

Notification of Institutions Not In Compliance with Accreditation Timelines October 2019

Overview

This regular report provides information to the COA regarding institutions that have not complied with the timelines of the accreditation cycle. Specifically, this item covers Common Standards, Preconditions, Program Review, Accreditation Fees, and ADS submissions.

At this time, there are no items to report late to the COA. Program Review documentation was due to the Commission for the Red Cohort on October 15, 2019. Staff has not yet had enough time to determine what documents from which institutions have been submitted. It is anticipated that any late program review submissions and accreditation fees will be reported at the next COA meeting in January 2020.
