A. Submission Guidelines for English Subject Matter Preparation Programs

An institution interested in offering a new Commission-approved English subject matter program must submit the following:

- An Intent to Submit form;
- The Initial Program Review (IPR) Cost Recovery Fee;
- A program proposal that responds to the preconditions and adopted program standards (Appendix B) - limit of 5 pages per standard response;
- A course scope and sequence (typically taken from the institution’s catalog);
- A completed English Alignment Matrix; and
- All of the program’s course syllabi.

Further information on the program submission, review process, and cost recovery fees is available on the Subject Matter Program Approval web page: http://www.ctc.ca.gov/educator-prep/elig-inst-new-subject.html.
B. English Subject Matter Program Preconditions

Introduction to the Preconditions
A precondition is a requirement for initial subject matter program approval. Unlike standards, preconditions specify requirements for program compliance rather than program quality. The basis for a precondition is either: 1) statute; 2) regulations; and/or 3) Commission policy. The Commission determines whether a program complies with the adopted preconditions on the basis of a program document provided by the institution for initial program review purposes. In the overall program review sequence, only after a program demonstrates compliance with all preconditions is it then eligible for a more intensive review to determine if the program is in alignment with the Commission's English subject matter program standards for quality and effectiveness.

Institutions may determine whether the preconditions and standards are addressed through one or more courses for each commonly taught subject or courses offering integrated study of these subjects. Institutions may also define the program in terms of required or elective coursework. However, elective options must be equivalent in meeting the standards. Coursework offered by any appropriate department(s) of a regionally accredited institution may satisfy the preconditions and standards in this handbook. Programs may use general education courses in meeting the standards.

English Subject Matter Program Preconditions

1. Each Program of Subject Matter Preparation for the Single Subject Teaching Credential in English shall include (a) a minimum of 36 semester units (or 54 quarter units) of core coursework in English and related subjects that are commonly taught in departmentalized classes in California public schools, and (b) a minimum of 12 semester units (or 18 quarter units) of coursework that provides extended study of the subject. These two requirements are elaborated in Preconditions 2 and 3.

2. The core (breadth) of the program shall include coursework in (or directly related to) the following subjects that are commonly taught in departmentalized classes of English and related subjects in the public schools, including:
   - Literature and Textual Analysis;
   - Language, Linguistics, and Literacy;
   - Composition and Rhetoric; and
   - Communications: Speech, Media, and Creative Performance.

3. Extended studies in the program (breadth, depth, perspective, concentrations) designed to supplement the core of the program may be offered in any or all of the following patterns:
   - A combination of related content areas within or across domains
   - A concentration in one domain
   - A concentration in any content area within a domain
C. Single Subject Matter Preparation Program Standards

Category I: Standards Common to All Single Subject Matter Programs
The following two standards related to program design, resources, and support are applicable to programs in all single subject disciplines. They are the same for all subject areas and require subject-specific program information.

Standard 1: Program Design
Subject matter programs are based on an explicit statement expressing the purpose, design, and expected outcomes of the program. The program curriculum builds on the K-12 state-adopted academic content standards, with candidate outcomes and assessments aligned to the subject matter requirements. The program provides prospective teachers with conceptual knowledge of the subject matter, develops academic literacy and discipline-based fluency, addresses issues of equity and diversity, and exposes prospective teachers to a variety of learning experiences appropriate for the discipline.

Standard 2: Program Resources and Support
The program sponsor allocates resources to support effective program coordination, which includes advising students, facilitating collaboration among stakeholders and overseeing program review. Ongoing review processes use assessments of the prospective teachers and a variety of data such as input from stakeholders and other appropriate measurements for review and evaluation of the subject matter program.
Category II: Program Standards for English

Standard 3: Required Subject of Study
The subject matter preparation program is based on an explicit statement of program philosophy that expresses a purpose and design, and articulates desired outcomes, that are aligned to the Preliminary Multiple and Single Subject Credential Program Standards. The program provides the coursework and field experiences necessary to teach the specified subject to all students in California’s diverse public school population. The subject matter preparation for prospective teachers is academically rigorous and intellectually stimulating. The institution assigns high priority to and appropriately supports the program as an essential part of its mission. The program curriculum reflects and builds on the English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects (2013) and the English Language Arts/English Language Development Framework (2014) adopted by the State Board of Education. The program is designed to establish a strong foundation in subject matter knowledge and understanding that provides a basis for continued development during the teacher’s professional career.

Standard 4: Extended Studies
The program includes coursework to supplement the program core and further prepare prospective teachers in the range of subjects included in the state-adopted English Language Arts/English Language Development Framework (2014). Prospective teachers build upon foundational knowledge acquired in the program core by further work within or across content domains. The program’s design for extended studies provides prospective teachers with options, including both specialized and comprehensive preparation based on coherent patterns of coursework.

Standard 5: Literature and Textual Analysis
Prospective teachers of English are prepared to recognize the power and importance of literature, as it reflects the most eloquent statements about the human condition. Prospective teachers of English develop an appreciation for our diverse literary heritage as an expression of our poly-cultural society and understand the ways that language can be used to articulate moral and ethical values, delight the spirit, and/or express the creative impulses of human thought. The program curriculum includes traditional and emerging definitions of literature, types and periods of literature, and textual analysis.

Standard 6: Language, Linguistics and Literacy
The program requires prospective teachers of English to develop an understanding of language structures, language acquisition, linguistic diversity and the development of literacy. Prospective teachers know, understand and appreciate the varieties of spoken and written English and how they are related to the diverse cultures and societies where English is a medium of communication. Recognizing the needs of both native and non-native speakers, the program effectively models English as a communicative tool.

Standard 7: Composition and Rhetoric
In the program prospective teachers learn and apply a variety of composing processes. Prospective teachers of English analyze and compose texts representing a variety of discourse types and demonstrate the ability to use research strategies, text production technologies and presentation methods appropriately in a range of rhetorical contexts.

**Standard 8: Communications: Speech, Media and Creative Performance**

In the program prospective teachers of English acquire the breadth of knowledge needed to integrate journalism, technological media, speech, dramatic performance and creative writing into the language arts curriculum. Prospective teachers gain experience with oral and visual communication as expressed through media and performance as well as creative writing forms to understand how to use language effectively to communicate ideas and express themselves creatively.
D. English Subject Matter Requirements

More than ever before, teachers of English in California’s middle and high schools must deliver a complex and dynamic curriculum to students of diverse socioeconomic, linguistic, and cultural backgrounds. Furthermore, society is increasingly technologically and media oriented. The Reading/Language Arts Framework for California Public Schools: Kindergarten Through Grade Twelve (2007) forms the basis for the preparation of English teachers, who must equip their students to meet the challenges of this changing world. In this context, new paradigms and models are required for teaching English/Language Arts. Multiple forms of literacy demand a broad theoretical knowledge of language and literacy acquisition, while new information technologies require an emphasis on critical analysis of both print and non-print texts.

Candidates for Single Subject Teaching Credentials in English have a broad knowledge of literature, language and linguistics, rhetoric and composition, and communication studies. Candidates must be able to read and write well for a variety of purposes and communicate effectively within a variety of rhetorical contexts. In addition, candidates must also be knowledgeable about theater arts, public speaking, journalism, textual analysis of nonfiction and electronic media, and production of technologically enhanced documents. This broad scope of background and skills ensures a greater degree of success in English/Language Arts classrooms for California’s public school children.

Domain 1: Reading Literature and Informational Texts

Candidates demonstrate knowledge of the foundations and contexts of reading literature and informational texts contained in California’s Common Core State Standards for English Language Arts, Literacy in History/Social Studies, Science, and Technical Subjects (2010) and the Reading/Language Arts Framework for California Public Schools: Kindergarten Through Grade Twelve (2007) at a postsecondary level of rigor. E. Review and Approval of Subject Matter Programs

A regionally accredited institution of postsecondary education that would like to offer a subject matter preparation program may submit a program proposal that responds to the standards and preconditions in this handbook. The submission of programs for review and approval is voluntary for colleges and universities, but only Commission-approved subject matter programs will meet a prospective teacher’s requirement for subject matter competence. Submissions are reviewed by a program review panel with guidance from Commission staff. Institutions are encouraged to support faculty and/or instructional staff with subject matter expertise in participating as members of program review panels.

Selection and Composition of Program Review Panels
Review panel members are selected based on their expertise in a particular subject area. Panel members are also expected to be knowledgeable about K-12 curriculum and instruction in California public schools. Reviewers are selected from institutions of higher education, school districts, county offices of education, organizations of subject matter experts, and statewide professional organizations.

Steps in the Review of Programs
The Commission is committed to conducting a program review process that is objective, authoritative, and comprehensive. The Commission also seeks to be as helpful as possible to colleges and universities throughout the review process. Commission staff is available to guide and assist programs throughout the process.

Review of Preconditions:  Commission staff typically review preconditions because preconditions address issues of compliance and not program quality. This review is done prior to initial program approval. Once the Preconditions have been determined to have been met, the program document is referred to the expert review panel for review against the program standards.

Review of Program Standards:  Since the program standards address issues of program quality and effectiveness, each institution’s response to the standards is reviewed by a review panel of subject matter experts. If the panel determines that a proposed program meets the standards, Commission staff will recommend the program for approval by the Committee on Accreditation.

If the program review panel determines that the program does not meet the standards, the document will be returned to the institution with an explanation of the panel's findings, including specific reasons for the findings. If the panel has substantive concerns about one or more aspects of program quality, representatives of the institution can obtain further information and technical assistance from Commission staff so that the program review process is as helpful as possible to colleges and universities.
If the Program Review Panel determines that minor or technical changes should be made by the program sponsor in order to meet the program standards, Commission staff will review the resubmitted document and recommend the program for approval by the Committee on Accreditation.

There is no penalty for programs that do not meet all subject matter program standards on the first try. However, an institution may not offer a program to prospective candidates until the program is approved by the Commission.

**Appeal of an Adverse Decision:** An institution that would like to appeal a decision of the staff regarding the preconditions review or of the program review panel regarding the standards review, it may do so by submitting the appeal to the Commission’s Executive Director. The institution should include the following information in the appeal:

- A rationale for the appeal by the institution
- The original program document and the stated reasons of the Commission's staff and/or the review panel for not recommending approval of the program.
- A specific response by the institution to the initial denial, including a copy of the resubmitted document (if it has been resubmitted).

The Executive Director may deny the appeal or appoint an independent review panel or present the appeal directly to the Commission for consideration.
