that it has received a commitment from each member of a cohort that he or she will accomplish all of the following:

(A) Graduate from an institution of higher education under the program with a bachelor’s degree.
(B) Complete all of the requirements for and obtain a multiple subject, single subject, or education specialist teaching credential.
(C) Complete one school year of classroom instruction in the district or county office of education for each year that he or she received assistance for books, fees and tuition while attending an institution of higher education under the program.

(3) To the extent that any participant does not fulfill his or her obligations, as set forth in paragraph (2), the participant shall be required to repay the assistance. If a participant is laid off, the participant may not be required to repay the assistance until the participant is offered reemployment and has an opportunity to fulfill his or her obligations under this section.

(e) The commission shall contract with an independent evaluator with a proven record of experience in assessing career-advancement programs or teacher training programs to determine the success of the recruitment programs established pursuant to subdivision (b). The evaluation shall be made on an annual basis and shall include, but not be limited to, all of the following:

(1) The total cost per person participating in the program who successfully obtains a teaching credential, based upon all state, local, federal, and other sources of funding.
(2) The economic status of persons participating in the pilot program.
(3) A description of financial and other resources made available to each recruitment program by participating school districts or county offices of education, institutions of higher education, and other participating organizations.
(4) The extent to which pupil performance on standardized achievement tests has improved in classes taught by teachers who have successfully completed the program, in comparison to classes taught by other teachers who have equivalent teaching experience.
(5) The extent to which pupil dropout rates and other measures of delinquency have improved in classes taught by teachers who have successfully completed the program.
(6) The extent to which teachers who have successfully completed the program remain in the communities in which they reside and in which they teach.
(7) The attrition rate of teachers who have successfully completed the program.

(f) Each selected school district or county office of education shall report to the commission regarding the progress of each cohort of school paraprofessionals, and other information regarding its recruitment program as the commission may direct.

(g) No later than January 1 of each year, the commission shall report to the Legislature regarding the status of the pilot program, including, but not limited to, the number of school paraprofessionals recruited, the academic progress of the school paraprofessionals recruited, the number of school paraprofessionals recruited who are subsequently employed as teachers in the public schools, the degree to which the program meets the demand for bilingual and special
education teachers, the degree to which the program or similar programs can meet that demand if properly funded and executed, and other effects upon the operation of the public schools.

(h) It is the intent of the Legislature that each fiscal year, funding for the California School Paraprofessional Teacher Training Program be allocated to the Commission on Teacher Credentialing for grants to school districts pursuant to this section. In no case shall grants to any school district exceed the equivalent of three thousand dollars ($3,000) annually per paraprofessional in the program. Funding for grants to school districts pursuant to this subdivision, shall be contingent upon an appropriation in the annual Budget Act.
Appendix C

Local Education Agency, California Community College, and California
Four-Year College and University Program Partnerships

State law mandates that participating local education agencies enter into articulation agreements with participating campuses of the California Community Colleges and/or the California State University, the University of California, and private institutions of higher education that offer accredited teacher training programs. The table below identifies the collaborative partnerships of the 33 funded PTTP sites. These partnerships include written articulation agreements with 54 campuses of the California Community Colleges, 23 California State University campuses, 2 campuses of the University of California and 11 independent colleges and universities. These partnerships with postsecondary institutions contribute to the program’s goal of creating innovative teacher education models. It should also be noted that program participants are being trained for service in 214 school districts and/or county offices of education.
